SCHEDULE OF SUPPLIES/SERVICES, BLOCK 20
DESCRIPTION/SPECIFICATIONS/WORK STATEMENT

I. Scope of Work

For each year of the contract, the U.S. Government guarantees a minimum order of 10,000 liters of 95 - Octane fuel, 1,000 liters of 98 - Octane fuel and 10,000 liters of Diesel fuel. The maximum amount of all types of fuel together ordered each year of the contract shall not exceed 550,000 liters of fuel.

The Contracting Officer may issue oral orders that will be confirmed in writing.

The fuel provided at the various contractor stations will be 95 - Octane, 98 – Octane and Diesel fuel. The contractor will supply this fuel directly from depot fuel stations throughout Israel to designated Embassy vehicles equipped with contractor-supplied electronic equipment that allows for direct charge of fuel to the Embassy. This price is not to exceed any official rate, as set by laws enacted by the government of Israel.

Price Adjustment:

(a) The unit price per litre for 95 - Octane, 98 - Octane and Diesel fuel may be adjusted based on increases or decreases in the official price of vehicle fuel, mandated by the government of Israel.

(b) To request an adjustment in price, the Contractor must provide written notification of the price change to the Contracting Officer on midnight of the effective date of the price change. This notification must be accompanied by a copy of the official announcement of the price change, showing the new price and its effective date. The officer or general partner of the Contractor having overall responsibility for the Contractor's affairs shall certify the submission by written signature.
