SOLICITATION

NOTE: In sealed bid solicitations "offer" and "offeror" mean "bid" and "bidder".

10. THE GOVERNMENT REQUIRES PERFORMANCE OF THE WORK DESCRIBED IN THESE DOCUMENTS *(Title, identifying no., date):*

This construction project is in the country of Colombia, and all projects shall abide by Colombian law s. By submitting a proposal the contractor shall guarantee that they have everything in place to complete the project to satisfaction. All equipment, materials, labor, licenses, w arranties, and insurances are the responsibility of the contractor.

Funds are not currently available. Requirement is Subject to Availability of Funds.

Scope: Construct a fuel storage facility in Juanchaco
 FAR 36.204 Disclosure of magnitude for this construction project is betw een USD \$500,000 and \$1,000,000.
 A visit to the worksite w ill be conducted on 7 Sept 2011. Questions may be directed to the USMILGP Logmis Project Engineer (see Clause 52.236-27).
 CLOSING DATE TO SUBMIT PRICE PROPOSAL (RFP): 22 September, 2011 at 10:00 AM (EST). Refer to Instructions to Offerors on Page 17 of RFP.
 Solicitation Index:
 Section 00010 – SF1442
 Section 00100 – Proposal Schedule/Instructions to Offerors/Statement of Work
 Section 00600 – Representations and Certifications
 Section 00700 – Contract Clauses
 Section 00800 – Special contract Requirements

11. The Contractor shall begin performance w ithin 10 calendar days and complete it w ithin 180 calendar days after receiving award, notice to proceed. This performance period is mandatory, negotiable. (See FAR 52.211-10 _____ .)

12 A. THE CONTRACTOR MUST FURNISH ANY REQUIRED PERFORMANCE AND PAYMENT BONDS? <i>(If "YES," indicate within how many calendar days after award in Item 12B.)</i> <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	12B. CALENDAR DAYS
--	--------------------

13. ADDITIONAL SOLICITATION REQUIREMENTS:

A. Sealed offers in original and _____ copies to perform the w ork required are due at the place specified in Item 8 by _____ (hour) local time _____ (date). If this is a sealed bid solicitation, offers must be publicly opened at that time. Sealed envelopes containing offers shall be marked to show the offeror's name and address, the solicitation number, and the date and time offers are due.

B. An offer guarantee is, is not required.

C. All offers are subject to the (1) w ork requirements, and (2) other provisions and clauses incorporated in the solicitation in full text or by reference.

D. Offers providing less than 60 calendar days for Government acceptance after the date offers are due w ill not be considered and w ill be rejected.

CLAUSES INCORPORATED BY FULL TEXT

52.204-6 DATA UNIVERSAL NUMBERING SYSTEM (DUNS) NUMBER (APR 2008)

(a) The offeror shall enter, in the block with its name and address on the cover page of its offer, the annotation "DUNS" or "DUNS+4" followed by the DUNS number or "DUNS+4" that identifies the offeror's name and address exactly as stated in the offer. The DUNS number is a nine-digit number assigned by Dun and Bradstreet, Inc. The DUNS+4 is the DUNS number plus a 4-character suffix that may be assigned at the discretion of the offeror to establish additional CCR records for identifying alternative Electronic Funds Transfer (EFT) accounts (see Subpart 32.11) for the same concern.

(b) If the offeror does not have a DUNS number, it should contact Dun and Bradstreet directly to obtain one.

(1) An offeror may obtain a DUNS number--

(i) Via the Internet at <http://fedgov.dnb.com/webform> or if the offeror does not have internet access, it may call Dun and Bradstreet at 1-866-705-5711 if located within the United States; or

(ii) If located outside the United States, by contacting the local Dun and Bradstreet office. The offeror should indicate that it is an offeror for a U.S. Government contract when contacting the local Dun and Bradstreet office.

(2) The offeror should be prepared to provide the following information:

(i) Company legal business name.

(ii) Tradestyle, doing business, or other name by which your entity is commonly recognized.

- (iii) Company physical street address, city, state and Zip Code.
- (iv) Company mailing address, city, state and Zip Code (if separate from physical).
- (v) Company telephone number.
- (vi) Date the company was started.
- (vii) Number of employees at your location.
- (viii) Chief executive officer/key manager.
- (ix) Line of business (industry).
- (x) Company Headquarters name and address (reporting relationship within your entity).

(End of provision)

CLAUSES INCORPORATED BY FULL TEXT

52.233-2 SERVICE OF PROTEST (SEP 2006)

(a) Protests, as defined in section 33.101 of the Federal Acquisition Regulation, that are filed directly with an agency, and copies of any protests that are filed with the Government Accountability Office (GAO), shall be served on the Contracting Officer (addressed as follows) by obtaining written and dated acknowledgment of receipt from the Chief of Contracting Office.

Regional Contracting Office – Bogota
U.S. Embassy – Bogota
MILGP Unit 5140
APO AA 34038-5140

(b) The copy of any protest shall be received in the office designated above within one day of filing a protest with the GAO.

(End of provision)

Addendum to 52.233-2

If you have complaints about this procurement, it is preferable that you first attempt to resolve those concerns with the responsible contracting officer. However, you can also protest to Headquarters, AMC. The HQ, AMC-Level Protest Program is intended to encourage interested parties to seek resolution of their concerns within AMC as an Alternative Dispute Resolution forum, rather than filing a protest with the General Accounting Office or other external forum. Contract award or performance is suspended during the protest to the same extent, and within the same time periods, as if filed at the GAO. The AMC protest decision goal is to resolve protests within 20 working days from filing. To be timely, protests must be filed within the periods specified in FAR 33.103. Send protests (other than protests to the contracting officer) to:

Headquarters U.S. Army Materiel Command

Office of Command Counsel
4400 Martin Road
Rm: A6SE040.001
Redstone Arsenal, AL 35898-5000

Fax: (256)450-8840

The AMC-level protest procedures are found at:
<http://www.amc.army.mil/pa/COMMANDCOUNSEL.asp>

If Internet access is not available, contact the contracting officer or HQ, AMC to obtain the AMC-Level Protest Procedures.

(End of provision)

CLAUSES INCORPORATED BY FULL TEXT

52.236-28 PREPARATION OF PROPOSALS--CONSTRUCTION (OCT 1997)

- (a) Proposals must be (1) submitted on the forms furnished by the Government or on copies of those forms, and (2) manually signed. The person signing a proposal must initial each erasure or change appearing on any proposal form.
- (b) The proposal form may require offerors to submit proposed prices for one or more items on various bases, including--
- (1) Lump sum price;
 - (2) Alternate prices;
 - (3) Units of construction; or
 - (4) Any combination of paragraphs (b)(1) through (b)(3) of this provision.
- (c) If the solicitation requires submission of a proposal on all items, failure to do so may result in the proposal being rejected without further consideration. If a proposal on all items is not required, offerors should insert the words "no proposal" in the space provided for any item on which no price is submitted.
- (d) Alternate proposals will not be considered unless this solicitation authorizes their submission.

(End of provision)

CLAUSES INCORPORATED BY FULL TEXT

52.252-1 SOLICITATION PROVISIONS INCORPORATED BY REFERENCE (FEB 1998)

This solicitation incorporates one or more solicitation provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. The offeror is cautioned that the listed provisions may include blocks that must be completed by the offeror and submitted with its quotation or offer. In lieu of submitting the full text of those provisions, the offeror may identify the provision by paragraph identifier and provide the appropriate information with its quotation or offer. Also, the full text of a solicitation provision may be accessed electronically at this/these address(es):

<http://www.acquisition.gov/far/>

<http://farsite.hill.af.mil>

(End of provision

SOW

STATEMENT OF WORK (SOW) **FUEL SYSTEM, JUANCHACO, VALLE**

1.0 SCOPE OF WORK: The Contractor shall provide drawings, materials, labor, and equipment needed to construct a 420 square meters (approximate) Fuel Storage System in Juanchaco, Valle, Colombia in accordance with this Statement of work (SOW), drawings, or other specifications. The scope of work includes:

- Localization and lay out the project at the project site.
- Excavation of footers, ground compaction.
- Concrete for footings, footing beams, aerial beams, columns, lintels, slabs, catch basin, and sidewalks.
- Provide and install fuel system with manifold.
- Provide and install two (2) fuel tanks 10.000 gallons each.
- Repair, and connect to main line one (1) existing 10.000 gallon fuel tank and one (1) existing 5.000 gallon fuel tank.
- Provide and install an electrical system with a distribution panel, lighting, register boxes, outlets, and ground.
- Provide and install masonry blocks for pump house and tanks area and fuel stations.
- Provide and install stucco, plaster, and paint on all walls.
- Provide and install fencing for all new and existing tank areas, and a security area for pump house.
- Provide and install metallic structure and roof materials in pump house and tank area.
- Provide and install pumps (electrobombas)” to pump fuel from tanks to fuel station or between tanks.
- Provide and install two (2) fuel pump stations to distribute A1 jet fuel by gun, include a “before and after” filtration system, and a backup system. .
- Provide a temporary road to tank area from the airfield which shall be used when the project is finished.

1.1 Required Performance Period: The Contractor shall be afforded 180 days from the date of award to complete all work. A final inspection by the Contracting Officer (KO) and Project Engineer (PE) will be conducted prior to acceptance of the project and final payment made.

2.0 PRELIMINARIES: The Contractor shall not initiate work until the following are complete:

- a. Contractor delivers the drawings, tests, material samples, etc. to the PE for approval.
- b. Contractor delivers a list of the complete names of personnel on site, with identification card numbers and place of issue to base security personnel for investigation and entry permits.

2.1 Drawings: All structural, architectural, fuel system and electrical drawings shall be provided to the Project Engineer (PE) for approval within 15 days of award. All drawings shall be developed by an engineer certified in that particular discipline, and comply with appropriate codes. Contractor shall demonstrate an expertise engineer to provide the Fuel System drawings and calculations with a minimum 3 years of experience and 3 similar projects.

2.1.1 Structural and Architecture Drawings: Comply with “Norma Sismo Resistente” (NSR) – 2010 code.

2.1.2 Fuel System Drawings: Contractor shall provide drawings which comply with all applicable national and international standards for Fuel Systems for Aviation, to provide conditions during construction and operations of the system in accordance with all regulations related. Contractor shall comply with Colombian Codes “Norma Tecnica Colombiana” (NTC) – 1899, NTC 1647, NTC 4642, NTC 4643, NTC 2450, NTC 2162, NTC 4517, “Decreto 283 de 1999” and “Decreto 353 de 1991”, American Petroleum Institute (API) – 1581, API 1542, API 1529, API 1583, API 1590, American National Standard Institute (ANSI) – B.31.3, American Society of Mechanical Engineers (ASME) section 8, National Fire Protection Association (NFPA) – 77 and NFPA 30, Military Specifications (MIL) C 4556 and MIL P 23236.

2.1.3 Electrical Drawings: Drawings and specification shall consider electrical consumption of the building plus an additional 30%. The Contractor shall verify that the value of the resistance is the required value of (<5 ohms). Contractor shall comply with NTC 2050.

2.2 Soil Study: Contractor shall provide a soil study for PE approval within 15 days of contract award.

2.3 Surveying and Layout: A field book shall be kept on the T-shaped rod sighting points and grade (niveletas) levels, while allowing for ground settlement. The contractor is responsible for surveying the terrain levels from the Bench Mark Survey (BMS), base lines, topographical points, perimeter limits, and other control elements necessary to identify the terrain localization and/or elevation.

2.4 Provisional Fencing and Camp: The Contractor shall install provisional fencing and a camp during project development. Upon project completion, debris shall be taken to an area indicated by local authorities.

2.5 Unforeseen Conditions: The Contractor shall conduct aerial, surface, underground or embedded interference search to avoid damage to pipes, boxes, cables, utility poles, hoses, wells or other elements in the work area. If a potential interference is found, the contractor shall discuss alternatives with the PE.

2.6 Superintendent Engineer Resume: The Government will consider the extent to which the proposed Superintendent Engineer/Architect has experience on projects equal to or greater than the work required for this project. The resume shall be provided to the PE for approval, before work may begin.

2.7 Safety Requirements: During construction the Contractor shall comply with Colombian laws and safety regulations, including Resolutions No. 3673 from 2008, and any other laws or resolutions that apply.

3.0 DETAILED ACTIVITIES:

3.1 Excavation: All vegetation and top soil shall be removed from site, compacting the exposed surface to at least 95% Proctor Standard (per NSR-2010 code), before beginning backfill. The Contractor shall also provide Proctor Standard results to PE for approval before starting backfill. This includes backfilling and leveling the ground according to the recommendations given in the soil study, and their reasonable proximity to the alignment and gradient shown in the plans or set by the PE. The Contractor shall remove excess materials, and debris to an area authorized by local authorities.

3.2 Concrete Structures: This is the fabrication, transportation, pouring, and respective reinforcement elements required IAW structural drawings. This item shall be quoted as per detailed chart.

- Concrete footing and foundation beams

- Concrete slabs sub floor for the pumps house, tanks area and fuel stations.
- Concrete columns, aerial beams, roof beams, lintels and confinement structure for walls.
- Sidewalks for the entrance of the pump house to connect to tanks area. Sidewalks shall be constructed and shall be at least 1,0 m wide and 10 cm thick.
- Concrete mix design shall comply with 3000 psi at 28 days strength -.

3.2.1 Concrete Forms: The PE shall approve the formworks and molds, steel reinforcement, rebar arrangement, overlaps, and all related details, seven (7) days prior to the actual pour date. The forms and supports shall have the necessary resistance and rigidity to support concrete, without localized settling over (0.001) mil of light. The supports shall be arranged to never stress the completed parts of the project at a level higher than one third (1/3) of the design stress. The joints in the forms shall not have slits bigger than 3 millimeters to avoid grout losses, but still have enough room to avoid boards (when using wood) from shrinking and deforming due to inclement weather.

3.2.2 Concrete Pour: All forms and molds shall be cleaned, and dampened with a non petroleum based stripper. Pours shall be in one continuous operation per section. All soft concrete shall be compacted, preferably with a vibrator to ease it around embedded installations. For initial installation of clean concrete, the Contractor shall ensure the poured concrete creates a clean area of thickness = 0.05m. The Contractor shall install the reinforcement for footing and concrete IAW the Contractor's drawings. The pour shall be protected from inclement weather and the exposed concrete surface kept constantly damp for the first seven (7) days.

3.2.3 Repairing Concrete Defects: All defects shall be repaired by cutting out the defective surface, cleaned with compressed air, and filled with epoxy based concrete or mortar. Contractor shall submit epoxy specifications for PE approval, before repairs can begin. Repairs shall not be made using common concrete or mortar.

3.2.4 Concrete Testing: The Contractor shall prepare and properly mark six (6) concrete test cylinders per nine (9) cubic yard batches or single mixture in strict accordance with Colombian Law 400 of 1997, and NSR-2010. The Contractor shall conduct the quality tests of concrete used. The contractor shall provide test copies for PE approval before concrete pour. The samples shall be tested in accordance with the C39/C39M-10 Norm of the ASTM (test of cylinders of concrete for compression).

3.2.5 Rebar and Ties: The rebar shall be bent with no variations greater than one centimeter. They shall be tied to the formwork with wire, concrete, or stone plugs; and among themselves with iron annealed No. 16 wire. Separation between parallel rebar shall have a minimum separation equal to the diameter 1 1/3 of the greater diameters of the coarse aggregate used. Their position shall be adjusted according to the indications in the drawings and instructions approved by PE. The correct arrangement shall be reviewed before the pour, and any modifications noted. No rebar shall be bent on the field. Rebar in a packet shall be tightly tied together forming a single unit. Packets with more than four (4) rebar are not permitted. It may be required that the framework functions below two-thirds (2/3) of its admissible tension either by overlap or welding. The overlap of rebar packets shall be based on the packet length required, increased by 20% for three (3) rebar packets and 33% for four (4) rebar packets. The centers of the ties shall be more than 40 diameters (40 D) throughout the length of the piece. When the use of mortise is permitted, the diameter shall not be smaller than the main reinforcement.

3.2.6 Embedding: For elements not exposed to the weather or ground, the minimum embedment shall be: slabs: 2 cm (0,8 in); beams and columns: 3 cm (1,2 in).

3.3 Concrete Masonry: The Contractor shall ensure that all walls be concrete masonry blocks. Walls shall be plumb, seating brick in mortar at a 1:4 ratio, forming joints not thicker than 1.5 cm. Blocks with strengths and dimensions specified by the Contractor's structural drawings shall comply with quality and standard dimensions.

3.4 Metallic Structure: This work includes all materials, equipment, tools, and labor necessary for the complete installation of the metallic roof structures. It includes supply installation and anchors to support all cover for lodging areas in metallic carpentry, as is shown in the schemes attached. The design of welded connections, electrodes, filler metal, labor, inspections, and tests shall follow standards determined by the latest American Welding Standards (AWS) and American Institute of Steel Construction (AISC) editions. Welding

samples, methods, and electrodes shall be approved by the PE, before installation may begin. If doubts arise about a weld sample, the PE shall order trepanation tests at no cost to the government. If deficiencies are found, then all welds shall be checked, and re-welded. The joint plates for columns shall be joined by welding each side of the plate, with a minimum length of ½ the length of the plate. Structural cross-sections shall be bent cold, and parts cut when indicated. Cuts shall be with fine nozzle oxyacetylene, but preferably with a saw for cross-sections.

3.5 Roof: The Contractor shall install a thermo acoustic roof tile tied to the metallic structure. The Contractor shall seal roof overhang using fascia or screens. The Contractor shall anchor the new roof frame structure to the bond beam rebar where required IAW the Contractor's drawings.

3.6 Perimeter fence: The Contractor shall install a perimeter fence to enclose the Fuel Tanks Area using linked mesh, fixed in frames in angle ¾" x ¾", supported in sewage pipe (A.N. 2").

3.6.1 Caps: All exposed ends of tubular posts shall be fitted with caps.

3.6.2 Wire ties and clips: Wire ties or clips shall be provided for attaching fabric to line posts, top rail, or tension wire.

3.6.3 Brace and tension bands: Brace bands shall be used to secure top rail and brace ends to terminal posts.

3.6.4 Tension bars: Tension bars for 1-3/4 and 2-inch mesh shall be no less than 3/16 by ¾-inch or equivalent cross-sectional area.

3.6.5 Tension wire: Tension wire shall be furnished when top rail is not required.

3.6.6 Steel tension wire: Steel tension wire shall be marcelled or crimped coil spring hard tempered carbon steel wire.

3.6.7 Truss rods: Truss rods shall be steel and have a minimum diameter of 5/16-inch.

3.6.8 Barbed wire: Unless otherwise specified, barbed wire shall consist of three 12-1/2-gage 0.099-inch twisted line wires with 14-gage 0.080-inch round barbs as listed in ASTM A121, Design Number 12-4-5-14R. Barbed wire shall be zinc-coated steel, Zn-5Al-MM coated steel, aluminum coated steel, or better. All barbs shall consist of four points and spacing of barbs shall be at 5-inch (+1-inch) centers.

3.6.9 Barbed wire support arms: Barbed wire support arms shall be of the following types as specified: (a) Single- arm, for three barbed wire strands, (b) V-arms, for six barbed wire strands, (c) A-arms, for five barbed wire strands. When installed, the barbed wire support arms shall project at an angle of 45 ± 5 degrees from the plane of the fence line and the outer strand of barbed wire shall be positioned 12 ± 2 - inches horizontally from the fence line. Intermediate strands of barbed wire shall be uniformly spaced between the strand on the end of the support arm and the fabric. All support arms shall be fitted with clips or slots for attaching the barbed wire to the support arm. Support arms shall be capable of withstanding a load of 250 pounds (lbs) when shall be tested.

3.6.10 Miscellaneous accessories: Unless otherwise specified miscellaneous items, such as bolts, nuts, and washers shall be galvanized steel or aluminum alloy.

3.6.11 Ground rods: Approved ground rod 15mm diameter 18.3m long, copper clad with approved ground clam (every 30.5 m along fence)

3.6.12 Plastic Coverage: along the whole extension of the fence shall be considered.

3.6.13 Gates: The Contractor shall provide one pedestrian gate and main gate. These gates shall be made of the same material as the perimeter fence.

3.7 Fuel Storage System: The Contractor shall install Fuel System in accordance with the drawings submitted, including two fuel tanks 10,000 gallons each, existing fuel tanks repaired and relocated, recover tanks 500 gallons each, fuel pipes and accessories, valves, filtration system for the inlet and for the two fuel stations, control valve explosion proof for electronic deadman, two electrical pumps and one fuel pump, meters for two stations and one for the pump house, two guns for fuel stations pressure type and two guns for fuel stations gravity type a portable laboratory kit for quality control, two hose reels for fuel stations electrical type with 30 meters length and two ground reel for fuel stations.

3.7.1 Catch Basin: The catch basin is a semi-below ground pit planned to catch and contain any fuel from the storage tanks and loading pad if a spill, leak, or rupture shall occur. Catch basin dimensions are based on 110 percent of the indicated tank's volume.

3.7.2 Basin Walls: Basin walls can be either concrete block or cast in place. Either type of wall shall be impervious to water, corrosives and, most importantly, the fuel in the tank.

3.7.3 Basin Pad: The catch basin floor shall also be impervious to water, corrosives, and the fuel in the tank. The pad extend shall be at least one foot farther than the walls on all sides. The floor thickness shall be calculated for the weight of the filled tank (bigger tank) and the number and configuration of the saddles. Basin pad shall be sloped to a lower point where there is a valve to drain if necessary.

3.7.4 Sump Pump System: Construct a sump pit at a convenient location along the outer perimeter of the catch basins, where it will not interfere with the tank saddles or general operation of the system. This sump pit shall be approximated 4 feet x 4 feet x 4 feet; this item shall be include and review in the drawings and a certified Engineer shall perform these drawings and specifications and shall be submitted for review. The sump pump shall be manually controlled. The pump shall cause a minimum of turbulence in the pit and be calculated to leave the bottom six inches of sludge and liquid in the pit and also the top six inches of liquid in the pit.

3.7.5 Electrical Components: All electrical components used within the system for the fuel pumps, sump pump, lights, or other electrical components must be water- and explosion proof.

3.7.6 Field Quality Control: Prior to engine generator testing, tanks and piping shall be tested in the presence of the Contractor Monitor as follows: Air test: Tank(s) and associated piping shall be pressurized with air to 5 psi for a minimum of 24 hours. The tank, fittings, and piping shall have no more than a 1 psi drop over a period of 24 hours. Air gauge shall be calibrated in ¼ psig increments. Temperature shall be constant during the air test.

Soap test: With Tank and associated piping pressurized at 5 psi, a 1 to 2 percent solution of household detergent in water shall be applied to exterior surface of tanks with sponge or other acceptable means. Leaks revealed by bubbling of soap film shall be marked and, after is depressurized, repaired and retested until there are no leaks.

3.7.7 Pump System: The Contractor shall provide and install pumps (electrobombas) for fuel system. The pump system base shall be a concrete pad to elevate the pump above the collection pad. This base shall prevent fuel from collecting. The pump bases should be located as close to the catch basin as possible. However, they shall not interfere with the flow of spilled fuel and water into the catch basin. The plumbing from the tanks to the pumps shall be petroleum resistant materials. All plumbing shall be visible so leaks may be observed. Automatic shut-off valves shall be installed between the fuel pumps and tanks in case of a mechanical accident or fire. The total capacity of the fuel system shall be 300 gallons per minute, using 75 gallons per minute per fuel station for two stations, that means that 150 gallons per minute shall be a backup discharge of the system for future expansion.

Note: Contractor must take into account the project is developed at the side of the sea, and everything shall be painted and treated to proof against environmental conditions in this site.

3.8 ELECTRICAL NETWORK: This includes the entire electrical wiring and lighting

3.8.1 Electrical System: The internal electrical construction shall be in accordance with the electric regulations in effect in Colombia, National Electric Code (NEC)/American National Standards Institute (ANSI)/Energy Information Administration (EIA)/Telecommunications Industry Association (TIA)/Techniques Electronics Electrical Equipment (TEEE)/National Fire Protection Association (NFPA), and allow for a 30% capacity above the maximum normal usage of all electrical systems simultaneously. All drawings and systems shall conform to International Electrotechnical Commission (IEC) 61024-1-2, NTC 4552, NTC 2050 and “Reglamento Técnico de Instalaciones Eléctricas” (RETIIE). The system shall contain grounding systems suitable for the grounding resistance required at the project site. All work shall be performed according to the best trade practices, using specialized personnel.

NOTE: Wiring shall fulfill the following requirements:

All energy cables shall be American Wire Gauge (AWG) and have isolation Thermoplastic Heat and Water Resistant Insulated Wire (TWH) of the caliber specified and calculated IAW the calculated electric bulging loads, subject to the following color code:

- Green: Earth.
- White: Neutral.
- Black: Not regulated.
- Yellow, red, blue: Regulated.
- This code shall flow from the electrical board of distribution to the final point of exit. Joints within the system are not allowed. They shall only be in the boxes.
- Protection elements shall be from a national and recognized manufacturer, all of the same brand preferred.
- All cable ends or joints shall have the appropriate terminals or spring-like connectors for the conductors.

All electric conductors to be installed in the layout conduit shall meet the following material and installation requirements: All metallic conduits installed underground shall be painted with asphalt based paint before being covered with concrete. All exposed conduits shall receive two (2) coats of anticorrosive paint, as well as supports, accessories, and register boxes. All metallic surfaces of electronic equipment with scratches shall be repainted similar to the original.

3.8.2 Electrical Facility Connection: The Contractor shall ensure that underground electrical facility connections are of Polyvinyl Chloride (PVC) pipe and include a distribution switchboard and other elements in approved drawing. The main electrical feed and entire distribution system shall comply with Colombian Electrical Code (NTC-2050).

3.8.3 Internal Electrical Installations: The Contractor shall ensure that all electrical networks are in accordance with NTC-2050. Cable shall be Thermoplastic Heat and Water Resistant Nylon Coated (THWN). The Contractor shall provide calculation records showing actual load and estimated reserve charge with cable caliber for PE approval before contract acceptance. All outlets shall be grounded, and ensure they meet the needs of the project. The installation of all electrical system conduits and cabling system wires shall be of Explosion Proof.

3.8.4 Grounded system: The Contractor shall ensure that grounding is executed in accordance with approved drawings.

3.8.5 Lighting: The Contractor shall ensure all areas provide a minimum of 400 luxes. Lighting levels shall be verified at least 1 hour after dark. Switches shall be explosion proof and located at the right hand of each door. Lights and accessories shall be explosion proof and firmly attached to the surfaces of the building with the correct suspension system.

3.8.6 Electrical Outlets: The Contractor shall deliver and install the electrical outlets to include a minimum of four (4) double electrical outlets explosion proof in pump house and two (2) three-phase explosion proof outlet in pump house. Non-regulated power circuit shall be installed with ground connection, observing the following conditions:

- Each circuit shall be conformed to support a maximum of five (5) double power outlets
- Each double power outlet shall be fully identified
- The inlet and outlet of circuits shall have on the end pressure connector or non-welded terminal
- In each inlet only one cable shall be installed
- Double power outlets shall be isolated polo hospital type in white color
- Where required by code, the outlets installed shall be ground faulted interrupters (GFI).

4.0 FINISHING:

4.1 Finish concrete floor: The Contractor shall finish concrete smooth in pump house area with appropriate equipment and tool.

4.2 Stucco: Stucco shall have a 1:3 mix ratio and a minimum thickness of 1.5 cm. Within the interior of catch basin, the Contractor shall apply waterproofed stucco in all wall and in the pump house shall apply waterproof stucco in all wall areas up to a height of 0.3m and non-waterproof stucco for the rest of the walls. The Contractor shall install non-waterproof stucco on the exterior walls of the facilities throughout.

4.3 Exterior and Interior Painting: The Contractor shall paint all walls with “Koraza” (or similar).

4.4 Windows: The Contractor shall provide and install cold rolled 18 gauge laminate windows, coated with a minimum of 3 mils of anticorrosive paint. This includes installation, finishing, accessories, metallic mesh and lintel (alfajia). Between each coat, the surface shall be lightly sanded with a fine sandpaper No.6/0, 200 or finer.

4.5 Doors: The Contractor shall provide and install doorframes to include supply, transport, installation, all finishing accessories, and lintel. The Contractor shall install cold rolled laminate caliber 18 doorframes and doors in metallic painted with two coats of anticorrosive and enamel paints at a minimum of 3 mils thick. Between each coat, the surface shall be lightly sanded with a fine sandpaper No.6/0, 200 or finer.

5.0 SPECIFICATION OF THE MATERIALS: The Contractor shall be responsible for the development of a material list for PE review. The Contractor shall provide a draft list for review no later than 3 business days after Government approval of the Contractor’s drawings. Upon approval of the material list by Government, the contractor shall provide sample materials as identified in the approved material list.

5.1 Cement: The Contractor shall ensure that the cement used in the cement mixtures shall be Type 1 Portland cement (normal) and meet all American Society for Testing Materials (ASTM) C150/C150M-09. If the project site has high sulfate content, Type V Portland cement shall be used. The Contractor shall provide additive specifications to PE for approval before installation.

5.2 Concrete: The Contractor shall ensure that all recommendations of the American Concrete Institute (ACI) Committee Report 301M-99 (Specifications for Structural Concrete for Buildings) or equivalent Colombian specification (NSR-10) shall be followed. All other concrete operations shall follow the Building Code Requirements for Reinforced Concrete ACI 318M-08. All the standards of the ASTM are mandatory. The specified compression resistance shall be measured at the rupture in cylinders measuring 15cm x 30 cm (6 in x 12 in), after 28 days, according to the ASTM C39/C39M-10 standards. All concrete shall have an overlap no greater than three (3) inches. Concrete used for the foundation formworks, columns, retaining walls, joints tied to the foundation, load and tie joints and remaining structural elements, shall have a compression resistance of 210 Kg/centimeter² (3000 lb/square inch). The resistance to fluid concrete for the filling of the reinforced masonry blocks shall guarantee a minimum of 140 Kg/centimeter² (2000 lb/square inch).

5.3 Aggregates: The Contractor shall ensure that aggregates be classified by size, and stored to avoid foreign matter. They shall follow ASTM C33/C33M-11. Sand shall contain deleterious substance in excess of the following percentages: Clay clods - 1%, Pit Coal and Lignite - 1%, Material passing #200 Screen - 3%. The size of the crushed stone shall not be larger than 1/5 of the greatest separation from the sides of the formwork; 1/3 of the slab, or 3/4 of the free space between individual rebar or rebar ties. It shall meet the ASTM C33 standards, with its maximum dimension in accordance with Section 33 of the ACI 318M – 08 Regulation.

5.4 Reinforced Steel: The Contractor shall provide rebar with patterns to assist adhesion. All steel shall be new billet steel conforming to ASTM A615/A615M-09b Grade 60. Rebar grade shall be 60 (420 for metric). Minimum yield strength shall be 420 MPa (60,000 psi). All dirt and non-adhered advanced state oxidation shall be removed. The rebar for the work of setting bolts and tie anchors shall be corrugated and comply with the specifications for steel bars and smooth ingots to reinforce concrete, including complementary requirements ASTM A615/A615M-09b or NSR-2010.

5.5 Metallic Structure Materials: The Contractor shall ensure that the steel meets ASTM A36/A36M – 08, ASTM C500/C500M-10a and ASTM C501-07 specifications for welding structural steel, according to ASTM A755 / A755M - 03(2008). All steel shall be hot galvanized. All metal scratches and welding burrs shall be removed, and surfaces dry before anticorrosive paint is applied. The Contractor shall provide patterns for placement, anchor and bolt examples, and all steel elements to be embedded in the concrete, for PE approval 8 days before installation.

5.6 Welding: The Contractor shall ensure that electrodes be class E60 x AWS for structural steel and class E70 x AWS for rebar with a stress flow of 2,800 Kg/square cm (40 ksi). All structural steel elements shall be joined with the electric arc process using E 60 xx electrodes that comply with the ASTM-233 specifications. For rebar welding if required, welded ties shall conform to American Welding Society (AWS) D 1.4/D 1.4M standards, and develop at least 125% of the flow resistance specified.

5.7 Laminated Structural Steel: The Contractor shall ensure that all structural steel, be new and comply with “Design Specifications, Fabrication and Erection for Structural Steel Buildings” of the American Institute of Steel Construction (AISC) or NSR-2010 and shall be type ASTM A36/A36M-08 as certified by a laboratory, with stress in the flow limit of 2,531 Kg/square cm (36,000 lbs/square inches). Structural cross-sections shall be bent cold, and parts cut when indicated. Cuts shall be with fine nozzle oxyacetylene, but preferably with a saw for cross-sections.

5.8 Masonry Unit Blocks: The Contractor shall ensure conventional concrete masonry blocks. All ICONTEC “Instituto Nacional de Normas Tecnicas Colombianas” norms shall govern. The compression resistance shall be $f_m = 95 \text{ Kg/cm}^2$ (1,350 ksi). The Unit Blocks shall be suitable for load bearing applications, and free of defects. Minor cracks from manufacturer or minor chipping from handling are not grounds for rejection. Five percent with chips less than 25.4 mm (1 in) in any dimension, or cracks not wider than 0.5 mm (0.02 in) but not longer than 25% of the nominal height of the unit are permitted. A sample of the block shall be provided for PE approval a minimum of eight (8) working days prior to installation.

5.9 Electrical Materials: The Contractor shall ensure that all materials be new and from accredited companies. All work shall be performed according to the best trade practices, using specialized personnel. All defective or damaged materials and equipment shall be replaced at no cost to the government. The manufacturer data for the panels and sub-panels, conductors, layout conduit and accessories, light switches, wall sockets, controls, inside and outside lights, transformers, and medium frequency structural elements shall be given to the PE for approval, before installation.

5.9.1 Distribution Panel: The Contractor shall ensure that the distribution panel be supplied and installed according to a panel program. The panel shall be explosion proof. The panel shall be rebar and terminal for neutral, and a ground rebar. The circuit breakers shall be connected to the rebar, and the load balanced. The panel shall be embedded correctly and only accessible through the front. The circuit protection devices shall be thermo-magnetic for 60 cycles at capacities indicated in the plans, but never lower than 10,000 amps in a short

circuit. All boards shall include signs to identify each circuit or feeder. Outlets for 220 volts shall also include separate identification. The end-user shall be given two (2) sets of instructions.

5.9.2 Bare Continuity Conductor: The Contractor shall ensure that all ducts, conduits, or metal cable trays have a bare continuity lead (directly connected to the grounding barrage of the power circuit panel) in a gauge that complies with Colombian electrical standards.

5.9.3 Layout Conduit: The Contractor shall ensure that all electric conductors meet the following material and installation requirements: All metallic conduits installed underground shall be painted with asphalt based paint before being covered with concrete. All exposed conduits shall receive two (2) coats of anticorrosive paint, as well as supports, accessories, and register boxes. All metallic surfaces of electronic equipment with scratches shall be repainted similar to the original.

5.9.4 Register Boxes: The Contractor shall ensure that the boxes be the appropriate size and type to hold the amount of conductors in accordance with Colombian regulations. Unnecessary perforations of the boxes and accessories, shall be filled. Circular outlet boxes are not allowed. All boxes and accessories shall be galvanized steel, and be octagonal, square, or rectangular. All boxes exposed to the weather, shall be weather resistant. Outlet boxes for lighting units shall be installed on the surface, and be 4' x 4' octagonal or square. Lights embedded in concrete or masonry shall be level, and the unit boxes installed during laying operations. When the unit box allows, a metal flexible unit may be installed.

5.9.5 Conductors: The Contractor shall ensure that the conductors be made of copper with thermoplastic insulation, type Thermoplastic High Heat Nylon (THHN) jacket unless otherwise specified. The insulation shall be for 600 volts service. All wires shall be AWG No. 12 gauge unless specifications indicate otherwise. Gauges lower than No. 12 are only authorized for signals or controls. Conductors of gauges 10 or less shall be flexible. All gauges shall meet the American Wire Gauge system. For identification, the same colors shall be used in the different phases and a uniform color throughout the building, according to the National Electric Code. Conductors in only one color shall be covered with colored tape. No wire joints are authorized. The lines shall be continuous from box to box. In the outlet or register boxes, the connections shall be No. 8 or smaller, and manufactured by a PE approved company. At least 20 cm of the wire shall be left for light connections and other devices.

5.9.6 Light Switches: The Contractor shall provide all light switches to the PE for approval before installation. All shall be installed with "on" in the up position. Light switches shall never interrupt the neutral conductor, or be connected to a hot line. Light switches shall be installed at a height of 1.20 m above the finished floor. Light switches shall be one (1) pole or two (2) poles and moved two ways, for 15 amps, 120 volts, AC, lever operation, National Electrical Manufacturers Association (NEMA) standard, Specification Grade, silent type.

5.9.7 Lights: The Contractor shall ensure that lights and accessories are firmly attached to the building surfaces with the correct suspension system. Embedded lights shall be flush so that light is not filtered through the slab and the molding. Fluorescent lights shall be equipped with a reactor ballast for a high power factor (cos Ø: 0.9) approved for service at the indicated voltage. Cool white lamps shall be used. The lighting shall be wraparound, fluorescent T8 2x32W, and against dust, moisture and humidity. Ballasts with two (2) tubes are preferred whenever expedient and have protection. All lamps used in construction shall be replaced with new lamps, before final contract acceptance.

5.10 Paint: The Contractor shall ensure that the paint manufacturers be national industries of high quality. Materials and paint brands shall be submitted for PE approval, before paint is applied. All paint shall be delivered in its original unopened packaging with labels intact. Paints shall be kept protected against fire, and damage. The Contractor shall provide samples of wall colors, for PE approval, before paint may be applied.

5.11 Fuel System: All the systems shall be installed and approved according to the American Society of Mechanical Engineers (ASME), requirements of the American Petroleum Institute of the USA (API), American

Standard and Testing Materials (ASTM A105 and A53), and Unified Facilities Criteria (UFC 3-460-01) for Fuel Facilities and ICONTEC. Material quality, processes, finishes, and accessories shall meet or exceed the guidelines of the American Society for Testing and Materials (ASTM) of the USA shall be used as the basis for the minimum acceptable requirements of the work.

5.11.1 Fuel Storage System: The Contractor shall provide and install two (2) fuel storage tank for JET A1 10.000 Gallons and, repair and move 2 existing tanks 10.000 Gallons and 5.000 Gallons for the Grupo Aeronaval del Pacífico, Juanchaco. Contractor shall include fuel sample points upstream and downstream of the tanks.

5.11.2. Storage Tanks: The tanks shall be installed in an east-west orientation if possible. The tanks area shall include a platform with handrails. Tanks shall be painted a reflective color, preferably white. A low-pressure valve shall also be installed on top of the tank to reduce the amount condensation. In accordance with National Fire Protection Association Standards, all above-ground tanks for the storage of fuel shall be marked with the name of the fuel they contain and "FLAMMABLE --KEEP FIRE AND FLAME AWAY", and "NO SMOKING" signs. The words shall be at least six inches in height and be in a bright red color. Class B fire extinguishers shall be mounted in convenient locations. Steel saddles shall be used to elevate the tank above the ground to prevent corrosion and to aid in leak detection. A minimum of three (3) saddles with large bases are recommended on larger tanks. A moisture-resistant material, such as a roofing material, shall be placed between the saddle and the tank to allow for expansion and contraction. The steel tank shall be manufactured in accordance with UL 142. Tank shall be capable of storing petroleum products with specific gravity up to 1.1 for fuel oils such as No2 diesel fuel at temperatures up to 150 degrees F. Provide usable fuel tank volume of 90 percent. Allow 5 percent for sump volume and 5 percent for expansion. Provide stop cock and plug at tank drain, and an isolation valve on tank discharge with provisions to be padlocked open. Comply with recommended practices of the Appendix of NFPA Provide an (external vertical ladder, ships ladder and platform, OSHA stairs and platform) to allow access to top of tank for filling and maintenance that complies with applicable OSHA standards and building codes.

5.11.3 Venting Requirements: Provide one (1) normal atmospheric or pressure/vacuum vent for the tank(s). Vents shall discharge upward or laterally, and be protected from intrusion of rain [and incorporate a flame arrestor. Vents for tanks containing Class 1 liquids shall terminate at least 12 feet above ground level and be located at least five feet from building openings. Vent installation shall comply with applicable sections of the fire and mechanical codes, including, but not limited to, NFPA 30A (2-4.5.e) or NFPA 30 (2-3.5). Provide one (1) emergency vent for each tank. Vent size shall be determined by the tank configuration, the tank capacity, and the product stored. Emergency venting shall comply with provisions of NFPA 30A or NFPA 30.

5.11.4 Piping and valves: The Contractor shall provide and install all piping and valves for fuel storage system, this piping and valves shall be including in the drawings and specifications and shall be submitted for review. All piping shall be ASTM A105 and ASTM A 53, schedule 40 black steel pipe. All underground piping shall be encased in a continuous schedule 40 PVC sleeve with terminations calculated to prevent the intrusion of water. Fittings and Valves: All fittings shall be ANSI B16.3, 300-pound banded malleable iron, threaded. Connections between dissimilar pipe materials shall be isolated with insulating flanges, unions or gaskets as necessary. Fuel shutoff valves at the tank(s) shall be ball valves. Valves shall be brass or bronze bodied, stainless steel shaft, chrome plated or stainless steel ball with Teflon seat. Valves shall be rated at 150 psi WOG. Check valves shall be swing type, 150 psig rated, threaded, brass or bronze bodied, with removable stainless steel hinge pin and screwed cap. Pressure relief valves shall be 150 psig rated, threaded, brass or bronze bodied, and be adjustable from 20 to 100 psi. Anti-siphon valve(s): PVMC Type A, Universal 403, EBW 616-300 or equal. Provision for tanks grounding shall be provided. Contractor shall install a control valve explosion proof and electronic deadman complying ANSI 150, RF, WCB.

5.11.5 Pumps and Meters: These pumps shall be including in the drawings and a certified Engineer shall perform these drawings and specifications and shall be submitted for review. Pumps shall be ASME B-73.1, 150 gallons per minute with explosion proof motor. The system shall include an emergency stop. Provide 120 V, single phase, TEFC Motor driven, positive displacement gear pumps. Pumps shall be suitable for exterior service. Pumps shall be rated at 150 psig, cast iron with bronze bearings, mechanical seals and built in relief valve. Pumps and appurtenances shall be mounted in 304 stainless steel enclosures with adequate room to access and maintain the

pumps and equipment. The pump shall be labeled specifying the material inside. **Meters:** Meters shall dispense at least 150 gallons per minute without printer.

5.11.6 Filters: Contractor shall provide a “before and after” fuel filtering system.

INSTRUCTIONS TO OFFERORS

1. GENERAL. This procurement will be awarded as a Lowest Price, Technically Acceptable (LPTA) contract, considering past performance. The Government intends to evaluate the offers and award a single contract without discussions. Therefore, the initial offer should contain the Offeror’s best terms from a price and technical standpoint. Do not assume you will be afforded the opportunity to clarify, discuss, or revise your response. However, the Government reserves the right to make clarification or request revised responses if later determined by the Contracting Officer to be necessary. The government may reject any or all responses if such actions are in the public interest and/or waive informalities and minor irregularities in the submitted offers. The Government reserves the right to cancel this Request for Proposal (RFP) and make no award. By responding to this RFP and submitting a proposal in response to the RFP, the Contractor understands that the Government shall not be liable for any costs incurred by the Contractor in response to this RFP.

2. PROPOSAL DELIVERY: All responses shall be in English (or include an English translation), legible and prepared in the following general format to be properly evaluated. Responses must be complete, self-sufficient, and respond directly to the requirements of this RFP.

a. Electronic Submission. The Offeror shall provide a copy on their proposal as an electronic file. The proposal shall be e-mailed to Michael Haydo, Contracting Specialist at Michael.haydo@tcsc.southcom.mil **before 1000 hours Eastern Standard Time (EST) on 22 September, 2011.**

b. Solicitation Questions. Questions regarding this solicitation shall be submitted in writing to the Contracting Specialist by email at Michael.haydo@tcsc.southcom.mil. The Government will answer all questions provided that those questions are received **by 2400 hours EST on 14 September, 2011.** The Government reserves the right not to respond to any questions received concerning this solicitation after the question receipt date and time above. Accordingly, Offeror’s are encouraged to carefully review all solicitation requirements and submit questions to the Government early in the proposal cycle.

c. Amendments prior to date set for receipt of proposals. The right is reserved, as the interest of the Government may require, to revise or amend, the specifications or drawings or both prior to and/or after the date set for receipt of proposals as necessary. Such amendments, if any, will be announced by an amendment or amendments to this RFP.

d. Exceptions. If the Offeror takes exception to any of the requirements specified in this solicitation, the Offeror shall clearly identify each such exception and include a complete explanation of why the exception was taken and what benefit accrues to the Government. All exceptions to the solicitation requirements (Sections 00010 through 00800) and supporting rationale shall be included in an addendum to the proposal and clearly labeled "Exceptions". An addendum is only required if the Offeror takes exception to any requirement in the solicitation. (The Addendum does not have a page limitation, but shall only include information relevant to exceptions taken to the solicitation requirements.) The Government will assume an Offeror takes no exceptions to any solicitation requirement if the Offeror does not submit an Addendum identifying exceptions. Offeror’s are advised that solicitation requirements are not necessarily negotiable and such exceptions may render an Offeror’s proposal unacceptable and ineligible for award.

3. QUALIFICATION OF OFFEROR: Offeror’s must be technically qualified and financially responsible to perform the work described in this solicitation. At a minimum, each Offeror must meet the following requirements:

- a. Have an established business with a permanent address and telephone listing.
- b. Be able to demonstrate prior relevant experience with suitable references.
- c. Have the necessary personnel, equipment and financial resources available to perform the work.
- d. Have all licenses, insurances, and permits required by local law.
- e. Have no adverse criminal record.
- f. Have no political or business affiliation which could be considered contrary to the interests of the United States.

4. SUMMARY OF INSTRUCTIONS.

Section	Title
00010	Executed Standard Form 1442
00010	Priced Line Items 0001 through 0005, Pages 3 through 5 of RFP
00100	Attachment – Breakdown of Price Proposal
00100	Technical/Past Performance/Price Proposal
00600	Completed Representations/Certifications

Any deviations, exceptions, or conditional assumptions taken with respect to any of the instructions or requirements of this solicitation shall be identified and explained/justified in the offer.

5. PROPOSAL CONTENTS: Each Offeror's proposal shall be submitted as set forth below and all information shall be confined to the appropriate part to facilitate independent evaluation. Proposals, which do not include the requested minimum information, may be eliminated from further consideration at the government's discretion. Proposal Sections shall be labeled by section (i.e., Section I - Price, Section II-Technical and Section III-Past Performance).

Section I - Price/Cost Information and required documents

Offeror's shall provide all price/cost information necessary to provide a meaningful basis for Government's analysis and evaluation of price/cost for the project set forth in Section 00100 of this solicitation. The Government is not, and does not intend to request certified cost or pricing data. Offeror's may be required during the evaluation process to provide sufficient price/cost information that will enable the Government to perform a meaningful evaluation. If an Offeror proposes an unusually low price, the Offeror should also provide rationale to justify the price.

A complete response shall consist of a price response, and a cover sheet. The Offeror shall provide its response with a cover sheet that contains the company's name, address and telephone number, name and title of the person authorized to sign and negotiate the contract and appropriate dollar threshold, offer validation period of 60 days.

To be considered responsible, an Offeror must be in compliance with FAR 9.104(1)a. To demonstrate this aspect of Responsibility, Offeror's shall provide a bank reference from its bank with information of the Offeror's financial standing (i.e., satisfactory accounts, outstanding loans, and line of credit.).

Offer and Section 00010 – Complete in its entirety the "Offeror" portion of the Standard Form (SF) 1442 contract line items pages 3 through 5. An official having the authority to contractually bind your company must sign the SF 1442 in accordance with FAR 4.102. One copy of the SF 1442 is required to have an original signature.

Section 00010 –The Offeror shall insert its price/cost from its price breakdown sheet with the project in the SF 1442 contract line items. The Offeror shall submit with its proposal the completed SF 1442 pricing schedule; otherwise, the Offeror's proposal shall be considered nonresponsive.

Section 00600 - Representations and Certifications- Insert the required certifications and representations and return only those shown in section 00600.

Standard Form 1442 (Complete blocks 14 through 20C); Price all Line Items; Attachment "Breakdown of Proposal Price" - Complete all applicable portions of this form in each relevant category (such as., labor, materials, etc.); and all of Section 00600.

Amendments – Acknowledge by signing any amendments issued out during this solicitation. Amendments may also be acknowledged in block 19 of the SF 1442.

Section II - Technical Response: Limit to ten (10) double sided pages or less, at a #10 font.

- a. Description of materials to assure that the Offeror understands the requirement.
- b. Project Schedule: Project schedule shall be submitted using any of the following project schedules: Critical Path Method (CPM), Program Evaluation & Review Technique (PERT), or Gantt Chart. The project schedule will be in sufficient detail to clearly illustrate the major construction phases (i.e. site prep, cut/fill, utilities, footers, walls, electrical, etc.), expected completion dates, execution times of each phase. Sufficient float time shall be incorporated in the schedule to account for down days due to inclement weather.

Section III - Past Performance Information: Limit to three (3) or less double sided pages to include pictures.

Provide any information currently available (letters, customer surveys) which demonstrate customer satisfaction with overall job performance and quality of completed services for three (3) relevant contracts of same or similar type completed within the past three years. Past Performance information must be submitted in English.

Explain corrective actions taken in past, if any, for substandard performance and any current performance problems such as cost overruns, extended performance periods, customer complaints, or personnel problems/issues.

References. In addition to past performance information above, provide a list of three relevant contracts that clearly demonstrate prior experience in construction projects, that were;

- a. Physically completed within the past three years.
- b. Similar in magnitude to (US\$ amount).
- c. Similar in construction features.

Provide the following information for each contact or project and describe:

Customer's name, address, and telephone numbers of customer's lead contract and technical personnel;

- a. Contract value, number and type;
- b. Date of the contract award place(s) of performance, and completion dates;
- c. Brief description of the work, including responsibilities;
- d. Comparability to the work under this solicitation;
- e. Brief discussion of any major technical problems and their resolution;
- f. Method of acquisition (fully competitive, partially competitive, or noncompetitive), and the basis for award (cost/price, technical merit, etc.); and
- g. Any terminations (partial or complete) and the reason (convenience or default).

If more than three (3) projects are submitted, only the three (3) most recent will be evaluated. The projects may be contracts for the U.S. Government or other clients.

BASIS OF AWARD

A. BASIS OF AWARD. The award will be evaluated on a Lowest Priced, Technically Acceptable (LPTA) basis, considering past performance. Subject to the provisions contained herein, the Government intends to award a single contract resulting from the solicitation, to the Offeror whose response conforms to the Statement of Work and is technically acceptable, and provides the lowest total price for the actual contract line items awarded.

B. FACTORS. The technical portion consists of two (2) criteria elements. Technical Acceptability will include a review of each element of the Technical Proposal. Each Offeror's response will be evaluated and rated on each criteria element. Those ratings will then be rolled into one overall factor rating. Any criteria element(s) rated as "unacceptable" will result in an overall factor rating of "unacceptable".

1. FACTOR 1 - Technical criteria elements consist of the following:

a. The Government will evaluate the proposed description of materials and products to ensure the Contractor understands project requirements.

b. **Project Schedule:** The Government will evaluate the project schedule in the form of a Critical Path Method (CPM), Program Evaluation & Review Technique (PERT), or Gantt Chart. The project schedule will be in sufficient detail to clearly illustrate the major construction phases (i.e. site prep, cut/fill, underground utilities, footers, slab, walls, electrical, etc.), expected completion dates, execution times of each phase. The Government will evaluate the sequence of work to ensure that performance will be completed on time in accordance with the contract period of performance and that the contractor has demonstrated a clear understanding of the project.

2. FACTOR 2 - Past Performance: The Government will evaluate the Construction projects or contracts submitted in order to evaluate both past performance and experience. Past performance relates to how well a contractor has performed. Experience pertains to the types of work and volume of work previously or currently being performed by the contractor that are comparable to the types of work envisioned by this requirement in terms of size, scope and complexity. The Government may contact references to verify experience and past performance. In conducting the Past Performance evaluation, the Government reserves the right to use both the information provided in the offeror's Past Performance submittal and information obtained from other sources, such as the Past Performance Information Retrieval System (PPIRS) or similar systems, Defense Contract Management Agency (DCMA) and commercial sources. If the Government is aware of contracts that meet the requirements of this solicitation but have not been included in the 3 contracts submitted, it may evaluate those contracts in addition to those submitted. In the event an Offeror has no relevant past experience, Offeror's may submit past performance information for key personnel proposed.

3. FACTOR 3 – COST/PRICE: Price analysis will be performed to make a fair and reasonableness determination. Supporting documentation shall be included in the Cost/Price submission and breakdown of the costs.

C. EVALUATION APPROACH: The evaluation process consists of two parts; 1) Technical evaluation and 2) Past Performance evaluation; Price will be evaluated separately from Technical and Past Performance evaluations.

1. All Factors/Sub-factors will be evaluated based on how well the proposal addresses an Offeror's processes, methodologies, approaches, and concepts to fulfill the solicitation requirements. Based upon an Offeror's evaluated strengths, weaknesses, and deficiencies, the Government will assign a Technical Merit Adjectival Rating and a Past Performance Risk Rating (defined under Proposal Rating Scheme in paragraph D and E below) to each Factor and criteria element. The Technical Merit Adjectival Rating focuses on how well the proposed approach would meet solicitation requirements. The Past Performance Risk assessment rating focuses on

the risks and weaknesses associated with an Offeror's proposed approach and includes an assessment of the potential disruption of schedule, increased cost, degradation of performance, and the need for increased Government oversight.

2. All proposals shall be subject to evaluation by a team of technical evaluators. Each evaluator will independently evaluate each proposal. Thereafter, the results of the independent evaluations are merged into a final evaluation report. The evaluation report must represent a consensus of opinion of the members and be signed by each member.

D. TECHNICAL MERIT ADJECTIVAL RATING SCHEME: The following is the Technical Merit Adjectival Rating Scheme for evaluation of Technical Proposal:

ACCEPTABLE – Proposal clearly meets the minimum requirements of the solicitation.

UNACCEPTABLE – Proposal does not clearly meet the minimum requirements of the solicitation.

E. PAST PERFORMANCE ADJECTIVAL RATING SCHEME: In the evaluation of Past Performance, the evaluators will use the following adjectives and related definitions to define the past performance risk the contractor poses.

ACCEPTABLE – Based on the offeror's performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort, or the offeror's performance record is unknown (See Note Below).

UNACCEPTABLE – Based on the offeror's performance record, the Government has no reasonable expectation that the offeror will be able to successfully perform the required effort.

Note: In the case of an offeror without a record of relevant past performance or for whom information on past performance is not available or so sparse that no meaningful past performance rating can be reasonably assigned, the offeror may not be evaluated favorably or unfavorably on past performance (see FAR 15.305 (a)(2)(iv)). Therefore, the offeror shall be determined to have unknown past performance. In the context of acceptability/unacceptability, "unknown" shall be considered "acceptable."

Section 00600 - Representations & Certifications

CLAUSES INCORPORATED BY FULL TEXT

52.203-11 CERTIFICATION AND DISCLOSURE REGARDING PAYMENTS TO INFLUENCE CERTAIN FEDERAL TRANSACTIONS (SEP 2007)

(a) Definitions. As used in this provision-- "Lobbying contact" has the meaning provided at 2 U.S.C. 1602(8). The terms "agency," "influencing or attempting to influence," "officer or employee of an agency," "person," "reasonable compensation," and "regularly employed" are defined in the FAR clause of this solicitation entitled "Limitation on Payments to Influence Certain Federal Transactions" (52.203-12).

(b) Prohibition. The prohibition and exceptions contained in the FAR clause of this solicitation entitled "Limitation on Payments to Influence Certain Federal Transactions" (52.203-12) are hereby incorporated by reference in this provision.

(c) Certification. The offeror, by signing its offer, hereby certifies to the best of its knowledge and belief that no Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress on its behalf in connection with the awarding of this contract.

(d) Disclosure. If any registrants under the Lobbying Disclosure Act of 1995 have made a lobbying contact on behalf of the offeror with respect to this contract, the offeror shall complete and submit, with its offer, OMB Standard Form LLL, Disclosure of Lobbying Activities, to provide the name of the registrants. The offeror need not report regularly employed officers or employees of the offeror to whom payments of reasonable compensation were made.

(e) Penalty. Submission of this certification and disclosure is a prerequisite for making or entering into this contract imposed by 31 U.S.C. 1352. Any person who makes an expenditure prohibited under this provision or who fails to file or amend the disclosure required to be filed or amended by this provision, shall be subject to a civil penalty of not less than \$10,000, and not more than \$100,000, for each such failure.

52.204-3 TAXPAYER IDENTIFICATION (OCT 1998)

(a) Definitions.

Common parent, as used in this provision, means that corporate entity that owns or controls an affiliated group of corporations that files its Federal income tax returns on a consolidated basis, and of which the offeror is a member.

Taxpayer Identification Number (TIN), as used in this provision, means the number required by the Internal Revenue Service (IRS) to be used by the offeror in reporting income tax and other returns. The TIN may be either a Social Security Number or an Employer Identification Number.

(b) All offerors must submit the information required in paragraphs (d) through (f) of this provision to comply with debt collection requirements of 31 U.S.C. 7701(c) and 3325(d), reporting requirements of 26 U.S.C. 6041, 6041A, and 6050M, and implementing regulations issued by the IRS. If the resulting contract is subject to the payment

reporting requirements described in Federal Acquisition Regulation (FAR) 4.904, the failure or refusal by the offeror to furnish the information may result in a 31 percent reduction of payments otherwise due under the contract.

(c) The TIN may be used by the Government to collect and report on any delinquent amounts arising out of the offeror's relationship with the Government (31 U.S.C. 7701(c)(3)). If the resulting contract is subject to the payment reporting requirements described in FAR 4.904, the TIN provided hereunder may be matched with IRS records to verify the accuracy of the offeror's TIN.

(d) Taxpayer Identification Number (TIN).

___ TIN:.....

___ TIN has been applied for.

___ TIN is not required because:

___ Offeror is a nonresident alien, foreign corporation, or foreign partnership that does not have income effectively connected with the conduct of a trade or business in the United States and does not have an office or place of business or a fiscal paying agent in the United States;

___ Offeror is an agency or instrumentality of a foreign government;

___ Offeror is an agency or instrumentality of the Federal Government.

(e) Type of organization.

___ Sole proprietorship;

___ Partnership;

___ Corporate entity (not tax-exempt);

___ Corporate entity (tax-exempt);

___ Government entity (Federal, State, or local);

___ Foreign government;

___ International organization per 26 CFR 1.6049-4;

___ Other.....

(f) Common parent.

___ Offeror is not owned or controlled by a common parent as defined in paragraph (a) of this provision.

___ Name and TIN of common parent:

Name.....

TIN.....

(End of provision)

52.209-5 CERTIFICATION REGARDING RESPONSIBILITY MATTERS (APR 2010)

(a)(1) The Offeror certifies, to the best of its knowledge and belief, that-

(i) The Offeror and/or any of its Principals-

(A) Are () are not () presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(B) Have () have not (), within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) contract or subcontract; violation of Federal or State antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property (if offeror checks "have", the offeror shall also see 52.209-7, if included in this solicitation); and

(C) Are () are not () presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph (a)(1)(i)(B) of this provision.; and

(D) Have [ballot], have not [ballot], within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(1) Federal taxes are considered delinquent if both of the following criteria apply:

(i) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(ii) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(2) Examples. (i) The taxpayer has received a statutory notice of deficiency, under I.R.C. Sec. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(ii) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. Sec. 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(iii) The taxpayer has entered into an installment agreement pursuant to I.R.C. Sec. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(iv) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(ii) The Offeror has () has not (), within a three-year period preceding this offer, had one or more contracts terminated for default by any Federal agency.

(2) Principal, for the purposes of this certification, means an officer, director, owner, partner, or a person having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a division or business segment; and similar positions).

(b) The Offeror shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(c) A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Offeror's responsibility. Failure of the Offeror to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Offeror nonresponsible.

(d) Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of an Offeror is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(e) The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Offeror knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

(End of provision)

252.225-7031 SECONDARY ARAB BOYCOTT OF ISRAEL (JUN 2005)

(a) Definitions. As used in this provision--

(1) Foreign person means any person (including any individual, partnership, corporation, or other form of association) other than a United States person.

(2) United States means the 50 States, the District of Columbia, outlying areas, and the outer Continental Shelf as defined in 43 U.S.C. 1331.

(3) United States person is defined in 50 U.S.C. App. 2415(2) and means--

(i) Any United States resident or national (other than an individual resident outside the United States who is employed by other than a United States person);

(ii) Any domestic concern (including any permanent domestic establishment of any foreign concern); and

(iii) Any foreign subsidiary or affiliate (including any permanent foreign establishment) of any domestic concern that is controlled in fact by such domestic concern.

(b) Certification. If the offeror is a foreign person, the offeror certifies, by submission of an offer, that it--

(1) Does not comply with the Secondary Arab Boycott of Israel; and

(2) Is not taking or knowingly agreeing to take any action, with respect to the Secondary Boycott of Israel by Arab countries, which 50 U.S.C. App. 2407(a) prohibits a United States person from taking.

(End of provision)

252.247-7022 REPRESENTATION OF EXTENT OF TRANSPORTATION BY SEA (AUG 1992)

(a) The Offeror shall indicate by checking the appropriate blank in paragraph (b) of this provision whether transportation of supplies by sea is anticipated under the resultant contract. The term supplies is defined in the Transportation of Supplies by Sea clause of this solicitation.

(b) Representation. The Offeror represents that it:

___ (1) Does anticipate that supplies will be transported by sea in the performance of any contract or subcontract resulting from this solicitation.

___ (2) Does not anticipate that supplies will be transported by sea in the performance of any contract or subcontract resulting from this solicitation.

(c) Any contract resulting from this solicitation will include the Transportation of Supplies by Sea clause. If the Offeror represents that it will not use ocean transportation, the resulting contract will also include the Defense FAR Supplement clause at 252.247-7024, Notification of Transportation of Supplies by Sea.

CLAUSES INCORPORATED BY FULL TEXT

52.202-1 DEFINITIONS (JUL 2004)

(a) When a solicitation provision or contract clause uses a word or term that is defined in the Federal Acquisition Regulation (FAR), the word or term has the same meaning as the definition in FAR 2.101 in effect at the time the solicitation was issued, unless--

- (1) The solicitation, or amended solicitation, provides a different definition;
- (2) The contracting parties agree to a different definition;
- (3) The part, subpart, or section of the FAR where the provision or clause is prescribed provides a different meaning; or
- (4) The word or term is defined in FAR Part 31, for use in the cost principles and procedures.

(b) The FAR Index is a guide to words and terms the FAR defines and shows where each definition is located. The FAR Index is available via the Internet at <http://www.acqnet.gov> at the end of the FAR, after the FAR Appendix.

(End of clause)

52.211-10 COMMENCEMENT, PROSECUTION, AND COMPLETION OF WORK (APR 1984)

The Contractor shall be required to (a) commence work under this contract within ten (10) calendar days after the date the Contractor receives the notice to proceed, (b) prosecute the work diligently, and (c) complete the entire work ready for use not later than 180 days. * The time stated for completion shall include final cleanup of the premises.

(End of clause)

52.216-1 TYPE OF CONTRACT (APR 1984)

The Government contemplates award of a Firm Fixed Price contract resulting from this solicitation.

(End of provision)

52.225-17 EVALUATION OF FOREIGN CURRENCY OFFERS (FEB 2000)

If the Government receives offers in more than one currency, the Government will evaluate offers by converting the foreign currency to United States currency using the Global Currency Exchange Rates Report published daily by the Charleston Financial Service Center in effect as stated below. This is the official rate to be used for all financial transactions processed by the Embassy in Bogota.

(a) For acquisitions conducted using sealed bidding procedures, on the date of bid opening.

(b) For acquisitions conducted using negotiation procedures--

(1) On the date specified for receipt of offers, if award is based on initial offers; otherwise

(2) On the date specified for receipt of proposal revisions.

(End of provision)

52.232-16 PROGRESS PAYMENTS (AUG 2010)

The Government will make progress payments to the Contractor when requested as work progresses, but not more frequently than monthly, in amounts of \$2,500 or more approved by the Contracting Officer, under the following conditions:

(a) Computation of amounts. (1) Unless the Contractor requests a smaller amount, the Government will compute each progress payment as 80 percent of the Contractor's total costs incurred under this contract whether or not actually paid, plus financing payments to subcontractors (see paragraph (j) of this clause), less the sum of all previous progress payments made by the Government under this contract. The Contracting Officer will consider cost of money that would be allowable under FAR 31.205-10 as an incurred cost for progress payment purposes.

(2) The amount of financing and other payments for supplies and services purchased directly for the contract are limited to the amounts that have been paid by cash, check, or other forms of payment, or that are determined due and will be paid to subcontractors--

(i) In accordance with the terms and conditions of a subcontract or invoice; and

(ii) Ordinarily within 30 days of the submission of the Contractor's payment request to the Government.

(3) The Government will exclude accrued costs of Contractor contributions under employee pension plans until actually paid unless--

(i) The Contractor's practice is to make contributions to the retirement fund quarterly or more frequently; and

(ii) The contribution does not remain unpaid 30 days after the end of the applicable quarter or shorter payment period (any contribution remaining unpaid shall be excluded from the Contractor's total costs for progress payments until paid).

(4) The Contractor shall not include the following in total costs for progress payment purposes in paragraph (a)(1) of this clause:

(i) Costs that are not reasonable, allocable to this contract, and consistent with sound and generally accepted accounting principles and practices.

(ii) Costs incurred by subcontractors or suppliers.

(iii) Costs ordinarily capitalized and subject to depreciation or amortization except for the properly depreciated or amortized portion of such costs.

(iv) Payments made or amounts payable to subcontractors or suppliers, except for --

(A) Completed work, including partial deliveries, to which the Contractor has acquired title; and

(B) Work under cost-reimbursement or time-and-material subcontracts to which the Contractor has acquired title.

(5) The amount of unliquidated progress payments may exceed neither (i) the progress payments made against incomplete work (including allowable unliquidated progress payments to subcontractors) nor

(ii) the value, for progress payment purposes, of the incomplete work. Incomplete work shall be considered to be the supplies and services required by this contract, for which delivery and invoicing by the Contractor and acceptance by the Government are incomplete.

(6) The total amount of progress payments shall not exceed 80 percent of the total contract price.

(7) If a progress payment or the unliquidated progress payments exceed the amounts permitted by subparagraphs (a)(4) or (a)(5) of this clause, the Contractor shall repay the amount of such excess to the Government on demand.

(8) Notwithstanding any other terms of the contract, the Contractor agrees not to request progress payments in dollar amounts of less than \$2,500. The Contracting Officer may make exceptions.

(9) The costs applicable to items delivered, invoiced, and accepted shall not include costs in excess of the contract price of the items.

(b) Liquidation. Except as provided in the Termination for Convenience of the Government clause, all progress payments shall be liquidated by deducting from any payment under this contract, other than advance or progress payments, the unliquidated progress payments, or 80 percent of the amount invoiced, whichever is less. The Contractor shall repay to the Government any amounts required by a retroactive price reduction, after computing liquidations and payments on past invoices at the reduced prices and adjusting the unliquidated progress payments accordingly. The Government reserves the right to unilaterally change from the ordinary liquidation rate to an alternate rate when deemed appropriate for proper contract financing.

(c) Reduction or suspension. The Contracting Officer may reduce or suspend progress payments, increase the rate of liquidation, or take a combination of these actions, after finding on substantial evidence any of the following conditions:

(1) The Contractor failed to comply with any material requirement of this contract (which includes paragraphs (f) and (g) of this clause).

(2) Performance of this contract is endangered by the Contractor's --

(i) Failure to make progress or

(ii) Unsatisfactory financial condition.

(3) Inventory allocated to this contract substantially exceeds reasonable requirements.

(4) The Contractor is delinquent in payment of the costs of performing this contract in the ordinary course of business.

(5) The fair value of the undelivered work is less than the amount of unliquidated progress payments for that work.

(6) The Contractor is realizing less profit than that reflected in the establishment of any alternate liquidation rate in paragraph (b) of this clause, and that rate is less than the progress payment rate stated in subparagraph (a)(1) of this clause.

(d) Title.

(1) Title to the property described in this paragraph (d) shall vest in the Government. Vestiture shall be immediately upon the date of this contract, for property acquired or produced before that date. Otherwise, vestiture shall occur when the property is or should have been allocable or properly chargeable to this contract.

(2) "Property," as used in this clause, includes all of the below-described items acquired or produced by the Contractor that are or should be allocable or properly chargeable to this contract under sound and generally accepted accounting principles and practices.

(i) Parts, materials, inventories, and work in process;

(ii) Special tooling and special test equipment to which the Government is to acquire title;

(iii) Nondurable (i.e., noncapital) tools, jigs, dies, fixtures, molds, patterns, taps, gauges, test equipment, and other similar manufacturing aids, title to which would not be obtained as special tooling under paragraph (d) (2)(ii) of this clause; and

(iv) Drawings and technical data, to the extent the Contractor or subcontractors are required to deliver them to the Government by other clauses of this contract.

(3) Although title to property is in the Government under this clause, other applicable clauses of this contract; e.g., the termination clauses, shall determine the handling and disposition of the property.

(4) The Contractor may sell any scrap resulting from production under this contract without requesting the Contracting Officer's approval, but the proceeds shall be credited against the costs of performance.

(5) To acquire for its own use or dispose of property to which title is vested in the Government under this clause, the Contractor must obtain the Contracting Officer's advance approval of the action and the terms. The Contractor shall (i) exclude the allocable costs of the property from the costs of contract performance, and (ii) repay to the Government any amount of unliquidated progress payments allocable to the property. Repayment may be by cash or credit memorandum.

(6) When the Contractor completes all of the obligations under this contract, including liquidation of all progress payments, title shall vest in the Contractor for all property (or the proceeds thereof) not--

(i) Delivered to, and accepted by, the Government under this contract; or

(ii) Incorporated in supplies delivered to, and accepted by, the Government under this contract and to which title is vested in the Government under this clause.

(7) The terms of this contract concerning liability for Government-furnished property shall not apply to property to which the Government acquired title solely under this clause.

(e) Risk of loss. Before delivery to and acceptance by the Government, the Contractor shall bear the risk of loss for property, the title to which vests in the Government under this clause, except to the extent the Government expressly assumes the risk. The Contractor shall repay the Government an amount equal to the unliquidated progress payments that are based on costs allocable to property that is lost, stolen, damaged, or destroyed.

(f) Control of costs and property. The Contractor shall maintain an accounting system and controls adequate for the proper administration of this clause.

(g) Reports, forms, and access to records. (1) The Contractor shall promptly furnish reports, certificates, financial statements, and other pertinent information (including estimates to complete) reasonably requested by the Contracting Officer for the administration of this clause. Also, the Contractor shall give the Government reasonable opportunity to examine and verify the Contractor's books, records, and accounts.

(2) The Contractor shall furnish estimates to complete that have been developed or updated within six months of the date of the progress payment request. The estimates to complete shall represent the Contractor's best estimate of total costs to complete all remaining contract work required under the contract. The estimates shall include sufficient detail to permit Government verification.

(3) Each Contractor request for progress payment shall:

(i) Be submitted on Standard Form 1443, Contractor's Request for Progress Payment, or the electronic equivalent as required by agency regulations, in accordance with the form instructions and the contract terms; and

(ii) Include any additional supporting documentation requested by the Contracting Officer.

(h) Special terms regarding default. If this contract is terminated under the Default clause, (i) the Contractor shall, on demand, repay to the Government the amount of unliquidated progress payments and (ii) title shall vest in the Contractor, on full liquidation of progress payments, for all property for which the Government elects not to require delivery under the Default clause. The Government shall be liable for no payment except as provided by the Default clause.

(i) Reservations of rights.

(1) No payment or vesting of title under this clause shall --

(i) Excuse the Contractor from performance of obligations under this contract or

(ii) Constitute a waiver of any of the rights or remedies of the parties under the contract.

(2) The Government's rights and remedies under this clause

(i) Shall not be exclusive but rather shall be in addition to any other rights and remedies provided by law or this contract and

(ii) Shall not be affected by delayed, partial, or omitted exercise of any right, remedy, power, or privilege, nor shall such exercise or any single exercise preclude or impair any further exercise under this clause or the exercise of any other right, power, or privilege of the Government.

(j) Financing payments to subcontractors. The financing payments to subcontractors mentioned in paragraphs (a)(1) and (a)(2) of this clause shall be all financing payments to subcontractors or divisions, if the following conditions are met:

(1) The amounts included are limited to--

(i) The unliquidated remainder of financing payments made; plus

(ii) Any unpaid subcontractor requests for financing payments.

(2) The subcontract or interdivisional order is expected to involve a minimum of approximately 6 months between the beginning of work and the first delivery; or, if the subcontractor is a small business concern, 4 months.

(3) If the financing payments are in the form of progress payments, the terms of the subcontract or interdivisional order concerning progress payments--

(i) Are substantially similar to the terms of this clause for any subcontractor that is a large business concern, or this clause with its Alternate I for any subcontractor that is a small business concern;

(ii) Are at least as favorable to the Government as the terms of this clause;

(iii) Are not more favorable to the subcontractor or division than the terms of this clause are to the Contractor;

(iv) Are in conformance with the requirements of FAR 32.504(e); and

(v) Subordinate all subcontractor rights concerning property to which the Government has title under the subcontract to the Government's right to require delivery of the property to the Government if--

(A) The Contractor defaults; or

(B) The subcontractor becomes bankrupt or insolvent.

(4) If the financing payments are in the form of performance-based payments, the terms of the subcontract or interdivisional order concerning payments--

(i) Are substantially similar to the Performance-Based Payments clause at FAR 52.232-32 and meet the criteria for, and definition of, performance-based payments in FAR Part 32;

(ii) Are in conformance with the requirements of FAR 32.504(f); and

(iii) Subordinate all subcontractor rights concerning property to which the Government has title under the subcontract to the Government's right to require delivery of the property to the Government if--

(A) The Contractor defaults; or

(B) The subcontractor becomes bankrupt or insolvent.

(5) If the financing payments are in the form of commercial item financing payments, the terms of the subcontract or interdivisional order concerning payments--

(i) Are constructed in accordance with FAR 32.206(c) and included in a subcontract for a commercial item purchase that meets the definition and standards for acquisition of commercial items in FAR Parts 2 and 12;

(ii) Are in conformance with the requirements of FAR 32.504(g); and

(iii) Subordinate all subcontractor rights concerning property to which the Government has title under the subcontract to the Government's right to require delivery of the property to the Government if--

(A) The Contractor defaults; or

(B) The subcontractor becomes bankrupt or insolvent.

(6) If financing is in the form of progress payments, the progress payment rate in the subcontract is the customary rate used by the contracting agency, depending on whether the subcontractor is or is not a small business concern.

(7) Concerning any proceeds received by the Government for property to which title has vested in the Government under the subcontract terms, the parties agree that the proceeds shall be applied to reducing any unliquidated financing payments by the Government to the Contractor under this contract.

(8) If no unliquidated financing payments to the Contractor remain, but there are unliquidated financing payments that the Contractor has made to any subcontractor, the Contractor shall be subrogated to all the rights the Government obtained through the terms required by this clause to be in any subcontract, as if all such rights had been assigned and transferred to the Contractor.

(9) To facilitate small business participation in subcontracting under this contract, the Contractor shall provide financing payments to small business concerns, in conformity with the standards for customary contract financing payments stated in Subpart 32.113. The Contractor shall not consider the need for such financing payments as a handicap or adverse factor in the award of subcontracts.

(k) Limitations on undefinitized contract actions. Notwithstanding any other progress payment provisions in this contract, progress payments may not exceed 80 percent of costs incurred on work accomplished under undefinitized contract actions. A "contract action" is any action resulting in a contract, as defined in Subpart 2.1, including contract modifications for additional supplies or services, but not including contract modifications that are within the scope and under the terms of the contract, such as contract modifications issued pursuant to the Changes clause, or funding and other administrative changes. This limitation shall apply to the costs incurred, as computed in accordance with paragraph (a) of this clause, and shall remain in effect until the contract action is definitized. Costs incurred which are subject to this limitation shall be segregated on Contractor progress payment requests and invoices from those costs eligible for higher progress payment rates. For purposes of progress payment liquidation, as described in paragraph (b) of this clause, progress payments for undefinitized contract actions shall be liquidated at 80 percent of the amount invoiced for work performed under the undefinitized contract action as long as the contract action remains undefinitized. The amount of unliquidated progress payments for undefinitized contract actions shall not exceed 80 percent of the maximum liability of the Government under the undefinitized contract action or such lower limit specified elsewhere in the contract. Separate limits may be specified for separate actions.

(l) Due date. The designated payment office will make progress payments on the 30th day after the designated billing office receives a proper progress payment request. In the event that the Government requires an audit or other review of a specific progress payment request to ensure compliance with the terms and conditions of the contract, the designated payment office is not compelled to make payment by the specified due date. Progress payments are considered contract financing and are not subject to the interest penalty provisions of the Prompt Payment Act.

(m) Progress payments under indefinite--delivery contracts. The Contractor shall account for and submit progress payment requests under individual orders as if the order constituted a separate contract, unless otherwise specified in this contract.

(End of clause)

52.232-18 AVAILABILITY OF FUNDS (APR 1984)

Funds are not presently available for this contract. The Government's obligation under this contract is contingent upon the availability of appropriated funds from which payment for contract purposes can be made. No legal liability on the part of the Government for any payment may arise until funds are made available to the Contracting Officer for this contract and until the Contractor receives notice of such availability, to be confirmed in writing by the Contracting Officer.

(End of clause)

52.232-34 PAYMENT BY ELECTRONIC FUNDS TRANSFER—OTHER THAN CENTRAL CONTRACTOR REGISTRATION (MAY 1999)

(a) Method of payment. (1) All payments by the Government under this contract shall be made by electronic funds transfer (EFT) except as provided in paragraph (a)(2) of this clause. As used in this clause, the term "EFT" refers to the funds transfer and may also include the payment information transfer.

(2) In the event the Government is unable to release one or more payments by EFT, the Contractor agrees to either--

(i) Accept payment by check or some other mutually agreeable method of payment; or

(ii) Request the Government to extend payment due dates until such time as the Government makes payment by EFT (but see paragraph (d) of this clause).

(b) Mandatory submission of Contractor's EFT information. (1) The Contractor is required to provide the Government with the information required to make payment by EFT (see paragraph (j) of this clause). The Contractor shall provide this information directly to the office designated in this contract to receive that information (hereafter: "designated office") no later than 15 days prior to submission of the first request for payment. If not otherwise specified in this contract, the payment office is the designated office for receipt of the Contractor's EFT information. If more than one designated office is named for the contract, the Contractor shall provide a separate notice to each office. In the event that the EFT information changes, the Contractor shall be responsible for providing the updated information to the designated office(s).

(2) If the Contractor provides EFT information applicable to multiple contracts, the Contractor shall specifically state the applicability of this EFT information in terms acceptable to the designated office. However, EFT information supplied to a designated office shall be applicable only to contracts that identify that designated office as the office to receive EFT information for that contract.

(c) Mechanisms for EFT payment. The Government may make payment by EFT through either the Automated Clearing House (ACH) network, subject to the rules of the National Automated Clearing House Association, or the Fedwire Transfer System. The rules governing Federal payments through the ACH are contained in 31 CFR part 210.

(d) Suspension of payment. (1) The Government is not required to make any payment under this contract until after receipt, by the designated office, of the correct EFT payment information from the Contractor. Until receipt of the correct EFT information, any invoice or contract financing request shall be deemed not to be a proper invoice for the purpose of prompt payment under this contract. The prompt payment terms of the contract regarding notice of an improper invoice and delays in accrual of interest penalties apply.

(2) If the EFT information changes after submission of correct EFT information, the Government shall begin using the changed EFT information no later than 30 days after its receipt by the designated office to the extent payment is made by EFT. However, the Contractor may request that no further payments be made until the updated EFT information is implemented by the payment office. If such suspension would result in a late payment under the prompt payment terms of this contract, the Contractor's request for suspension shall extend the due date for payment by the number of days of the suspension.

(e) Liability for uncompleted or erroneous transfers. (1) If an uncompleted or erroneous transfer occurs because the Government used the Contractor's EFT information incorrectly, the Government remains responsible for--

(i) Making a correct payment;

(ii) Paying any prompt payment penalty due; and

(iii) Recovering any erroneously directed funds.

(2) If an uncompleted or erroneous transfer occurs because the Contractor's EFT information was incorrect, or was revised within 30 days of Government release of the EFT payment transaction instruction to the Federal Reserve System, and--

(i) If the funds are no longer under the control of the payment office, the Government is deemed to have made payment and the Contractor is responsible for recovery of any erroneously directed funds; or

(ii) If the funds remain under the control of the payment office, the Government shall not make payment and the provisions of paragraph (d) shall apply.

(f) EFT and prompt payment. A payment shall be deemed to have been made in a timely manner in accordance with the prompt payment terms of this contract if, in the EFT payment transaction instruction released to the Federal Reserve System, the date specified for settlement of the payment is on or before the prompt payment due date, provided the specified payment date is a valid date under the rules of the Federal Reserve System.

(g) EFT and assignment of claims. If the Contractor assigns the proceeds of this contract as provided for in the assignment of claims terms of this contract, the Contractor shall require as a condition of any such assignment, that the assignee shall provide the EFT information required by paragraph (j) of this clause to the designated office, and shall be paid by EFT in accordance with the terms of this clause. In all respects, the requirements of this clause shall apply to the assignee as if it were the Contractor. EFT information that shows the ultimate recipient of the transfer to be other than the Contractor, in the absence of a proper assignment of claims acceptable to the Government, is incorrect EFT information within the meaning of paragraph (d) of this clause.

(h) Liability for change of EFT information by financial agent. The Government is not liable for errors resulting from changes to EFT information provided by the Contractor's financial agent.

(i) Payment information. The payment or disbursing office shall forward to the Contractor available payment information that is suitable for transmission as of the date of release of the EFT instruction to the Federal Reserve System. The Government may request the Contractor to designate a desired format and method(s) for delivery of payment information from a list of formats and methods the payment office is capable of executing. However, the Government does not guarantee that any particular format or method of delivery is available at any particular payment office and retains the latitude to use the format and delivery method most convenient to the Government. If the Government makes payment by check in accordance with paragraph (a) of this clause, the Government shall mail the payment information to the remittance address in the contract.

(j) EFT information. The Contractor shall provide the following information to the designated office. The Contractor may supply this data for this or multiple contracts (see paragraph (b) of this clause). The Contractor shall designate a single financial agent per contract capable of receiving and processing the EFT information using the EFT methods described in paragraph (c) of this clause.

(1) The contract number (or other procurement identification number).

(2) The Contractor's name and remittance address, as stated in the contract(s).

(3) The signature (manual or electronic, as appropriate), title, and telephone number of the Contractor official authorized to provide this information.

(4) The name, address, and 9-digit Routing Transit Number of the Contractor's financial agent.

- (5) The Contractor's account number and the type of account (checking, saving, or lockbox).
- (6) If applicable, the Fedwire Transfer System telegraphic abbreviation of the Contractor's financial agent.
- (7) If applicable, the Contractor shall also provide the name, address, telegraphic abbreviation, and 9-digit Routing Transit Number of the correspondent financial institution receiving the wire transfer payment if the Contractor's financial agent is not directly on-line to the Fedwire Transfer System; and, therefore, not the receiver of the wire transfer payment.

(End of clause)

52.232-36 PAYMENT BY THIRD PARTY (FEB 2010)

(a) General.

(1) Except as provided in paragraph (a)(2) of this clause, the Contractor agrees to accept payments due under this contract, through payment by a third party in lieu of payment directly from the Government, in accordance with the terms of this clause. The third party and, if applicable, the particular Governmentwide commercial purchase card to be used are identified elsewhere in this contract.

(2) The Governmentwide commercial purchase card is not authorized as a method of payment during any period the Central Contractor Registration (CCR) indicates that the Contractor has delinquent debt that is subject to collection under the Treasury Offset Program (TOP). Information on TOP is available at <http://fms.treas.gov/debt/index.html>. If the CCR subsequently indicates that the Contractor no longer has delinquent debt, the Contractor may request the Contracting Officer to authorize payment by Governmentwide commercial purchase card.

(b) Contractor payment request.

(1) Except as provided in paragraph (b)(2) of this clause, the Contractor shall make payment requests through a charge to the Government account with the third party, at the time and for the amount due in accordance with those clauses of this contract that authorize the Contractor to submit invoices, contract financing requests, other payment requests, or as provided in other clauses providing for payment to the Contractor.

(2) When the Contracting Officer has notified the Contractor that the Governmentwide commercial purchase card is no longer an authorized method of payment, the Contractor shall make such payment requests in accordance with instructions provided by the Contracting Officer during the period when the purchase card is not authorized.

(c) Payment. The Contractor and the third party shall agree that payments due under this contract shall be made upon submittal of payment requests to the third party in accordance with the terms and conditions of an agreement between the Contractor, the Contractor's financial agent (if any), and the third party and its agents (if any). No payment shall be due the Contractor until such agreement is made. Payments made or due by the third party under this clause are not payments made by the Government and are not subject to the Prompt Payment Act or any implementation thereof in this contract.

(d) Documentation. Documentation of each charge against the Government's account shall be provided to the Contracting Officer upon request.

(e) Assignment of claims. Notwithstanding any other provision of this contract, if any payment is made under this clause, then no payment under this contract shall be assigned under the provisions of the assignment of claims terms of this contract or the Assignment of Claims Act of 1940, as amended, 31 U.S.C. 3727, 41 U.S.C. 15.

(f) Other payment terms. The other payment terms of this contract shall govern the content and submission of payment requests. If any clause requires information or documents in or with the payment request, that is not provided in the third party agreement referenced in paragraph (c) of this clause, the Contractor shall obtain instructions from the Contracting Officer before submitting such a payment request.

(End of clause)

52.236-2 DIFFERING SITE CONDITIONS (APR 1984)

(a) The Contractor shall promptly, and before the conditions are disturbed, give a written notice to the Contracting Officer of

(1) subsurface or latent physical conditions at the site which differ materially from those indicated in this contract, or

(2) unknown physical conditions at the site, of an unusual nature, which differ materially from those ordinarily encountered and generally recognized as inhering in work of the character provided for in the contract.

(b) The Contracting Officer shall investigate the site conditions promptly after receiving the notice. If the conditions do materially so differ and cause an increase or decrease in the Contractor's cost of, or the time required for, performing any part of the work under this contract, whether or not changed as a result of the conditions, an equitable adjustment shall be made under this clause and the contract modified in writing accordingly.

(c) No request by the Contractor for an equitable adjustment to the contract under this clause shall be allowed, unless the Contractor has given the written notice required; provided, that the time prescribed in (a) above for giving written notice may be extended by the Contracting Officer.

(d) No request by the Contractor for an equitable adjustment to the contract for differing site conditions shall be allowed if made after final payment under this contract.

(End of clause)

52.236-3 SITE INVESTIGATION AND CONDITIONS AFFECTING THE WORK (APR 1984)

(a) The Contractor acknowledges that it has taken steps reasonably necessary to ascertain the nature and location of the work, and that it has investigated and satisfied itself as to the general and local conditions which can affect the work or its cost, including but not limited to

(1) conditions bearing upon transportation, disposal, handling, and storage of materials;

(2) the availability of labor, water, electric power, and roads;

(3) uncertainties of weather, river stages, tides, or similar physical conditions at the site;

(4) the conformation and conditions of the ground; and (5) the character of equipment and facilities needed preliminary to and during work performance. The Contractor also acknowledges that it has satisfied itself as to the character, quality, and quantity of surface and subsurface materials or obstacles to be encountered insofar as this information is reasonably ascertainable from an inspection of the site, including all exploratory work done by the Government, as well as from the drawings and specifications made a part of this contract. Any failure of the Contractor to take the actions described and acknowledged in this paragraph will not relieve the Contractor from

responsibility for estimating properly the difficulty and cost of successfully performing the work, or for proceeding to successfully perform the work without additional expense to the Government.

(b) The Government assumes no responsibility for any conclusions or interpretations made by the Contractor based on the information made available by the Government. Nor does the Government assume responsibility for any understanding reached or representation made concerning conditions which can affect the work by any of its officers or agents before the execution of this contract, unless that understanding or representation is expressly stated in this contract.

(End of clause)

52.236-5 MATERIAL AND WORKMANSHIP (APR 1984)

(a) All equipment, material, and articles incorporated into the work covered by this contract shall be new and of the most suitable grade for the purpose intended, unless otherwise specifically provided in this contract. References in the specifications to equipment, material, articles, or patented processes by trade name, make, or catalog number, shall be regarded as establishing a standard of quality and shall not be construed as limiting competition. The Contractor may, at its option, use any equipment, material, article, or process that, in the judgment of the Contracting Officer, is equal to that named in the specifications, unless otherwise specifically provided in this contract.

(b) The Contractor shall obtain the Contracting Officer's approval of the machinery and mechanical and other equipment to be incorporated into the work. When requesting approval, the Contractor shall furnish to the Contracting Officer the name of the manufacturer, the model number, and other information concerning the performance, capacity, nature, and rating of the machinery and mechanical and other equipment. When required by this contract or by the Contracting Officer, the Contractor shall also obtain the Contracting Officer's approval of the material or articles which the Contractor contemplates incorporating into the work. When requesting approval, the Contractor shall provide full information concerning the material or articles. When directed to do so, the Contractor shall submit samples for approval at the Contractor's expense, with all shipping charges prepaid. Machinery, equipment, material, and articles that do not have the required approval shall be installed or used at the risk of subsequent rejection.

(c) All work under this contract shall be performed in a skillful and workmanlike manner. The Contracting Officer may require, in writing, that the Contractor remove from the work any employee the Contracting Officer deems incompetent, careless, or otherwise objectionable.

(End of clause)

52.236-7 PERMITS AND RESPONSIBILITIES (NOV 1991)

The Contractor shall, without additional expense to the Government, be responsible for obtaining any necessary licenses and permits, and for complying with any Federal, State, and municipal laws, codes, and regulations applicable to the performance of the work. The Contractor shall also be responsible for all damages to persons or property that occur as a result of the Contractor's fault or negligence. The Contractor shall also be responsible for all materials delivered and work performed until completion and acceptance of the entire work, except for any completed unit of work which may have been accepted under the contract.

(End of clause)

52.236-8 OTHER CONTRACTS (APR 1984)

The Government may undertake or award other contracts for additional work at or near the site of the work under this contract. The Contractor shall fully cooperate with the other contractors and with Government employees and shall carefully adapt scheduling and performing the work under this contract to accommodate the additional work, heeding any direction that may be provided by the Contracting Officer. The Contractor shall not commit or permit any act that will interfere with the performance of work by any other contractor or by Government employees.

(End of clause)

52.236-9 PROTECTION OF EXISTING VEGETATION, STRUCTURES, EQUIPMENT, UTILITIES, AND IMPROVEMENTS (APR 1984)

(a) The Contractor shall preserve and protect all structures, equipment, and vegetation (such as trees, shrubs, and grass) on or adjacent to the work site, which are not to be removed and which do not unreasonably interfere with the work required under this contract. The Contractor shall only remove trees when specifically authorized to do so, and shall avoid damaging vegetation that will remain in place. If any limbs or branches of trees are broken during contract performance, or by the careless operation of equipment, or by workmen, the Contractor shall trim those limbs or branches with a clean cut and paint the cut with a tree-pruning compound as directed by the Contracting Officer.

(b) The Contractor shall protect from damage all existing improvements and utilities

(1) at or near the work site, and

(2) on adjacent property of a third party, the locations of which are made known to or should be known by the Contractor. The Contractor shall repair any damage to those facilities, including those that are the property of a third party, resulting from failure to comply with the requirements of this contract or failure to exercise reasonable care in performing the work. If the Contractor fails or refuses to repair the damage promptly, the Contracting Officer may have the necessary work performed and charge the cost to the Contractor.

(End of clause)

52.236-10 OPERATIONS AND STORAGE AREAS (APR 1984)

(a) The Contractor shall confine all operations (including storage of materials) on Government premises to areas authorized or approved by the Contracting Officer. The Contractor shall hold and save the Government, its officers and agents, free and harmless from liability of any nature occasioned by the Contractor's performance.

(b) Temporary buildings (e.g., storage sheds, shops, offices) and utilities may be erected by the Contractor only with the approval of the Contracting Officer and shall be built with labor and materials furnished by the Contractor without expense to the Government. The temporary buildings and utilities shall remain the property of the Contractor and shall be removed by the Contractor at its expense upon completion of the work. With the written consent of the Contracting Officer, the buildings and utilities may be abandoned and need not be removed.

(c) The Contractor shall, under regulations prescribed by the Contracting Officer, use only established roadways, or use temporary roadways constructed by the Contractor when and as authorized by the Contracting Officer. When materials are transported in prosecuting the work, vehicles shall not be loaded beyond the loading capacity recommended by the manufacturer of the vehicle or prescribed by any Federal, State, or local law or regulation.

When it is necessary to cross curbs or sidewalks, the Contractor shall protect them from damage. The Contractor shall repair or pay for the repair of any damaged curbs, sidewalks, or roads.

(End of clause)

52.236-11 USE AND POSSESSION PRIOR TO COMPLETION (APR 1984)

(a) The Government shall have the right to take possession of or use any completed or partially completed part of the work. Before taking possession of or using any work, the Contracting Officer shall furnish the Contractor a list of items of work remaining to be performed or corrected on those portions of the work that the Government intends to take possession of or use. However, failure of the Contracting Officer to list any item of work shall not relieve the Contractor of responsibility for complying with the terms of the contract. The Government's possession or use shall not be deemed an acceptance of any work under the contract.

(b) While the Government has such possession or use, the Contractor shall be relieved of the responsibility for the loss of or damage to the work resulting from the Government's possession or use, notwithstanding the terms of the clause in this contract entitled "Permits and Responsibilities." If prior possession or use by the Government delays the progress of the work or causes additional expense to the Contractor, an equitable adjustment shall be made in the contract price or the time of completion, and the contract shall be modified in writing accordingly.

(End of clause)

52.236-12 CLEANING UP (APR 1984)

The Contractor shall at all times keep the work area, including storage areas, free from accumulations of waste materials. Before completing the work, the Contractor shall remove from the work and premises any rubbish, tools, scaffolding, equipment, and materials that are not the property of the Government. Upon completing the work, the Contractor shall leave the work area in a clean, neat, and orderly condition satisfactory to the Contracting Officer.

(End of clause)

52.236-26 PRECONSTRUCTION CONFERENCE (FEB 1995)

If the Contracting Officer decides to conduct a preconstruction conference, the successful offeror will be notified and will be required to attend. The Contracting Officer's notification will include specific details regarding the date, time, and location of the conference, any need for attendance by subcontractors, and information regarding the items to be discussed.

(End of clause)

52.236-27 SITE VISIT (CONSTRUCTION) (FEB 1995)

(a) The clauses at 52.236-2, Differing Site Conditions, and 52.236-3, Site Investigations and Conditions Affecting the Work, will be included in any contract awarded as a result of this solicitation. Accordingly, offerors or quoters are urged and expected to inspect the site where the work will be performed.

Site visit will be conducted at the Fuel Storage Facility at Juanchaco on 7 Sept 2011, 2011 . All coordination for the site visit will be done by Luis Correa.

(b) Site visits may be arranged during normal duty hours by contacting:

Name: Luis Correa

Telephone: 311-516-5697

(End of provision)

52.242-14 SUSPENSION OF WORK (APR 1984)

(a) The Contracting Officer may order the Contractor, in writing, to suspend, delay, or interrupt all or any part of the work of this contract for the period of time that the Contracting Officer determines appropriate for the convenience of the Government.

(b) If the performance of all or any part of the work is, for an unreasonable period of time, suspended, delayed, or interrupted (1) by an act of the Contracting Officer in the administration of this contract, or (2) by the Contracting Officer's failure to act within the time specified in this contract (or within a reasonable time if not specified), an adjustment shall be made for any increase in the cost of performance of this contract (excluding profit) necessarily caused by the unreasonable suspension, delay, or interruption, and the contract modified in writing accordingly. However, no adjustment shall be made under this clause for any suspension, delay, or interruption to the extent that performance would have been so suspended, delayed, or interrupted by any other cause, including the fault or negligence of the Contractor, or for which an equitable adjustment is provided for or excluded under any other term or condition of this contract. (c) A claim under this clause shall not be allowed (1) for any costs incurred more than 20 days before the Contractor shall have notified the Contracting Officer in writing of the act or failure to act involved (but this requirement shall not apply as to a claim resulting from a suspension order), and (2) unless the claim, in an amount stated, is asserted in writing as soon as practicable after the termination of the suspension, delay, or interruption, but not later than the date of final payment under the contract.

(End of clause)

52.247-27 CONTRACT NOT AFFECTED BY ORAL AGREEMENT (APR 1984)

No oral statement of any person shall modify or otherwise affect the terms, conditions, or specifications stated in this contract. All modifications to the contract must be made in writing by the Contracting Officer or an authorized representative.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

<http://www.acquisition.gov/far/>

<http://farsite.hill.af.mil>

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

Section 00800 - Special Contract Requirements

PAYMENT INSTRUCTIONS

Payment information will be included in contract award.

SPECIAL CONTRACT REQUIREMENTS

1. Type of Contract: The purchase order resulting from this solicitation will be a firm fixed price contract payable in US Dollars for US contractors, and Colombian Pesos for foreign contractors. Per the local tax authority, Colombian contractors shall submit their quote in the local currency. No additional sums will be payable as a result of escalations in the cost of materials, equipment, or labor due to the Contractor's failure to properly estimate or accurately predict the cost or difficulty of achieving the results required by the contract.

2. Pre-Construction Conference: After Notice of Award is issued and prior to the commencement of work, the contractor shall meet with the Contracting Officer (KO), Project engineer (PE) and/or designated technical personnel at the US Embassy Contracting Section at a mutually agreed upon time and date, to discuss and develop a complete understanding of the work schedule for the project.

3. Laws, Warranties and Insurance: The Contractor shall obtain (at Contractor's expense) any applicable types of insurance and certifications required by Colombian law that are customary and ordinary for the type of work required in the Statement of Work (i.e., construction, electrical, communications, etc). At a minimum the policies and laws mandatory in the country of Colombia are:

3.1 Work Quality and Stability: (Warranty) Contractor shall ensure the quality of the construction during the warranty period. This warranty shall amount to 40% of the contract value, and remain valid for three (3) years from the date of final payment. This warranty shall be provided to the KO no later than eight (8) days before the final contract acceptance date.

3.2 Wage Payment and Benefits Policy: Shall amount to 20% of the contract value, and valid from contract commencement, to three (3) years after. The social benefits policy shall not be necessary if a certification is issued by the contractor that all staff and personnel are duly registered in a social security scheme that covers accidents, death, and hospitalization, as required by Colombian Law.

3.3 Contract Compliance Policy: Contractor shall provide this policy amounting to 10% of the contract value for a period up to contract term plus two (2) months.

3.4 The contractor shall obtain adequate insurance for damage to, or theft of, materials and equipment due to transportation or storage.

3.5 Local Laws: The Contractor shall be responsible for complying with all local laws, codes, ordinance, and regulations applicable to work performance; to include the host country, and the lawful orders of any authority having jurisdiction. In the event of a conflict between the contract and such orders, the Contractor shall promptly advise the PE and the KO with a proposed resolution. This includes all local labor, health, environmental, and safety laws; quality assurance, and earthquake laws.

4. Subcontractors and Supplies: The contractor shall satisfy all lawful claims of any persons or entities employed by them, including subcontractors, material people, and laborers, for all work performed and materials furnished under this contract. The period of coverage shall be through the warranty period. The contractor shall not at any time permit any lien, attachment, or other encumbrance to be entered against or to remain on the building(s) , or the premises, whether public or private, or any portion thereof, as a result of nonperformance of any part of this contract.

5. Contract Line Item Prices: Contract line item prices must include general daily cleaning and debris removal outside the site to the closest authorized dumping area in the municipality or one authorized town government official. Under no circumstances shall material be burned. Cleaning includes disassembly of camps or temporary structures.

6. Changes to Materials or Other Items in Contractor Offer: Contractor Proposal cost/prices must be based on high quality materials designed for rough usage and long life. Any change in materials or other items listed in the Contractor's proposal/price breakdown worksheet requires resubmission for approval by the Contracting Officer.

7. Contractor Payments and Final Payment: Payment will be made under Federal Acquisition Regulation (FAR) Clause 52.232-5, Payments under Fixed Price Construction. No advanced payments are authorized. If contract is awarded to a US contractor, payment will be processed by Electronic Funds Transfer (EFT) through the Defense Finance and Accounting Service. A contract awarded to a foreign vendor, payment will be made through the US Embassy Bogota GSO section. Projects 30 days or less shall be paid in one single payment upon completion and acceptance by the KO. If greater than 30 days, progress payments for work will be authorized to be invoiced every 30 days. Final payment will be accomplished when: the work has been inspected and accepted by the Government, all submittals are presented and approved, and all work accomplished in accordance with contract terms and conditions.

8. Contracting Officer Representative: The Contractor shall only take direction from the KO or the On-Site Representative. The KO may designate the project engineer as the person authorized to perform technical or administrative functions related to this construction project. The PE or any other government representative **is not** authorized to make commitments or changes that affect price, quality, quantity, delivery, or any other term or condition of the contract.

9. Changes to the Contract: The KO is the only person authorized to make changes to the contract. Failure to clear changes with the KO **IN ADVANCE** of providing service shall result in the Government not being responsible for the charges, and non-payment to the Contractor. The contractor shall only take change orders from the KO. Purchases or changes from unauthorized persons may result in the contractor not receiving payment for those costs.

10 Progress Schedules and Reports: One progress schedule shall be provided to the PE in Microsoft Project within ten (10) days of contract award, who will give to the KO to review and sign. The schedule shall take into account time requirements for completion, to include unforeseen events and seasonal weather patterns. The project schedule shall have expected completion dates, execution time of each phase, mid-point completion of project, and monetary values. Only if changes are necessary, a new schedule shall be submitted to the PE for approval within two (2) working days.
