One of the bloodiest battles of the war was the struggle for the island of Iwo Jima, which culminated with one of the most iconic images in history: 5 Marines and a Navy corpsman raising the American flag on Mount Suribachi. The inspiring photo capturing that moment became a symbol of victory to a nation that had grown weary of war and made instant heroes of the six American soldiers, some of whom would die soon after, never knowing that they had been immortalized. But the surviving flag raisers had no interest in being held up as symbols and did not consider themselves heroes; they wanted only to stay on the front with their brothers in arms who were fighting and dying without fanfare or glory. *Rated R for sequences of graphic war violence and carnage, and for language.*
