The Contractor shall also equip ladders and scaffolding with clean rubber shoes or similar protection devices.

If the Contractor spills any paint, or in any way soils the floors, the Contractor shall clean up using a specialist floor finishing company at the Contractor's expense. After completion of the painting work, the Contractor shall return all furnishings to their original position, and clean the work area free of litter and debris.

14. TECHNICAL SPECIFICATIONS FOR PAINTING WORK

1. Interior and Exterior Painting

Paint surfaces as directed by the task order. Match paint to similar adjacent materials or surfaces.

- (a) **Paint:** This category includes coating systems materials, primers, emulsions, enamels, stains, sealers and fillers, and other applied materials whether used as prime, intermediate or finish coats.
- (b) **Product Data:** The Contractor shall submit manufacturer's technical information, label analysis, and application instructions to the COR for each paint material proposed for use, prior to starting work. The Contractor shall list each material and cross-reference specific coating and finish system and application as an attachment to the above submittal. The Contractor shall identify each material by the manufacturer's catalog number and general classification.
- (c) **Single Source Responsibility:** The Contractor shall provide primers and undercoat paint produced by the same manufacturer as the finish coats.
- (d) **Material Quality:** The Contractor shall provide the manufacturer's best quality trade sale type paint material. Paint material containers not displaying manufacturer's product identification are not acceptable.
- (e) **Material Delivery:** The Contractor shall deliver materials to the job site in manufacturer's original, unopened packages and the containers shall bear the manufacturer's name and label with trade name and manufacturer's instructions.
- (f) **Material Storage:** The Contractor shall store materials not in use in tightly covered containers in a well ventilated area at a minimum ambient temperature of 45 degrees F (7 degrees C). The Contractor shall protect materials from freezing and keep storage area neat and orderly. Contractor shall remove oily rags and waste daily.
- (g) **Project Conditions:** The Contractor shall not apply paint when the relative humidity exceeds 85 percent, or at temperatures less than 5 degrees F (3 degrees C) above the dew point, or to damp or wet surfaces. The Contractor shall apply paint only in temperatures that comply with the manufacturer's specifications.
- (h) **Preliminary Examination:** The Contractor shall examine substrates and conditions under which painting will be performed for compliance with requirements and shall not begin application until unsatisfactory conditions have been corrected.
- (i) **Preparation:**

(i) The Contractor shall remove hardware and hardware accessories, plates, light fixtures, and items in place that are not to be painted, or provide protection such as taping, prior to surface preparation and painting. (Taping includes windows, door jams, etc.)

(ii) The Contractor shall clean and prepare surfaces to be painted following the manufacturer's instructions before applying paint or surface treatments. This preparation includes removal of oil, dust, direct, loose rust, mildew, peeling paint or other contamination to ensure good adhesion. In some cases, the Contractor may be requested to remove all existing coats of paint and sealers if prior paint application is showing signs of improper adhesion, such as peeling, chipping, etc. All surfaces must be clean and dry. The Contractor shall schedule cleaning and painting so dust and other contaminants will not fall on wet, newly painted surfaces.

(iii) The Contractor shall notify the Contracting Officer or COR of problems anticipated for any minor preparatory work required, such as but not limited to, filling nail holes, cleaning surfaces to be painted, and priming any requisite areas. Plan preparatory work as most units in residential areas will have nail holes or areas that will need to be primed or sealed. Replace all electrical covers with new covers after painting.

(j) Materials Preparation: The Contractor shall mix and prepare paint following the manufacturer's directions.

(k) Application: The Contractor shall apply paint following the manufacturer's directions. Use applicators and techniques best suited for substrate and type of material being applied. Do not paint over dirt, rust, scale, grease, moisture, scuffed surfaces, or conditions detrimental to formation of a durable paint film.

(i) Unless otherwise specified, the Contractor shall use a high quality semi-gloss latex paint (containing no lead or mercury) for all kitchens, baths, laundry areas, door frames, and window frames. The Contractor shall use a flat or satin flat latex base paint (containing no lead or mercury) in the remainder of the unit. The color shall be consistent with the balance of the room, which will normally be an off-white. The Contractor shall provide samples of the color on sample of the type of material to be painted before actual paint date is scheduled.

(ii) On exterior surfaces, the Contractor shall apply a high quality exterior grade latex base paint that matches as closely as possible the existing color on the exterior of the property, or a color as otherwise specified by the COR. Prior to painting, the Contractor

shall scrape, sand, fill, and prime the surface with a latex base primer. The Contractor should plan on extensive preparatory work prior to painting. The Contractor shall not apply exterior paint in snow, rain, fog or mist, or when the relative humidity exceeds 85 percent; or to damp or wet surfaces.

- (iii) The Contractor shall provide finish coats that are compatible with primers used.
 - (iv) The number of coats and film thickness required is the same regardless of application method. The Contractor shall not apply succeeding coats until previous coat has cured. The Contractor shall sand between applications where required to produce a smooth, even surface.
 - (v) The Contractor shall apply additional coats when undercoats or other conditions show through final coat, until paint film is of uniform finish, color, and appearance.
 - (l) Scheduling Painting: The Contractor shall apply the first coat to surfaces that have been cleaned, pretreated or otherwise prepared for painting as soon as practicable, and before subsequent surface deterioration. Allow sufficient time between successive coats to permit proper drying. Do not recoat until paint has dried.
 - (m) Minimum Coating Thickness: The Contractor shall apply materials at the manufacturer's recommended spreading rate. The Contractor shall provide a total dry film thickness of the system as recommended by the manufacturer.
 - (n) Prime Coats: Before application of finish coats, the Contractor shall apply a prime coat as recommended by the manufacturer to material required to be painted or finished, and which has not been prime coated.
 - (o) Brush Application: The Contractor shall brush-out and work brush coats into surfaces in an even film. The Contractor shall eliminate cloudiness, spotting, laps, brush marks, runs, sags, ropiness, or other surface imperfections. The Contractor shall draw neat glass lines and color breaks.
- The Contractor shall apply primers and first coats by brush unless manufacturer's instructions permit use of mechanical applicators.
- (p) Mechanical Applications: The Contractor shall use mechanical methods for paint application when permitted by manufacturer's recommendations, governing ordinances, and trade union regulations.

Wherever spray application is used, the Contractor shall apply each coat to provide the equivalent hiding of brush-applied coats. The Contractor shall not double-back with spray equipment building-up film thickness of two coats in one pass, unless recommended by the manufacturer.

- (q) Upon completion of painting, the Contractor shall clean the glass and paint-spattered surfaces. The Contractor shall remove spattered paint by washing, scraping or other proper methods, using care not to scratch or damage adjacent finished surfaces.
- (r) The Contractor shall remove temporary protective wrappings after completion of painting operations.

2. Drywall/Plaster Repair

The Contractor shall patch defective drywall with a similar thickness and fire-rated drywall. Joints shall be taped in a manner so they are not readily visible. The patch shall be textured with a texture consistent with the rest of the surface being patched. The Contractor shall set and spackle all nail heads. The Contractor shall tape joints and cover them with a joint compound. The Contractor shall sand smooth spackled nail heads and tape joints and remove all dust prior to painting. The Contractor shall spackle exterior surfaces with exterior grade compounds.

3. Texture Only - Walls

Occasionally, the Government may require a wall to be textured that has not previously been textured. The Contractor shall prepare the wall by filling and sanding any small holes or cracks with a suitable "non-shrinking" material. After preparatory work, the Contractor shall furnish and apply a texture type material. If any other walls within that room are textured, the texture material shall closely match the texture of any other existing textured walls in that room. The Contractor shall not be required to do less than one room on any individual task order.

4. Texture Only - Ceiling

Occasionally the Government may require a ceiling to be textured that has not previously been textured. The Contractor shall prepare the ceiling by filling and sanding any small holes or cracks with a suitable "non-shrinking" material. After preparatory work, the Contractor shall furnish and apply an "Acoustic" type texture.

5. Paint Exterior Trim

The Contractor shall apply a high quality exterior grade latex base paint that matches as closely as possible the existing color on the exterior trim of the property, or a color as specified by the Contracting Officer. The Contractor shall scrap, sand, fill, and prime the trim with a latex base primer, prior to painting. The Contractor shall plan on extensive preparatory work prior to painting. The specifications for exterior paint apply, unless otherwise specified in the task order.

6. Remove Wall Covering

Upon assignment by task order, the Contractor shall remove the designated wall covering (wallpaper, cork, mirror, tile, etc.). After removing the wall covering, the Contractor shall clean and make ready for painting the area. The Contractor shall remove and properly dispose of the old wall covering.

7. Plaster

The Contractor shall repair any damaged interior or exterior plaster as directed by the COR. The plaster material shall be of a similar material that matches as closely as possible the existing plaster in texture and color.

8. Stucco

The Contractor shall repair any damaged stucco and remove any loose stucco before applying paint.

9. QUALITY ASSURANCE AND SURVEILLANCE PLAN (QASP)

This plan provides an effective method to promote satisfactory contractor performance. The QASP provides a method for the Contracting Officer's Representative (COR) to monitor Contractor performance, advise the Contractor of unsatisfactory performance, and notify the Contracting Officer of continued unsatisfactory performance. The Contractor, not the Government, is responsible for management and quality control to meet the terms of the contract. The role of the Government is to monitor quality to ensure that contract standards are achieved.

(1) o Are, o are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) o Have, o have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(4) o Have, o have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples.*

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review,

this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for *Listed End Products* (*Executive Order 13126*).
