

Netherlands Trade Delegation to ASIS International Seminar & Exhibits

The Hague Security Delta (HSD)

Website: <http://www.thehaguesecuritydelta.com>

What: The Hague Security Delta (HSD) is the largest security cluster in Europe, located in The Netherlands. Through its organizing body, a non-profit, non-partisan organization, HSD promotes public and private collaboration and innovation in the field of national and international security. This includes all threats to society; ranging from crime to terrorism, fires or other emergency situations. Within this domain, HSD is the point of contact for access to numerous companies and institutions active in security; including consultancy, technology and product development, and business development.

Objective: Meet security companies interested in expanding their operations into the European market via the Netherlands may substantially benefit from our security cluster. Please meet with us to learn what our network can do for you.

The Netherlands Organization for Applied Scientific Research (TNO)

Website: <http://www.tno.nl>

What: TNO Defense, Safety and Security Research, is an independent research organization, whose expertise and research make an important contribution to the competitiveness of companies and organizations, to the economy and to the quality of society as a whole. TNO's unique position is attributable to its versatility and capacity to integrate this knowledge.

Objectives: The Netherlands is the only country in the world where the Ministry of Defense is not responsible for defense research. Instead, TNO does this research. We would like to meet with companies that have innovative security & defense solutions and products that are interesting for the European public and private market.

Trigion

Website: <http://www.facilicom.com>

What: Trigion is a leading service provider in security. It is a unique combination of people, knowledge, products and services, and represents decades of experience acquired whilst working for renowned and demanding customers. With more than 6,500 employees worldwide

and a large variety of products and services, Trigion is an extremely comprehensive security business. Trigion works for a wide variety of clients, both public and private, and in different branches and sectors. Our people are employed through numerous activities such as aviation security, event security, port security, asset security, retail security, fire security, and many more.

Objective: Meet with innovative companies with new solutions that will improve the services we offer our clients.

Fox IT

Website: <https://www.fox-it.com>

What: Fox-IT is a leading IT security company with a strong international reputation. Our security and intelligence solutions are applied and trusted by government bodies and major organizations worldwide. We develop solutions for the protection of state secrets, conduct digital forensics investigations and deliver security expertise in the form of audits, managed security services, consultancy and training courses. Fox-IT currently employs over 130 highly qualified staff in a cutting-edge environment.

Objective: Meet with companies that provide innovative cyber security solutions and services in North America.

Siemens Netherlands

Website: <http://www.siemens.com>

What: At Siemens we have the People, Applications, Systems and Service to meet client security needs. We install, integrate, monitor and maintain a wide variety of electronic security systems that are designed in collaboration with the end user to meet specific business needs. Siemens Netherlands focuses on four forward-looking sectors, namely Industry, Infrastructure & Cities, Energy and Healthcare, where we deliver products, (security) systems, and installations as services. Within these sectors Siemens approaches societal challenges brought about by megatrends (urbanization and demographic changes).

Objective: Meet with innovative companies that want to explore how Siemens can bring world-class security and heightened efficiency to government and private sector end-users.

The Netherlands Forensic Institute (NFI)

Website: <http://www.forensicinstitute.nl>

What: As market leader in its field, the Netherlands Forensic Institute (NFI) provides forensic services using state-of-the-art science and technology. In a dynamic environment, dedicated professionals produce forensic analyses quickly and effectively. In this way the NFI contributes to the investigation and prosecution of suspects, and the exoneration of innocent parties.

Objective: Meet with hi-tech companies and international knowledge and research institutes to develop new research methods, and to create innovative products.

The Hague Centre for Strategic Studies (HCSS)

Website: <http://www.hcss.nl>

What: HCSS was established in 2007 as an independent think tank. HCSS has been conducting strategic research and analyses on issues of international and national security and defense. They shape conceptual thinking into solution-oriented policy and operational recommendations.

Objective: Meet with organizations that create products or solutions that address future security sensitive trends and developments.

WestHolland Foreign Investment Agency (WFIA)

Website: <http://www.westholland.com>

What: The WestHolland Foreign Investment Agency (WFIA) is a government organization (economic development agency, IPA or FDI agency) and assists and advises international companies with finding a business location, setting up a legal entity and staffing their operations in the WestHolland region free of charge.

Objective: Meet with companies interested in expanding their operations into the Netherlands or via the Netherlands into the rest of continental Europe.

Municipality of The Hague

Website: <http://www.denhaag.nl/en>

What: The City of The Hague and its region boast a unique cluster of 300 security and safety businesses and organizations, including large international companies and several UN-institutions.

Objective: Specifically interested in research institutions and/or R&D department of security companies
