Bidding Questions & Answers

May 31, 2012

1. **Question:** Is it necessary to place a pour concrete around the pipe and tubes that containing cables when we would dig the ground to extend the tube that contains a cable.
Answer:

Please see drawing 1/E5. Bedding, backfill and finish materials for trench are described. There is no concrete encasement of the conduit itself. At existing sidewalks and slabs, contractor is to bore or remove and replace the surface and concrete to match existing.
