

EMBASSY OF THE UNITED STATES

SKOPJE • MACEDONIA

[\\$500,000 to 8 September City Hospital](#)

Ambassador Wohlers, Macedonian Minister of Health Mr. Todorov, Hospital Director Doctor Stojchev, and LTC Watkins from the U.S. European Command (EUCOM), celebrated the completion of a renovation project that designed and built two new operating rooms at the Skopje '8 September' City General Hospital. This EUCOM Humanitarian Assistance project involved building two state-of-the-art operating rooms on the ground floor of the hospital, as well as expanded reception and support areas, which will measurably improve the quality of health care for the whole of Macedonia, and also will improve the capability and skills of doctors and surgeons. Ambassador Wohlers noted in his speech that although "we are living in times of financial uncertainty, the United States government's commitment and willingness to work with our Macedonian friends made it possible to obtain over \$500,000 dollars in financing to make this project a reality."
