1	**Mesita height/Panels.** Tablas mesa-tic metal coated in electrostatic paint or aluminum frames with screen, minimum pre-die cast finish. All divisions to be installed must be minimum 7.5cm. **Desk and 1.15m high.** All divisions must be able to be set at different heights both vertically and horizontally. The divisions that have cubes must have wire and data cables in the upper part of the faces and regulated and non-regulated electrical outlets in the lower part of the faces. Tablas mesa-tic must be able to be set at different heights. Tablas mesa-tic must be able to be set at different heights. Tablas mesa-tic must have a Minimum 5 years guarantee. The terminales supply and installation. All of the divisions shall be laminate top outer color as surfaces, up to 1.35 in high, and last car, with terminal glass or Formica or Mylar, except behind hanging cabinets or here panels shall be in formica. Glass Samples PC's included for glass Mesa 5 the building companies Needs heights other than those suggested in this item, the permissible ranges are: Desk: 0.70 meters minimum and maximum 0.75 meters, Panel: minimum 1.15 meters and maximum 1.35 meters.	1	1.0 - lump sum				
2	**Glass Screens Width 1.40 or given.** A shelf be installed over the surfaces that are set in front of the other. The width shall be 0.40 cm less than the sitting surface by 40 cm Straight. These screens shall be designed to be removed easily without disconnecting the surface or nearby panelling. Slabs of laminated glass 3mm Dim. with color to be selected by the Embassy.//	16	Ea. - each				
3	**Paneles en Mitre.** Paneles en mitre, 1.4m x 1.40m. En mesitas paneles cubre de superficies, la diferencia de los paneles, cual 10 centímetro que el mesa perfecta de la superficie en los paneles. de trabajo. La altura de los paneles será mm. 0.35m. Estos paneles deberán estar detallados para poder ser reenviadas con facilidad de distribuir la superficie. Hechas de varios laminado 3mm Dim. con pulido. Color a un acordado con la Embajada. Estos paneles deben ser	16	Ea. - each				
4	**Paneles en L 1.40m x 1.40m.** Tablas de superficies de trabajo incluidas mesas y elementos independientes cada un Tablas innovadas de mitre 3cm de espesor formado en formica con canto plano terminado, incluye balancy y un paso cables con tapa por cada superficie suministrada. Esquinas metálicas cuadradas con pintura electrostática, con posibilidad de conducción de cableado vertical y horizontal, desplazable, horizontal y de cubierta. Con un mayor universal por puesto. Con tomas de operaciones. Incluyendo un paso de cables suministrado con su correspondiente tapa.	16	Ea. - each				
5	**Simple Workstation type mix 1.0m x 0.60m.** Alto-sitting surfaces including tables and independent elements shall be and made of high pressure laminate. 1.0/ or 3cm thick, with flat Barrow fused edges, and a final include "balance" and one covered cable run for each surface supplied. Square metal supports with electrostatic paint, able to be a-level, and running cable runs as long along the desk. Working surfaces shall be at least 60 cm wide.	2	Ea. - each				
6	**Simple Workstation type mix 1.0m x 0.60m x 0.60m.** Alto-sitting surfaces including tables and independent elements shall be and made of high pressure laminate. 1.0/ or 3cm thick, with flat Barrow fused edges, and a final include "balance" and one covered cable run for each surface supplied. Square metal supports with electrostatic paint, able to be a-level, and running cable runs as long along the desk. Working surfaces shall be at least 60 cm wide. Location: Operations Room/	8	Ea. - each				
7	**Simple Workstation type mix 1.0m x 0.60m x 0.60m.** Alto-sitting surfaces including tables and independent elements shall be and made of high pressure laminate. 1.0/ or 3cm thick, with flat Barrow fused edges, and a final include "balance" and one covered cable run for each surface supplied. Square metal supports with electrostatic paint, able to be a-level, and running cable runs as long along the desk. Working surfaces shall be at least 60 cm wide. Location: Operations Room/	8	Ea. - each				
8	**Simple Workstation type mix 1.0m x 0.60m x 0.60m.** Alto-sitting surfaces including tables and independent elements shall be and made of high pressure laminate. 1.0/ or 3cm thick, with flat Barrow fused edges, and a final include "balance" and one covered cable run for each surface supplied. Square metal supports with electrostatic paint, able to be a-level, and running cable runs as long along the desk. Working surfaces shall be at least 60 cm wide. Location: Operations Room/	2	Ea. - each				
9	**Simple Workstation type mix 1.0m x 0.60m.** Alto-sitting surfaces including tables and independent elements shall be and made of high pressure laminate. 1.0/ or 3cm thick, with flat Barrow fused edges, and a final include "balance" and one covered cable run for each surface supplied. Square metal supports with electrostatic paint, able to be a-level, and running cable runs as long along the desk. Working surfaces shall be at least 60 cm wide. Location: Operations Room/	1	Ea. - each				
10	**Simple Workstation type mix 1.0m x 0.60m.** Alto-sitting surfaces including tables and independent elements shall be and made of high pressure laminate. 1.0/ or 3cm thick, with flat Barrow fused edges, and a final include "balance" and one covered cable run for each surface supplied. Square metal supports with electrostatic paint, able to be a-level, and running cable runs as long along the desk. Working surfaces shall be at least 60 cm wide. Location: Operations Room/	2	Ea. - each				
11	**Auxiliary table** Rectangular table minimum 0.60 mm thick. 1.2 m length x 0.45m high. The table shall include metal supports coated with electrostatic paint, with bottom plastic or rubber borders. Cover or lit same specifications of the building sections Include catalog/models with your proposal. Location: Boats room and Commander's room/	1	Ea. - each				
12	**Mesa auxiliar** Rectángulo de mesa auxiliar de centro. Medidas: 1.2 m largo x 0.6 m ancho x 0.45m alto. Con patas o soportes metálicos en distintos acaros cold rolled calibre 18, pintadas de alumbre equivalente. Tablero de madera aglomerada de 18 mm de espesor, con acabado melamina de color a elegir. Incluye catalogo/prototipo con su propuesta. Superficie y acabado tipo uso de interior especificaciones superficies de los puestos de trabajo. Localización: Boats room y oficina del comandante	1	Ea. - each				
13	**Meeting table** Rectángulo de 4 plazas. Maximum 45 x 90m The table shall include non-corrosive metal or equivalent aluminum support finished with electrostatic paint. Inclined borders to the surface is preferable and/or rubber. Metal frames. Equal cover or lit the same specifications as the building sections. Location: Commanders room	1	Ea. - each				
14	**Mesa de Juntas 8 Personas** Tablero de mesa, semi rectangular de 8 puestos y medidas 2.1 ancho x 0.91 largo. Con dos soportes centrales metálicos, o en alumnio equivalente con posibilidad de conducir los cables de cableado y acabado en pintura electrostática, los soportes con revestimiento de plástico o caucho y acabado a la superficie. La mesa debe tener una conducción para conducir los cables de red, telefonía, corriente regulada, tropicalizada y puntas de tres anteriores mesas mencionadas. Sobre la superficie 2 Bolígrafos (grises). Cada uno con 8 enchufes colocados que se usan para desconectarlos, con y datos. El proveedor debe ofrecer el diseño que mejor disponible de acuerdo con la distribución. Superficie y acabado tipo uso de interior especificaciones que superficies de los puestos de trabajo	1	Ea. - each				
15	**2DJ Filing Cabinet** Cabinet with two conventional drawers and a fully opening, legal sized hanging folder file drawer with American type runners. The filing cabinet should be made of metal and/or wooden, brass handpull and drawers. Internal lower drawers gauge 20 metacrom aluminum equipment. Coated in electrostatic paint. Include lock & key and three in period accessories. Minimum W. 15 cm D.	47	Ea. - each				
16	**Archivador** Del Archivador compuesto por dos cajones convencionales y un cajón de archivo de carpetas colgantes tamaño oficio con correderas tipo americano que deben ser de calidad. Medidas, con estructura, base, frente y cajones en 18 mm. cold rolled calibre 18 pintura o su equivalente en alumbre y acabado con pintura electrostática. Incluye corredizas con base y accesorios para cajones en cajones. Ancho mínimo 57 cm	6	Ea. - each				
17	**Overhead Bins. 0.600 Long x 0 Cabinets. Mesh.** Hangingoverhead cabinets that can be easily fixed to paneling or walls, no less than one full cabinet can be stored upon 18 cm equipment aluminum. Coated with electrostatic paint. Swing door over the top, as well as left & Upside suppers Door Handle "Pendul" or equivalent. Includes security lock. Fit Electronic available in 2 sizes, Location: Individual employees in a minimum area 0	6	Ea. - each				
18	**Gabinetes Altos x 0.80m large.** Gabinetes superiores colgantes para almacenamiento de 0.60mm. x2 tamaño oficio. Elaborados en tiempo de acero cold rolled calibre 18, pintadas de alumbre equivalente. Acabado resistente a cambios con pintura electrostática. Puerta movimiento hacia arriba que superior por medio de un sistema bisagra. Acabado puede en Formica y pintura Formica con cubos para tamaño Formica. Incluye cerradura con llave. Superficie y acabado tipo uso de interior especificaciones superficies de los puestos de trabajo. Localización: Boats room y oficina del comandante	1	Ea. - each				
19	**Metallic shelving with doors.** Metal Item coated with electrostatic paint. **2.0 m. high, 0.6 m front and 0.45m. back** (2 sets) with three (3) shelves the height of a front is variable every 5 cm. The systemincludes a pair of doors with locks and keys. Shelves should be able to be equipped and distributed. Thickness of the boards or of the panels made of metal and the shelf. Board of the shelf must be at least 0.4 mm. Metal panels should be able to be equipped and distributed. Thickness of the boards or of the panels made of metal and the shelf. Board of the shelf must be at least 0.4 mm. Metal panels should be able to be equipped and distributed. Thickness of the boards or of the panels made of metal and the shelf. Board of the shelf must be at least 0.4 mm. Metal shelves will be at least cabin 18, while supports will be at least cabin 16. Each shelf under level making up the different types of shelving should be designed to withstand weight of 300kg. Inside cabin.	1	Ea. - each				
20	**Armario metálico con puertas** Armario metálico o en aluminio equivalente en su totalidad con pintura electrostática negra, de **1.80m de alto, 0.6 m frente y 0.45m fondo** con tres (3) entrepaños de alma compacta cada fila con adicionar a pesar de 1cm en el frente que este el sobrepaño de objetos. El sistema posee dos puertas metálicas abatibles en el frente con llave. Con tapas laterales, posterior, superior e inferior. La base del armario debe estar elevada a 10 cm del piso para evitar el contacto de los objetos con el piso. Los entrepaños deben ser ajustables a cada 5 cm.	1	Ea. - each				
21	**Metallic shelving with doors.** Metal Item coated with electrostatic paint. **2.0 m. high, 0.6 m front and 0.45m. back** (2 sets) with five (5) shelves the height of which is variable every 5 cm. The systemincludes a pair of doors with locks and keys. Shelves should be able to be equipped and distributed. Thickness of the boards or of the panels made of metal and the shelf. Board of the shelf must be at least 0.4 mm. Metal panels should be able to be equipped and distributed. Thickness of the boards or of the panels made of metal and the shelf. Board of the shelf must be at least 0.4 mm. Metal panels should be able to be equipped and distributed. Thickness of the boards or of the panels made of metal and the shelf. Board of the shelf must be at least 0.4 mm. Metal shelves will be at least cabin 18, while supports will be at least cabin 16. Each shelf under level making up the different types of shelving should be designed to withstand weight of 300kg. Inside cabin.	1	Ea. - each				
22	**Armario metálico con puertas** Armario metálico o en aluminio equivalente en su totalidad con pintura electrostática negra, de **1.80m de alto, 0.6 m frente y 0.45m fondo** con tres (3) entrepaños de alma compacta cada fila con adicionar a pesar de 1cm en el frente que este el sobrepaño de objetos. El sistema posee dos puertas metálicas abatibles en el frente con llave. El armario tendrá tapas laterales, posterior, superior e inferior. La base del armario debe estar elevada a 10 cm del piso para evitar el contacto de los objetos con el piso. Los entrepaños deben ser ajustables a cada 5 cm.	1	Ea. - each				
23	**Gray Type Chair.** With armrests. Ergonomically designed, pneumatic seat height adjustment within a 10cm range, permanent contact ergonomic rocking chair with adjustable back plate and blocking device. Tilt lock must be minimum 0.5cm. high. 360 degree swivel. Not high base or soft laminating rollers coated in nylon (the fiber is ceramic). Not backrest, seat in high density foam, upholstered, in pure or equivalent Permanent contact mechanism.//	20	Ea. - each				
24	**Silla Tipo Ejecutiva/Profesional.** Silla con brazos, ergonómica reclinable de contacto permanente con ajuste de espaldar y bloqueo, con mecanismo neumático para graduación de altura con rango de 10 cm. El espaldar debe ser de 50 cm. de ancho y 60 cm. de largo. Base de 5 ruedas con recubrimiento de nylon (fibra de cerámica). Espaldar de malla, asiento tapizado en pluma o equivalente o cuero. Permanent contact mechanism.//	1	Ea. - each				
25	**Professional ecoline type chair with armrests, high back** Ergonomically designed for 15cm high adjustment, pneumatic seat height adjustment within a 10cm a 15cm range, permanent contact rocking chair with adjustable back plate and blocking device. 360 degree swivel. Not high base or soft laminating rollers coated in nylon (the fiber is ceramic), backrest, seat in high density foam, upholstered, in pure or equivalent Permanent contact mechanism.//	1	Ea. - each				
26	**Silla Profesional Taller con brazos, espaldar alto** Silla ergonómica reclinable (para mesas de 60cm de altura), contacto permanente, con ajuste de espaldar y bloqueo, con mecanismo neumático para graduación de altura con rango de 10 cm a 15 cm. El espaldar debe ser alto, 50 kg/cm. como para colectivos, aula laboratorio, con recubrimiento de nylon, ruedas de polietileno, cuero sintético 18", con pintura electrostática de color negro. Permanent contact mechanism.//	16	Ea. - each				
27	**Silla Ejecutiva con brazos.** Silla ergonómica ajustable con ruedas, espaldar medio. Se ofrece mínimo de 35 cm. medidas sobre la estructura del espaldar. Se debe ofrecer espuma con densidad mínima en asiento de 50 kg. m3 y en espalda de 30kg/m3. Silla ergonómica ajustable medidas de altura mínima de 35 cm. Debe tener superficie de apoyo de antebrazos, ajustables hacia el costado derecho, en forma de "L" y con pintura de color negro. Permanent contact mechanism.//	4	Ea. - each				
28	**Tara sofa Suite** Supply and install a sofa suite with a left, right density foam made of synthetic leather, preferable with armrests, included in your proposal available colors, Hangmaking, Minimum 3 years of warranty. Photocopies of the guarantees. Tarara Sofa Suite Suite Tarara Sofa Suite Suite Tarara Sofa Suite Suite
