

International Organization is seeking individual for the position of:

### **GENERAL ENGINEER**

The General Engineer will assist the USAID/Haiti Mission in the management and monitoring of infrastructure activities implemented by contracted partners throughout Haiti. He/she will support technical teams to design and monitor activities in the engineering sector that involve construction or rehabilitation of buildings, roads, irrigation systems, electricity generation, and other infrastructure and capital improvement.

#### **Required qualifications:**

1. **Education:** A Civil or structural Engineering degree from a University level institution
2. **Prior Work Experience:** Ten years of civil or structural engineering experience, at least two years of which with the U.S. Government is desirable.
3. **Language Proficiency:** Excellent working knowledge in French and Creole. Level IV English (proficiency) is required.
4. **Knowledge.** A good understanding of US Government procedures and regulations relative to project-funded civil/structural construction (planning, design, contracting and construction management). Knowledge of construction materials and construction techniques. Substantial skill in preparing engineering reports, specifications, and related materials in English.
5. **Abilities and Skills:** Experienced in civil engineering design and drafting. Must demonstrate ability to take initiative and be self-directed. Knowledge and experience in conducting environmental impact assessments and using information systems. Ability to work as a team member with demonstrated good interpersonal skills.

**This position is compensated in Local Currency.**

**Only qualified candidates will be contacted**

**Curriculum Vitae should be sent in English no later than June 26, 2012 to:  
paphr@usaid.gov**
