Important Note:

Plagiarism: Plagiarism is unacceptable. All applications will be checked and rejected in case of plagiarism. Plagiarism is using someone else's ideas or work without proper or complete acknowledgment. Plagiarism encompasses many things, and is by far the most common manifestation of academic fraud. For example, copying a passage straight from a book into a paper without quoting or explicitly citing the source is blatant plagiarism. In addition, completely rewording someone else's work or ideas and using it as one's own is also plagiarism. It is very important that students properly acknowledge all ideas, work and even distinctive wording that are not their own. However, certain information in any discipline is considered "common knowledge" and may be used without acknowledgment. What is considered to be common knowledge varies among fields; when in doubt consult a professor or TA. Students unsure of how to properly acknowledge a source are encouraged to consult an RA, TA, professor or manual of style.
