- b) Use the same type of raw microfilm reel used by LOC, produced by KODAK. The reel must be 100 feet of 35mm ESTAR base high quality microfilm with life expectancy 500 and still has at least 1 year expiration date. Other brands such as AGFA and FUJI may be used with prior approval from the COR.
- c) Use KODAK/AGFA/FUJI chemicals or equal in microfilm processing stage to obtain maximum quality of 35mm silver-halide master negative.
- d) The materials and the microfilm reel shall remain the property of LOC Jakarta and may not be reproduced or sold without written authorization of LOC Jakarta.
- e) The materials and bibliographic record will be returned in its original condition by the contractor along at the same time with master negative reel, quality control pass certified form, which signed by the contractor's staff and packing list to the COR at an agreed upon schedule.

Filming specifications:

All work is to be done according to the below LOC standards. The contractor must adhere to these standards unless otherwise instructed by the Contracting Officer. Any anomalies shall be discussed by both parties in order for ensure that the standards are being met as follow:

- a) Density: LOC guidelines require that maximum density fall within a specific range between 0.9 to 1.2. Master negative film of low contrast original should have background density falling in 0.9 to 1.0 ranges. Medium contrast original should have background density falling in 1.0 to 1.1 ranges. High contrast original should have background density falling in 1.1 to 1.2 ranges. The minimum density (Dmin) of the master negative film should not be greater than 0.10 since higher Dmin significantly affect film contrast.
- b) Resolution: Resolution is the measure of the ability of microfilming system to record fine detail. LOC requires 120 line pairs per millimeter (mm). The quality index should be in the high quality level of 8.
- c) Splices: Maximum number of splices allowed is 4 since too many splices or improperly placed ones are automatic causes for rejecting the film. Ultrasonic type is the only allowed device to splice the film. Frequency & placement must be properly controlled because most of high speed duplicators react to them.
- d) Scratches: Emulsion scratches occurring within frame and in or near areas of text are clear justification for rejecting the film due to the almost inevitable loss of text or other visual information. And also if out of frame scratches whether that emulsion and or base-side scratches are present in significant amount. The contractor shall provide scratch free film reel replacement.
- e) Other defects: Any defects reveal in the master negative film such as skew, out of focus, frame spacing, fog marks, finger marks, and water spots should be retaken on the affected film
- f) Thiosulfate (S2O3) level: The American National Standards Institute (ANSI) has set 0.7 microgram per square centimeter of film as the maximum level that can still be considered of archival quality. Any film reel which contain above the maximum level of S2O3, which has been set by ANSI will be rejected.

Government provided items:

- a) The COR will provide camera-ready materials. Each material will be collated before it is sent to the contractor. Any sign of anomalies will be provided by the COR.
- b) The COR will be responsible for the preparation of all item-specific target for each newspaper to be microfilmed, including:

- Usage of those sign and target shall follow ANSI/AIIM MS14-1996 standard

Insurance

- a) The contractors shall insure, at no additional charge to LOC-Jakarta, all materials against loss or damage from any cause, from the time they leave LOC-Jakarta until they are returned
- b) In the event that materials supplied by LOC-Jakarta are damage or los, the contractor shall reimburse LOC-Jakarta in full of fair market value.

The offeror need not report regularly employed officers or employees of the offeror to whom payments of reasonable compensation were made.

(f) – (g) Reserved

(h) Certification Regarding Responsibility Matters (Executive Order 12689). The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals—

- (1) Are, are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;
- (2) Have, have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;
- (3) Are, are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and
- (4) Have, have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to

request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126).

(1) Listed end products.

(2) Certification.

(i) The offeror will not supply any end product listed in paragraph (i)(1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product.

(ii) The offeror may supply an end product listed in paragraph (i)(1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product. The offeror certifies that it has made a good faith effort to determine whether forced or indentured child labor was used to mine, produce, or manufacture any such end product furnished under this contract. On the basis of those efforts, the offeror certifies that it is not aware of any such use of child labor.

(j) Place of manufacture. (Does not apply unless the solicitation is predominantly for the acquisition of manufactured end products.) For statistical purposes only, the offeror shall indicate whether the place of manufacture of the end products it expects to provide in response to this solicitation is predominantly—

(1) In the United States (Check this box if the total anticipated price of offered end products manufactured in the United States exceeds the total anticipated price of offered end products manufactured outside the United States); or

(2) Outside the United States

(2) The TIN may be used by the Government to collect and report on any delinquent amounts arising out of the offeror's relationship with the Government (31 U.S.C. 7701(C)(3)).
