

DOE Function

- Support the Chief of Mission and the Country Team in achieving priority national security goals related to nuclear security, energy security and efficiency.
- Meet regularly with Chinese counterparts to facilitate implementation of programs and identification of areas for further collaboration.
- Promote cooperation between DOE/NNSA Headquarters and their Chinese counterparts.
- Conduct analysis and provide timely information to DOE/NNSA and Embassy agencies and sections.
- Perform program oversight and direct implementation of program elements where requested.
- Assist DOE/NNSA HQ Program Offices by developing implementation plans and facilitating key meetings and events.
- Ensure DOE program offices receive detailed, accurate, and timely information about Chinese energy and nuclear activities, requirements, and views.
- Manage travel by all DOE personnel to China
- Serve as an administrative support base for visiting DOE/NNSA delegations and personnel traveling to China on DOE-related business.

DOE China Mission

Serve all DOE Program Offices and coordinate with the DOE Policy and International Affairs on all matters affecting policy in China:

- Advancing the U.S. economic and energy security
 - Strengthen non-proliferation and emergency response actions that improve nuclear security in China and ensure America's nuclear security.
 - Support the Energy Program Offices of Energy Efficiency and Renewable Energy, Fossil Energy, Nuclear Energy and Electricity Delivery and Energy Reliability.
- Promoting scientific and technological innovation
 - Support U.S.-China joint scientific experiments and research focused on improving quality of life and economic growth.

We provide full support for, and bring foremost experience and technical expertise to, and implementing key U.S. national energysecurity objectives with China.

Mission Translation to Strategic Outcomes
