

Request services to routinely prune a Ceiba tree that is over 100 feet tall.

1. Must ensure that branches do not fall onto passersby and vehicle traffic by providing protective structures and methods that minimize risk. This must be approved by the Facility Manager before contract award and inspected before each period of work.
2. Workers must follow OSHA safety practices.
3. Must be skilled and understand Ceiba trees to promote healthy growth.
4. Must be able to meet Embassy security requirements.
5. Must provide all tools and equipment which must be inspected by the Embassy's Facility Manager for approval of contract and at each time of use.
6. Must provide a safety observer.
7. Personnel safety gear required must be inspected at the start of each work period.
