## **Services provided by Fulbright New Zealand**

The primary responsibility of Fulbright New Zealand is to administer the Fulbright Programme in New Zealand. We also administer a number of other visitor programmes involving New Zealanders and Americans, such as the Kennedy Fellowship and the Ian Axford (New Zealand) Fellowships in Public Policy.

Fulbright New Zealand also offers an advising service to people thinking about studying in the US. There is an educational adviser on the staff who is available to answer questions and help students throughout the process of organising admission to US colleges and universities. This includes answering initial inquiries, right through to helping with the completion of application forms if required. The adviser can also conduct pre-departure orientation sessions with interested students.

Fulbright New Zealand also maintains a reference library in Wellington. The library contains a variety of materials pertaining to study in the US, including:

- guides to all the undergraduate programmes in the US, in hard copy and on disk
- a collection of college and university catalogues, in hard copy and on CD-ROM
- databases to help students identify colleges and universities that meet their needs
- information on financial aid
- registration forms for standardised admissions tests

The library is open Monday through Friday from 9am to 5pm. We encourage you to visit us, but please ring to arrange a time first. If you live outside Wellington and it's not possible for you to visit our library, we suggest that you visit the library at your nearest university. If you're unable to find the information you're looking for, contact us and we will assist you via phone, fax, mail and email.

The Education Advising Center in Auckland has a small Resources library for your information as well as a Part time Education USA Advisor on site.

The Education office is located in the U.S. Consulate General on the 3<sup>rd</sup> floor of the Citi Bank Building. Please contact the Education Advisor first as the library is only available by appointment.

# **General information about undergraduate study in the US**

## **Colleges vs. universities**

A college in the US is a tertiary institution, not a secondary school. However, Americans do not use the terms “university” and “college” interchangeably. Generally, a university meets the following conditions:

- it offers graduate degrees (Master’s and Ph.D.) in addition to undergraduate degrees
- its faculty is expected to do research and to publish
- it has more than one undergraduate programme (eg, a College of Engineering, in addition to a College of Arts and Sciences)

A college meets the following criteria:

- it offers post-secondary, undergraduate education in only one branch of learning, usually the liberal arts (the humanities - traditional, non-technical subjects such as history, literature, and biology)
- it offers either a two or a four-year degree (never both)
- a college may also be an administrative unit within a university that is responsible for one branch of learning (liberal arts, engineering, architecture, etc.)

Americans commonly refer to both colleges and universities as "schools". For the sake of simplicity, the remainder of this handout uses the two terms interchangeably.

## **Degrees offered**

Undergraduate study in the US follows twelve years of primary and secondary schooling. The two undergraduate degrees awarded are the Associate’s degree and the Bachelor’s degree. The Associate’s degree is a two-year degree awarded by technical, community or junior colleges. The Bachelor’s degree is a four or five-year degree awarded by colleges or universities.

There are two types of Associate degrees:

- Associate of Arts (AA)
- Associate of Sciences (AS)

Associate’s degrees are usually very practical and offer advanced training in technical areas, such as business occupations, data processing, nursing, engineering technology, interior design and medical assisting.

There are several types of Bachelor’s degrees. Some examples are:

- Bachelor of Arts (BA)
- Bachelor of Science (BS)
- Bachelor of Fine Arts (BFA)

Some students intending to complete a Bachelor’s degree start their study at a two-year junior or community college, and then transfer to a four-year institution to complete the degree. This can significantly reduce costs because junior and

community colleges are generally less expensive than four-year colleges and universities.

## **Bachelor's degree requirements**

In order to receive a Bachelor's degree, students must generally complete several requirements, including:

- general education requirements (classes outside the major field of study) including 12 or more classes, mostly taken during the first two years of study (known as "lower division"). These courses are intended to provide students with a broad understanding of the world, and they are required for completion of the degree.
- a sequence of courses within the field of study, called "major requirements." This may consist of as many as 15 or more different classes, mostly taken during the last two years of study (known as "upper division"). In these courses, student work quite closely with professors and their curricula will be specialised.

Overall, students in most fields of study must complete 120 and 124 units/credit hours in order to graduate. This includes major requirements, general education and elective courses. With an average course load of 15 or 16 units each semester, this means that a student can complete a Bachelor's degree in four years of full-time study

In addition, some universities have additional requirements, such as a thesis written during the final year of study, or a research project.

## **Medicine and law**

In the US, medicine and law are not offered as undergraduate majors. Students must complete a Bachelor's degree in another field before they can apply to law or medical school.

There are no required majors for students planning to attend law or medical school, although some colleges offer "pre-law" or "pre-medicine" programmes. These programmes help prepare students for law or medical school, but they are not majors in their own right, and law and medical schools do not require applicants to have completed one of these programmes.

## **Methods of instruction**

At many small colleges, class size averages around 15-20 students, so classes often consist of a discussion between the professor and the students. This requires the student to play an active rather than a passive role. Professors often determine a portion of the course grade based on the quality of a student's class participation.

In large colleges or universities, it is more common to have large classes (60 or more people) conducted in a traditional lecture style. Undergraduate classes at large colleges and universities are often taught by graduate students (known as teaching assistants) rather than by full professors.

## **Preparation for undergraduate study in the US**

Admission requirements vary significantly from one university to another. Some institutions are very selective, while others accept most applicants. In addition to your athletic ability, the following four factors will be the main considerations taken into account in the assessment of your application:

- your academic record
- your application essay
- your scores on standardised tests such as the SAT I (Scholastic Achievement Test I), SAT II (Scholastic Achievement Test II), and TOEFL (Test of English as a Foreign Language)
- your recommendations

## **The semester and quarter systems**

The majority of colleges and universities in the US use the semester system. This means that there are two major periods of study in each academic year, Fall and Spring, with 16 or 17 weeks of study in each semester. There may also be a shorter, optional period of study in the summer.

Some universities use a different plan called the quarter system. In this plan there are four 10 week study periods (or “quarters”) during the year. Each student is usually expected to attend three quarters, but some students attend all four quarters in order to graduate sooner.

## **The credit system**

Course work in the US is measured on the credit system. When a student takes a class, the work is measured in “units” or “credit hours.” Usually, a class that meets for three hours of lecture or discussion each week carries three units of credit. Generally, one hour of undergraduate credit means one hour of lecture and two hours of homework. So a three-unit class means that a student is expected to work nine hours each week. An average Bachelor’s degree student takes about 15 units each semester so about 45 hours of attendance and study are expected each week.

When referring to “units” or “credit hours” people are generally talking about units in a semester system. Each unit in a quarter system equals  $\frac{2}{3}$  of a semester unit. So a student who completes 30 semester units each year in a semester system is doing the same amount of work as a student who completes 45 quarter units. If a semester-system university requires a total of 120 semester units for a Bachelor’s degree, a similar quarter-system school would require 180 quarter units.

## **General information about athletic scholarships**

The competition for athletic scholarships varies from college to college in the US. The NCAA Division I schools, with the big teams and the big budgets, are fiercely competitive. To stand any chance at these schools, you should be ranked in at least the top 10 in New Zealand in your chosen sport. Division II schools are not so competitive, but they don't have as much money to give either. Some schools with excellent sports programmes - notably the Ivy League and all Division III institutions - do not offer athletic scholarships but offer financial assistance based solely on need.

No matter where you apply, you'll need to meet all of the normal college entrance requirements. It's important to understand that many athletic scholarships do not cover the full cost of tuition and living expenses, so it's a good idea to investigate other possible types of assistance and to plan to have some money of your own available as a top-up.

Colleges and universities award athletic scholarships for one year at a time. To ensure that your school will renew your scholarship each year, you will need to maintain satisfactory academic progress. Colleges can generally renew athletic scholarships for up to four years, which is how long it normally takes to complete an undergraduate degree. However, colleges may reduce the maximum time allowed in the case of athletes who have competed in their own countries since leaving school.

Athletic scholarships can place enormous amounts of pressure on students. Coaches who offer you money will have high expectations about your athletic performance. Meeting these expectations can be difficult, especially for first-year international students who already have all they can handle simply adjusting to the college environment and living in another culture.

Before you go searching for an athletic scholarship, think about your long-term goals. If, for example, you want to go on to graduate school, the time your coaches will expect you to spend practicing and playing may affect your academic performance and thus your chances of gaining admission to a graduate school. Think about your limits and capabilities before you decide whether an athletic scholarship is the best option for you.

### **The major athletic organisations in the US**

Most colleges and universities in the US with athletic programmes come under one of three major collegiate athletic organisations in the US: the National Collegiate Athletic Association (NCAA), the National Junior College Athletic Association (NJCAA), and the National Association of Intercollegiate Athletics (NAIA).

The NCAA is the oldest and best-known collegiate sports organisation. It divides colleges into three separate divisions when it comes to athletics. Division I includes the strongest teams and contains about one-third of the NCAA's members. This is where you will find the big athletic programmes, and the scholarship budgets at these schools can be huge.

Division II schools maintain competitive athletic programmes, although the squads are somewhat smaller and Division II schools award fewer scholarships each year.

Division III is very different to the other two divisions. Under NCAA rules, Division III schools may not award financial aid on the basis of athletic ability. They may only offer financial aid based on need.

Members of the NAIA and NJCAA are mainly smaller schools (two-year colleges in the case of the NJCAA) and they traditionally do not recruit as vigorously as NCAA members.

## **The rules governing athletic scholarships**

Each of the three sports organisations mentioned above has very specific rules relating the recruitment and sponsorship of college athletes. These rules cover everything from when and where college coaches are allowed to speak to possible recruits, right through to how much money they are allowed to offer you. There are also rules governing athletics eligibility for international students.

The most important and basic rule about athletic scholarships is that you're not allowed to receive anything more than aid for the cost of your education. This may include books, tuition and room and board, but it can't include gifts of any sort, no matter what league, conference or association the school belongs to.

Following are the academic eligibility requirements for NCAA Division I and II schools. You must meet these requirements in order to qualify for athletic scholarships at Division I and II schools. However, these rules can and do change regularly so it is always best to check with the appropriate sports organisation(s) and request the most recent copy of their rules (see contact details below). If you have access to the Internet, you can visit the NCAA web site at <http://www.ncaa.org> where you should be able to find the up-to-date rules and regulations.

The contact details for the three major collegiate sport organisations are as follows:

NCAA National Headquarters  
700 W. Washington Street  
P.O. Box 6222  
Indianapolis, Indiana 46206-6222  
phone (317) 917-6222

NAIA  
1200 Grand Blvd.  
Kansas City, MO 64105  
phone (816) 595-8000  
NAIA Rules Hotline: 816-595-8180

NJCAA  
1755 Telstar Drive, Suite 103  
Colorado Springs, CO 80920  
phone (719) 590 9788

## NCAA Division I academic eligibility requirements

To be eligible for an athletic scholarship at a Division I school, you must meet the following criteria:

- graduate from high school
  - a. The documents below meet high school graduation requirements (may not be all inclusive):
    - National Certificate of Educational Achievement / NCEA Level 2 (Record of Learning, replaces Sixth Form Certificate)
    - National Certificate of Educational Achievement / NCEA Level 3 (replaces Higher School Certificate and Bursaries)

The documents above meet core-curriculum requirements, **ONLY** if at least five academic subject passes are present. Four of the five must be English, mathematics, natural/physical science and social science. The grade-point average must be at least 2.0 (equivalent to US 2.0) to 3.55 (equivalent to US 3.55) or higher on a 0-4 (4 high) scale. The grade-point average is calculated by averaging those core courses with passing grades that appear on the documents above and the Record of Learning. Courses must satisfy the core-curriculum distribution specified in Bylaw 14.3.1.1. Courses must satisfy the definition of a core course as specified in Bylaw 14.3.1.2.

**Note:** Only course that appear on the Record of Learning are acceptable

Applicable grading scale (may not be all inclusive):

E	Excellent	4	
M	Merit	3	
A	Achieved	2	(lowest passing grade)
NA	Not Achieved	0	

- b. The documents below, by themselves do not satisfy the graduation requirement of Bylaw 14.3; however, they may be used (in rare instances) in combination with documents listed in item “a.” above to meet the core-curriculum requirements:
    - National Certificate of Educational Achievement / NCEA Level 1 (replaces School Certificate).
    - Vocational units completed through Levels 1, 2 and 3.
- successfully complete a core curriculum in high school of at least 16 academic courses (students from NZ should forward all annual grade reports/transcripts from Year 10 and up to the clearinghouse). This core curriculum must include at least:
  - ◇ four years of English
  - ◇ three years of maths (Algebra I or higher)
  - ◇ two years of social science (possible examples: psychology, sociology, history, government, geography. International relations, economics, foreign languages, most religion courses as long as they are non-denominational)
  - ◇ two years of natural or physical science (including at least one laboratory class if offered by your high school)
  - ◇ one additional year of English, maths, or natural/physical science

- ◇ four years of additional academic courses (which may be taken from any category above, foreign language, or non-doctrinal religion/philosophy)

NOTE: Computer science courses may only be used for initial-eligibility purposes if the course receives graduation credit in maths or natural/physical science.

- have a high school grade point average (based on a maximum of 4.0) and a combined score on the SAT verbal and maths sections or an ACT sum score based on the following qualifier index scale:

<b>Core GPA</b>	<b>SAT score (Verbal &amp; Math ONLY)</b>	<b>ACT score</b>
3.550 & above	400	37
3.525	410	38
3.500	420	39
3.475	430	40
3.450	440	41
3.425	450	41
3.400	460	42
3.375	470	42
3.350	480	43
3.325	490	44
3.300	500	44
3.275	510	45
3.250	520	46
3.225	530	46
3.200	540	47
3.175	550	47
3.150	560	48
3.125	570	49
3.100	580	49
3.075	590	50
3.050	600	50
3.025	610	51
3.000	620	52
2.975	630	52
2.950	640	53
2.925	350	52
2.900	660	53
2.875	670	54
2.850	680	55
2.825	690	56
2.800	700	57
2.775	720	58
2.725	730	59
2.700	730	60
2.675	740-750	61
2.650	760	62
2.625	770	63
2.600	780	64

Core GPA	SAT score (Verbal & Math ONLY)	ACT score
2.575	790	65
2.550	800	66
2.525	810	67
2.500	820	68
2.475	830	69

2.225	930	78
2.200	940	79
2.175	950	80
2.150	960	80
2.125	960	81
2.100	970	82
2.075	980	83
2.050	990	84
2.025	1000	85
2.000	1010	86

## NCAA Division II academic eligibility requirements

To be eligible for an athletic scholarship at a Division II school, you must meet the following criteria:

- graduate from high school (to be determined by using the same criteria mentioned above).
- have a high school GPA of at least 2.000 (based on a maximum of 4.000) in a successfully completed core curriculum of at least 14 academic courses. This core curriculum must include:
  - ◇ three years of English
  - ◇ two years of maths (Algebra I or higher)
  - ◇ two years of social science (possible examples: psychology, sociology, history, government, geography. International relations, economics, foreign languages, most religion courses as long as they are non-denominational)
  - ◇ two years of natural or physical science (including at least one laboratory class if offered by your high school)
  - ◇ two years of additional courses in English, maths, or natural/physical science
  - ◇ three years of additional academic courses (which may be taken from any category above, foreign language, or non-doctrinal religion/philosophy)

- have a combined score on the SAT verbal and maths sections of at least 820, or a minimum ACT sum score of 68.

A “core course” is defined as a recognised academic course (as opposed to a vocational or personal-services course) that offers fundamental instruction in a specific area of study. Courses taught below your secondary school’s regular academic instructional level (e.g., remedial, special education or compensatory) can’t be considered core courses regardless of the content of the courses. If a school distinguishes between “university-bound” courses and others, only “university-bound” courses will count toward core course requirements.

## **NCAA Initial-Eligibility Centre**

Important! If you are planning to participate in NCAA Division I or Division II athletics you must first be certified by the NCAA Initial-Eligibility Centre by meeting academic and amateurism eligibility standards. The Eligibility Centre is not a placement agency or an admissions office. It provides the student-athlete’s initial-eligibility certification to colleges and universities that request and are authorised to receive this information. **Without certification from the NCAA Initial-Eligibility Centre you will not be allowed to compete nor will you be eligible to receive your athletic scholarship.**

There are several documents required to apply to the Eligibility Centre. International student- athletes must submit all of the following:

1. **NCAA Initial-Eligibility Centre Online Application for International Student-Athletes.** This online application requires a \$75.00 payment by MasterCard/VISA (credit or debit) card. If you do not have a credit or debit card, you may register using a check or money order by following the instructions in Section VIII of the registration form. The fee is not refundable should you decide not to attend an NCAA institution or decide not to participate in athletics.
2. **Original academic records** (or certified [attested] copies of the original documents) and certified, literal English translations for records not originally in English sent (not faxed) to the Centre.
3. **Score(s) from either the ACT or SAT** standardized tests, reported directly to the Centre by requesting code "9999."
4. **Online International Student Release Form** found on the NCAA Initial Eligibility Centre website.

*The Application for International Student-Athletes, The NCAA Guide for the College-Bound Student Athlete, and the Guide to International Academic Standards for Athletics Eligibility* can be downloaded from [www.ncaa.org](http://www.ncaa.org) or obtained directly from the Clearinghouse. Their address is as follows:

NCAA Eligibility Center  
PO Box 7136  
Indianapolis, IN 46206 USA

Tel. +1 317-223-0700  
Fax. +1 319 337 1556

## **The recruitment process**

American coaches tour the US searching for talent and they normally award athletic scholarships on an invitational basis. The coaches visit high schools and sport camps or clinics. Since you are several thousand miles away from where these coaches are scouting, you have a more difficult task when it comes to getting their attention.

If you are competing at international events, it's possible that they will see you there. Or you could try to attend one of the many sport camps or clinics held in the US during the Northern Hemisphere summer. If it's not possible for you to travel to a place where coaches are likely to see you, you may need to send them a videotape of a game or practice session.

## A planning timetable for organising admission

The academic year in the US commences anytime from late August to mid-October, depending on the school. The following suggested programme starts 12 to 18 months before the commencement of studies. Mid-year admission (which would allow you to begin classes in January or February) may be possible, but you'll need to check directly with the colleges concerned.

***International mail can be slow and unreliable so allow plenty of time for correspondence!***

For more detailed information about each of the steps outlined here, please refer to the rest of the information contained in this pack. Each college has its own requirements for admission, so these are general guidelines only. Consult the colleges for more detailed information about their specific admission requirements and deadlines.

### April/May/June

#### Step 1

Initially identify 10 to 15 colleges that offer scholarships in your sport and that meet the other criteria you've identified (see the section in this handout on selecting the colleges to which you will apply). Coaches will be looking for a good match both in terms of athletics and academics so be sure to choose carefully. If you make a bad choice and decide to transfer to another school, intercollegiate rules sometimes require a one-year loss of eligibility for scholarships, so you could lose your funding for a year.

Although Ivy League or Division III schools don't offer athletic scholarships, there is nothing stopping you from investigating the possibility of attending these schools and participating in their sports teams. You will just need to be sure to inquire about other sources of financial aid and how to apply for them.

#### Step 2

Consult *Accredited Institutions of Postsecondary Education* to ensure that the colleges to which you're applying are regionally accredited. Specialised accreditation is also important in fields leading to professional practice (ie engineering, architecture and pharmacy). If professional accreditation is available in your field, the *programme* to which you're applying should be accredited, as well as the *institution*.

#### Step 3

Write to the coaches at the colleges that you've identified. Your initial contact should be a short, typewritten letter explaining your interest in the school. With this letter, you should include a resume listing your accomplishments on and off the field. Your resume should cover the following:

- personal information (name, address, email address, telephone and fax numbers, age, height, weight)
- education (academic achievements, extracurricular activities)
- athletic accomplishments (including any sport camps attended)
- fitness level
- employment history
- references (especially from your high school coaches)

Please see the samples in this information pack for assistance with drafting your resume and letter.

#### **Step 4**

Begin to investigate possible sources of financial assistance outside the college system. There is no guarantee that any college will offer you an athletic scholarship so it's a good idea to look at other possible sources of funding. Even if a college does offer you an athletic scholarship, it may not cover your full tuition and living costs, so you may need additional funding. This process of looking for other types of assistance can take several months, and you often have to apply as much as a year before you actually need the money, so don't put off this step.

Collect as much information as possible about your sport so you'll know what types of organisations or institutions might offer scholarships to college athletes in your sport (you should approach this carefully because NCAA rules may forbid you to receive assistance based on your athletic ability from any source other than the college you will be attending). The information you collect from these sporting organisations will tell you where the major amateur tournaments are held, where clinics are being offered, and where the best summer camps are. To help you with this step, see the page in this pack which lists the contact details for the major sports organisations in the US.

### **July/August**

#### **Step 1**

Determine which standardised admissions tests you'll need to take and register to sit them. Do this as early as possible and request that your scores be sent to the colleges to which you're thinking about applying. Test scores must be sent to the schools directly from the testing agency. Colleges will not accept copies sent by you.

The standardised tests you're most likely to have to sit are:

- *SAT I or ACT*

Many colleges require applicants to submit results from the SAT I (Scholastic Assessment Test I) or the ACT (American College Test). It is possible to sit both in New Zealand.

The SAT I and the ACT are primarily multiple-choice tests that measures verbal and mathematical reasoning abilities. Neither test assumes knowledge of American history, literature or any other American-specific subject which you're unlikely to have studied. No standard score is required on either test; you can't fail either exam.

- *SAT II*

Unlike the SAT I, each SAT II exam tests your knowledge in a specific subject area. One or more SAT II subject test may be required of undergraduate applicants to certain colleges or universities, particularly those with competitive admissions. Usually, you are allowed to choose which subject tests you would like to take.

- *TOEFL*

If English is not your first language, you must take the TOEFL and submit your score to the universities to which you apply. Many institutions require a minimum 550 score on the TOEFL to enter their academic programmes.

A few schools may not require the TOEFL if you completed high school or college in the US or if you graduated from a four-year, degree-granting institution where English is the language of instruction.

## **Step 2**

Contact the undergraduate admissions office at each college that interests you and request their catalogue, an application form, and information on financial assistance other than sports scholarships (this contact may be by regular mail, fax or email). In your letter, indicate the major academic area of interest to you and give an indication of your academic performance thus far (see the sample letter in this handout). Carefully print your name and address on all inquiries. Don't send a lot of information with these initial inquiries.

## **Step 3**

Contact Fulbright New Zealand and organisations you've identified as possible sources of funding and request an application form (see the sample letter in this handout). Again, this contact may be by regular mail, fax or email.

## **August/September/October**

### **Step 1**

Carefully read all materials sent to you by the colleges, both by the coach and the undergraduate admissions office. Assess which colleges seem most promising and most closely match your interests, needs and capabilities. Consider whether you have a realistic shot at making the starting line-up, either in your first year or some time thereafter. You don't want to spend your entire college career sitting on the bench.

Some coaches will respond to your initial inquiry with a questionnaire. Be sure to complete this and mail it back right away, even if you have already provided them with some or all of the information they request.

Make sure that you can meet the college application deadlines. These vary from college to college so note the dates carefully. Some schools have deadlines from early November to early February for admission the following September, whereas other schools have "rolling admissions," which means they process applications year-round as they receive them and simply offer admitted students entry to the next available session.

Stated deadlines are generally the final date for receipt of applications and all supporting credentials, as well as official test scores (SAT I, SAT II, ACT and TOEFL).

If you're looking for other forms of financial assistance in addition to athletic scholarships, determine whether it's available (see the lists included with this pack).

## **Step 2**

Choose 4 or 5 schools to which you will actually apply. It's best to apply to more than one school, but don't apply to more than five. Applying is expensive, and if you've chosen carefully and realistically, you shouldn't need to apply to more than 5 to be fairly confident of being accepted by at least one.

## **Step 3**

Read the materials sent to you by the private funding sources you identified and determine whether you meet their selection criteria. Complete and submit applications for those scholarships for which you're eligible.

## **Step 4**

Sit the appropriate standardised test(s).

# **October/November/December**

## **Step 1**

Complete the college admissions applications carefully and legibly. Always give your name in exactly the same way on your application and in all future correspondence. If some of your credentials or records are under a different name or spelling, be sure to indicate this on the application.

Submit all required items a month or so *before* the deadline. *It is to your advantage to apply early so do so if you possibly can.* Be sure to include the correct application fee in US dollars.

When filling out the application forms, pay special attention to the application essay. For most colleges, this is a very important part of the application (see the section of this handout on writing an application essay).

## **Step 2**

Request your official academic records and, if appropriate, submit them in both the native language and in certified English translation to the universities to which you've applied. You will need to furnish evidence that you completed secondary school and submit transcripts showing the courses you took. If you took a school-leaving examination, then send a copy of the results. Official documents must bear the seal of the school and authorised signature(s). Certified photocopies are usually acceptable. Take the original documents with you to the US as the institution you attend may wish to see them.

## **Step 3**

Submit any required letter(s) of recommendation. Letters of recommendation should come from individuals you know through classes and extracurricular activities. A good referee will meet several of the following criteria:

- has a high opinion of you
- knows you well in more than one area of your life
- has taught or worked with many students and can make a favourable comparison of you with your peers
- has good written communication skills

No one person is likely to satisfy all these criteria, so choose those people who come closest to the ideal.

Once you've decided whom to ask for recommendations, ask them if they feel they know you well enough to write a meaningful letter. Provide them with the supporting materials that will assist them in writing a good detailed letter. Examples of such materials are transcripts, a resume, and a copy of your application essay. The referees themselves must write and sign the recommendations. It's also helpful to provide them with addressed, airmail-stamped envelopes and a copy of the college's letter of recommendation form.

#### **Step 4**

Carefully and promptly respond to all inquiries you receive from the colleges to which you've applied. Once your application file at an institution is complete, you'll need to allow at least eight weeks before expecting to receive an admissions decision. Many schools send offers of admission only in March and April.

### **March/April/May**

#### **Step 1**

Once you've received an admission decision from each college, you'll need to decide which college you would like to attend. Each college that offers you admission should give an indication of how much, if any, financial assistance they will offer you. If you don't receive any scholarship offers, look at alternatives. Talk to the coach about playing the first year without a scholarship, while gaining the experience and skill to land an offer the following year. Don't overlook other types of financial aid that may be available at each school.

#### **Step 2**

Write to the college you decide to attend to let them know that you will be accepting their offer of admission. You will also have to sign a letter of intent for the athletics department.

Write to any other colleges that offered you admission to let them know that you will not be taking up their offer of admission. There will be other students on the waiting list who would like your spot if you don't want it!

### **June/July/August**

#### **Step 1**

Apply for a student visa once you've received an I-20 or DS-2019 (Certificate of Eligibility) from the college you will be attending. For information about applying for a

US visa, you should call the US Visa Information Service on 0900 USA Visa (0900 878 472) or refer to <http://newzealand.usembassy.gov/> and click on “visas”.

The type of visa you will apply for will depend on whether the university sends you an I-20 or DS-2019. If they send you an I-20, you will need to apply for an F-1 (student) visa. On an F visa, any accompanying dependants are forbidden to work. If the university send you a DS-2019, you will need to apply for a J-1 (exchange visitor) visa. On a J visa, dependants are permitted to apply for a work permit upon arrival, but it is not automatic that a work permit will be granted. The J visa has a restriction attached to it that requires that you (and your dependants) return to New Zealand for at least two years upon completion of your degree.

Both visa types allow students to work, but there are very specific restrictions and guidelines regarding the type of work, hours of work, etc. It is best to check with the international students’ office at the university you attend before commencing any work.

The college can't issue an I-20 or DS-2019 until they've admitted you, determined your English proficiency (and you've arranged additional training if necessary), and they've established that your funding is sufficient to meet the institution’s expenses. In some cases, colleges require prepayment of the year's tuition or some portion of that tuition before they issue the I-20 or DS-2019. The Certificate of Eligibility is valid only for study in the institution issuing it, and only for the starting dates specified.

*Apply EARLY for your visa!*

Persons between the ages of 16 and 60 who need a non-immigrant visa to travel to the United States now require a personal interview with a consular officer at the Consulate General in Auckland to determine their eligibility. In general, applicants should not expect to receive a visa without a personal interview. This is a global policy that affects all applicants for U.S. visas around the world.

Applicants pay the visa application fee at NZ Post Shops, and mail their applications, passports, and any supporting documents to the Consulate General in Auckland. Applicants must schedule an appointment for a personal interview by calling 0900 USA Visa (0900 878 472). Every effort will be made to schedule an appointment on a day of the applicant's choosing, but the Consulate General cannot guarantee that all such requests will be accommodated. Interviews are not conducted on a walk-in basis. Appointments are required except in cases of genuine emergency. Applicants are asked to submit their passports, applications and any supporting documents prior to the interview so that appropriate checks can be performed in advance.

You should refer to [www.newzealand.usembassy.gov](http://www.newzealand.usembassy.gov) for the most up-to-date information and changes affecting the US visa application process.

## **Step 2**

Make travel arrangements and request pre-departure information from Fulbright New Zealand.

## **Selecting the colleges to which you will apply**

## Choosing a college

There are about 1,300 community and junior colleges and 2,000 colleges and universities in the US with undergraduate programmes. Obviously, you will need to narrow down this list and decide which colleges you wish to apply to. We recommend that in the initial stages you narrow down your list to no more than 15 institutions. We don't recommend that you actually apply to this many colleges, but it's good to investigate a range of options in the initial stages.

Often, students already have some colleges in mind. Most of the time, these are the well-known, highly competitive colleges, which is fine as long as you're realistic about the likelihood of gaining acceptance to - and, even more importantly, of getting any financial aid from - these schools. With 2,000 colleges and universities in the US offering Bachelor's degrees, it makes sense to cast your net a bit wider and consider a range of schools. This is something with which we can help you.

There are search engines available that allow you to create a list of four-year schools that meet a number of criteria specified by you, including whether they offer scholarships in your sport. Once you've got this list you can find out more about these schools by one of the following methods:

- obtain a copy of *Peterson's Applying to Colleges and Universities in the United States* or visit our Resources library in Auckland to use it.
- look them up in *Peterson's Guide to Four-Year Colleges* (in our library, or perhaps in your local university or public library)
- look up their website on the Internet

Once you know a bit more about each school, you can decide whether you would like to request a copy of their full catalogue and application materials.

## Rankings

Many students are interested in the annual rankings of US colleges and universities. It's important to understand that the US does not publish any official list of best universities. Several privately compiled "best" lists have been created based on such factors as research funds or the opinions of professionals in a given field. These lists vary considerably in their conclusion, which is not surprising given the number of colleges in the US, each with their own goals and strengths.

Often the most famous colleges and universities are also the most expensive and the most difficult to enter. The "best" university is going to be the one that is right for you; that is, one that offers athletic scholarships in your sport, offers your field of study, and meets other criteria important to you such as location, financing, housing, and facilities for international students.

Don't choose your schools based only on the fame of the university. Harvard, Stanford, MIT, UC Berkeley and Princeton deserve their excellent reputations, but there are many other very fine schools in the US offering undergraduate students first-rate educations.

## Things to consider when narrowing down your list of universities

There are many factors that will influence your choice of college. You need to do your research carefully to choose the school that will best suit your needs and talents. Weigh all of these factors and choose the institution with the best balance. Following are some things to think about when considering different colleges:

- **The athletic programme**

Find out the following:

- ◇ how do you qualify for the team?
- ◇ is the team in a conference or a league? which one(s)?
- ◇ how competitive is the conference/league, measured on a national level?
- ◇ is the college in compliance with all NCAA/NAIA rules and regulations? have they been found to be in violation in the past?
- ◇ is the athletics department in compliance with Title IX, which prohibits sex discrimination in colleges?
- ◇ what is the team's past record?
- ◇ how long is the season?
- ◇ how much time per week can you expect to practice?
- ◇ what is the travel schedule? what kind of accommodation is provided?
- ◇ what types of off-season activities will your coach expect of you?
- ◇ what is the coach's basic philosophy and method of coaching? do you agree with the philosophy and method?
- ◇ does the coach require a certain type of behaviour, dress or diet? will there be specific weight restrictions?
- ◇ are the services of a team trainer or doctor available?
- ◇ are the athletic facilities for your sport adequate?
- ◇ how well does the college support your sport in a financial sense?
- ◇ does the college prioritise particular sports or treat all equally?
- ◇ what is the substance abuse policy at the college?

- **Majors offered**

What subjects or areas of study do you want to concentrate on? You don't need to be absolutely certain, but you should be able to identify a few areas of interest to you. Look for colleges that offer majors in these areas and that offer a good selection of courses with a variety of faculty in these fields of study. Some large colleges offer just about every area of study, while smaller schools generally have more limited offerings.

Be careful about the names of some fields. Sometimes two very different fields have similar names. For example, engineering and engineering technology are not the same. Alternatively, two different universities may offer very similar programmes but give them different names, i.e. biology and biological science. Use the college catalogue to determine what course of study is involved in a particular major.

Some programmes may have restrictions on the admission of international students. Some public state universities have crowded programmes such as physical therapy that are open only to permanent residents of the state in which the school is located. International students and residents of other states are not eligible, or their numbers may be very restricted.

Remember that medicine and law are not studied at the undergraduate level in the US. Students who wish to study these subjects must already have earned a bachelor's degree.

- **Strength of programme**

On top of ensuring that the schools you apply to offer a major in your field of interest, you should also try to ensure that the schools actually have a recognised strength in your intended major. Schools with good programmes in a particular field of study may not necessarily be the universities that are well-known to you. For example, a small school with only undergraduate programmes may offer an outstanding Bachelor's degree curriculum in marine biology, yet not be well-known internationally because it is not a research institution.

- **Selectivity (entrance difficulty)**

When choosing which universities to apply to, be realistic about your chances of gaining acceptance to the school. It's expensive to apply, so spend your money on the schools that are most likely to offer you a place. In other words, if you're a strong student, but not an outstanding one, then you're probably wasting your time applying to the top three schools. You would do better to set your sights on a school a bit further down the list.

You can employ the same principle that most American students do: apply to one or two "reach" schools, two or three competitive but not extremely selective schools, and one "safety" school. Your "reach" schools are those that you would very much like to attend but you're not sure that your academic record and test scores are good enough for you to be seriously considered. The schools in the middle are those where you're confident that your application will be given serious consideration, but you're not 100% confident that you will be accepted. And your "safety" school is one that you are very certain will accept you because you more than meet their admission criteria.

If you are applying to community colleges, selectivity is not an issue because community colleges have non-competitive admissions.

Check the graduation rate and grade point average of student athletes in your sport and overall for all student athletes at each college.

- **Cost and financial aid**

Athletic scholarships often do not cover the total cost of attendance. Find out how much you are likely to have to pay. Will you have to pay tax on any portion of the scholarship? Check whether athletic scholarships cover the cost of medical expenses incurred during the season. If you sustain an injury, will the college withdraw your scholarship?

Colleges award athletic scholarships for one year at a time. It's important to clarify what criteria you will need to meet in order to ensure that the college renews your scholarship each of the four years.

Does the school provide a written contract stating the amount, duration, conditions and terms of the scholarship?

Check whether the institutions you choose offer other forms of financial aid. If so, check what the requirements are to qualify for other forms of aid. Scholarships usually go to the students with the best academic qualifications or

with special talents, in the arts for example. There is some but not very much need-based aid for international undergraduate students.

Private colleges are normally more expensive than public universities and community colleges, but they are also often more generous with their financial aid.

- **Accreditation**

The US government does not have a central ministry of education that provides national control over US educational institutions. Each state regulates education to some extent but colleges have considerable independence. Accreditation, in which institutions voluntarily agree to be evaluated by their peers, provides a system designed to ensure that these institutions achieve basic levels of quality in their programmes, facilities, and services.

Two types of accreditation exist: institutional and professional. Institutional accreditation refers to the college or university as a whole. Six regional accrediting bodies accredit institutions. A few national bodies accredit special types of schools, such as religious colleges.

Professional accreditation exists only in fields where professional competence is of broad concern, such as engineering, nursing, and business. The importance of professional accreditation varies from field to field. Some overseas governments recognise US degrees (in fields that have a professional accrediting body) only from programmes that are both institutionally and professionally accredited. Other ministries maintain their own lists of "approved" US institutions that are even narrower. You should look into any such possible limitations before choosing a programme and at a minimum should seek a degree only from US institutions that are institutionally accredited.

- **Academic facilities**

Good libraries are an important consideration. The importance of computer facilities will depend upon your field of study. Most institutions with major programmes in the sciences have highly sophisticated computer facilities. You should also consider flexibility or variations in the programme that interests you.

- **Type of college**

Choose the type of institution best suited to your needs:

- community college: small, local college offering Associate's degrees, often emphasise business and practical studies
- liberal arts college: offers Bachelor's degrees, generally has more students than a community college and requires students to study a broad range of subjects
- university: usually has a large number of students and a huge range of courses from which to choose

Colleges and universities in the US are either public or private. Public institutions receive a lot of their funding from the state and federal governments. Private

institutions get some funding from the state and federal governments, but most of their funding comes from private sources, generally in the form of donations.

Do you wish to attend a school with a specific religious affiliation? Do you want to attend a school that admits only one gender?

- **Enrolment size**

Colleges and universities in the US vary in size from a few hundred students to over 75,000. Campuses may be a few buildings in a city or a huge spread of land with its own airport. Size affects the atmosphere of the school. A large institution may offer a greater variety of courses, but at the same time professors may be too busy with their own research to help you. You may find that many of your classes are taught by teaching assistants rather than full professors.

A small college will almost always offer smaller classes and more contact with professors, but the departments will tend to be smaller too. Check the size of the university and the size of the academic department. Smaller schools generally offer more personal attention, smaller classes and a quieter, less hurried atmosphere.

- **Campus setting and geographical location**

The US is a very large country with many distinct regions. Think about what sort of climate and lifestyle would suit you best. Also consider whether you would prefer living in a large city or a small town. Do you have any family or friends in the US that you want to be near? Keep in mind that larger cities and the East and West Coasts tend to have higher living costs than rural areas or the Midwest.

- **Student body**

Consider factors such as whether the schools are co-ed (male and female students), men-only, or women-only, number of foreign students, number of full-time vs. part-time students.

Try to find out what the overall attitude of the student body is toward school teams and team members. Are your potential teammates the kind of people you would like to get to know?

- **Campus life**

If you want to participate in activities such as a drama group or a student newspaper then look for schools that offer such things.

- **Housing**

Is university housing available (in a dormitory or student residence hall), or will you have to search for an apartment? Does the college house athletes together or with non-athletes? If you will have to live off-campus, check if the school has a housing office to assist you.

Do athletes eat in a separate dining facility, or with all other students?

- **Services for athletes and international students**

Check what academic support services are available for student athletes, specifically whether there are tutors provided by the athletic department and whether these tutors are available to both scholarship and non-scholarship athletes. It's also good to find out whether faculty members are responsive to the needs of athletes who may have to miss classes due to athletic competitions.

Different colleges offer different services to international students. Some colleges have international advisers, home stay programmes for holidays, and other services for international students. Students who wish to improve their English should check to see which colleges offer programmes in English as a Second Language. If it's important to you, check to see whether the school has any international organisations, sports teams or clubs, or musical or other activities that will be of interest.

## **Writing an application essay**

### **General information**

In addition to the cold, hard facts about you as a student, American universities want to get to know you as a person, so they often require undergraduate applicants to write an essay as part of their application. The essay is your opportunity to distinguish yourself from the many other applicants with the same academic qualifications. As a student from another country, you generally have some advantage so make the most of it.

Admissions officers read hundreds of essays, so it's important that you make yourself come alive as a person and stand out from the crowd. You must be sure of what you want, why you want it, and why that particular college can help you. Explain why the school should select you over someone else.

The essay also shows how well you can express your ideas in writing. In college, your writing skills are very important to your academic success. Your grades will depend on your term papers, final exams, etc., and these are often in essay form. Colleges are looking for students who think clearly. The essay will demonstrate whether you possess this quality.

For many students, writing the essay is the hardest part of the application process, but with the keen competition for admission to US colleges your essay often becomes a crucial element of your application package. A writing sample will not be the sole basis for rejecting or accepting you, but it can certainly influence the admissions process. You need to take the essay seriously and allow yourself plenty of time to write it (weeks, rather than hours).

If your secondary school grade point average (GPA) or exam scores are low, then the essay can carry added importance because admissions officers will read it many times for an explanation as to why these numbers are low.

### **Essay topics**

There are many different essay questions but they can be easily separated into three generic categories: the *you* topic, the *why us* topic and the *creative* topic.

The *you* topic is basically a personal statement. The admissions office wants to know who "you" are or who you think "you" are. This question in many ways is the easiest

type because the topic is something you know a lot about. However, this type of essay can be the most dangerous. The key is focus. Try to focus on a single point, event, or action that explains clearly who “you” are and how you are different from others. Be direct and try to describe yourself in a warm and insightful manner. Back up the portrait you are painting of yourself with a real and vivid event (or events) that proves the interpretation you have chosen.

The *why us* topic asks you to explain your reasons for wanting to attend their particular institution, therefore it’s important for you to become well acquainted with each of the colleges to which you’re applying. They are looking to see if your background and expectations match what they offer. Again, focus on specifics. Say in a matter-of-fact way why their school is for you. Name names, course offerings, professors, and facilities. Make a clear and vivid connection between you and the school.

The *creative* topic can be the most difficult but can also be the most fun. Some examples of *creative* topics are: “Defend your least conventional belief”, “Given the authority to establish a holiday, what would you choose to commemorate?”, “If you could interview any historical figure, who would it be and why?” and “Describe an expressive silence”. The key to these questions is choice. Why did you choose to answer the way you did? Your choice reflects your personality, preferences, values, and how you think. In writing this type of essay stay focused on your idea and write in an well-organized and clear manner to express your points.

## **Tips for writing a good essay**

### **Getting started**

- make a few copies of the relevant page of the application form to practice on
- to begin, write freely and put down notes as they occur to you
- organise your thoughts by drawing up an outline and defining the main theme of your essay in a specific thesis statement, the purpose of which is to make clear the central idea of the paper - *the first sentence is the most important one because it gets the reader's attention!*

### **Content**

- be yourself
- focus on the special, unique things of your life
- be positive but honest
- don’t be modest
- distinguish yourself from other applicants and make yourself memorable
- include only relevant points
- express yourself clearly
- find an angle or “hook” so you capture the reader’s interest from the beginning
- don’t over-elaborate, but don’t be too brief and superficial either
- don’t mention subjects that are potentially controversial
- religion and politics normally don’t belong in your personal statement
- structure the sequence of your ideas carefully and logically
- in the conclusion, restate your thesis and the main points supporting it, and also give the reader some new ideas or information to challenge her/him to think further

### **Other tips**

- write several drafts of the essay, working to make it interesting and easy to follow

- eliminate repetition and make sure each sentence and idea is important and connects to the next
- check that the length and structure of sentences are varied and that you've avoided cliches
- use the essay to relate new information that is not already covered in your application
- if you have unusual experience, explain it so it can't be interpreted in the wrong way
- don't fail to explain errors or weaknesses in your background
- don't make yourself perfect - perfect applicants don't exist and they are not nearly as interesting as real human beings
- don't try to write something that you think will please the admissions officers
- be sure to avoid any confusion or ambiguity that might be created by cultural and linguistic differences
- it is not enough to simply state ideas, you must support them - if you successfully prove your statements, the reader should agree with your conclusion
- each paragraph should deal with one central idea, which is introduced early in a topic sentence, telling the reader what to expect in the paragraph
- several ideas in one paragraph will confuse the reader

### **Finishing up**

- make sure you've followed the instructions and that your answer is the specified length
- ask at least one person (your English teacher would be a good choice) to read your essay and give you their impressions and suggestions (close friends or relatives may not be the best choice because they know you well and may not notice missing information or lack of clarity in your essay)
- ask the person who reads your essay, "Could anyone else have written this?" and if s/he says yes, you haven't taught the admissions folks anything about you
- proof the essay carefully yourself and find someone else with strong English to do a final check of your grammar, punctuation, and spelling
- type the final essay or do it on a word processor

## Financial aid

Undergraduate study in the US is expensive. Below is a table (in US dollars) showing the estimated average annual cost of studying at community colleges versus private and public colleges and universities in the US (according to the College Board's *Trends in College pricing 2009-10*):

### Community, private and public colleges and universities

Areas of expenditure	Community	Public	Private
tuition and fees	\$2,544	\$18,548*	\$26,273
books and supplies	Range from \$940 to \$1,122		
room and board	Range from \$7,000 to \$8,900		
Transportation	Range from \$1,079 to \$ 2,200		
Other	Range from \$1,300 to \$2,300		
<b>TOTAL</b>	<b>\$12,863+</b>	<b>\$28,867+</b>	<b>\$36,592+</b>

*\*non-resident (Average Cost )*

It is vital that you are realistic about how much money you and your family can contribute to your education. This needs to be determined before you begin to research schools so that you don't waste your time and money applying to schools that you cannot afford.

You are expected to prove, to both the university to which you are applying and to the consul who grants student visas, that you can meet the yearly cost of attendance at the university you plan to attend. To make matters worse, tuition costs generally increase 5-10% each year!

Most students are unable to meet all of these costs on their own, so they must look for financial assistance. This information pack has already discussed athletic scholarships, but as already stated we highly recommend that you investigate other possible sources of funding in addition to athletic scholarships.

The search for financial aid is one of the most time-consuming tasks in the process of organising admission to a US college. It will involve a lot of research on your part. A good starting point is the library at your nearest university. Most of these libraries have excellent resources on potential sources of financial aid. Another source of information is the Internet (please see the enclosed list of web sites).

Unfortunately, there is no one definitive source on financial aid for study in the US. Assistance available from different sources varies from year to year and from school to school. And many colleges don't actively publicise what limited financial assistance they may offer in order to avoid being swamped with applications and so students won't pin all their hopes on schools that they simply can not afford.

It is very important that you don't leave your search until too late. Applications for many grants and scholarships close at least a year before the money will actually be available, so start your research right away. The more time you give yourself, the more scholarships you'll be able to apply for, and the better your chances of being offered assistance. Colleges also like to see that you have sought funding from a variety of sources.

It is important to note that almost all colleges will require you to meet a portion of the cost of your undergraduate study. Very few schools give total financial aid packages, and they are more inclined to give partial financial aid (generally 25-30% of the total

cost) to students who will be able to contribute something toward the cost of their own education.

The primary source of financial support for over 80% of international students is personal and family funding. Less than 10% of funding comes from the college and less than 10% comes from all other sources (government, corporate, organisations, foundations, etc). So at the same time that you start your search for colleges and financial aid, you should start to set some money aside for your education.

## **Scholarship search services**

(The following information is based on a handout written by the Council of Better Business Bureaus in the US).

There are a growing number of companies that “guarantee” to “match” students with sources of funding, including athletic scholarships, regardless of their academic qualifications or scholastic credentials. If this sounds too good to be true, it’s because it is. While there are some reputable companies offering assistance with tracking down possible sources of funding, you should do your homework and check out exactly what a search service is offering before you give them any money.

Most of these services ask for an upfront fee, ranging from US\$50 to several hundred dollars. In return for this, students receive a list of possible scholarship sources. These companies do not help you to obtain scholarships, nor do they screen applicants to ensure eligibility for certain scholarships. Once you’ve purchased the list it is your responsibility to research and contact each organisation.

Some companies offer a money-back guarantee if you don’t receive a scholarship or other funds. However, you may find it difficult to obtain a refund if you decide to seek one. The company may require that you prove, through documentation, that *every* source on the list denied you a scholarship.

Don’t necessarily steer clear of all scholarship search services - just be careful about which companies you choose to deal with and carefully consider exactly what it is they say they can do for you.

## **Merit-based vs. need-based aid**

Most non-athletic assistance available to international students is merit-based. Colleges and private foundations award merit-based aid according to criteria which measures performance or potential performance in college. This may be an objective measurement using grades and test scores, or it may be a subjective measurement based on one person’s opinion.

Need-based aid is comparatively rare, particularly for international students, and generally consists of college-based loans, grants and work study programmes. Colleges generally administer college-sponsored need-based programmes according to federal and state regulations. These programmes are open to students who meet specific financial need standards. Eligibility criteria are standard.

## **Selection criteria**

Students will have a greater chance of obtaining financial assistance if they:

- show evidence of a high level of academic achievement
- achieve high scores on standardised exams (SAT I, SAT II, TOEFL, etc)

- demonstrate financial need but have private funding to cover some of the cost (financial need is not crucial for all awards)

## **Application procedures**

You should apply for both need-based and merit-based aid, but the procedures may be different for each type of aid application. Application requirements vary widely, so you should write directly to the funding source for details as early as possible.

In general, you should:

- be as specific as possible about your interests and plans when writing to a potential funder for eligibility information
- sit for the appropriate standardised examinations such as the SAT I, SAT II, and TOEFL well in advance of the application deadline
- if appropriate, complete the necessary forms to enable universities to determine the extent of financial assistance required
- check special funds for which you may be eligible (ie, special women's groups, nationality, etc.)
- learn about potential funding outside the university and if possible locate a personal connection to support your application for these funds

## **Sources of financial assistance**

There are three main sources of financial assistance:

- private sources within New Zealand
- private sources outside New Zealand
- colleges and universities in the US that have scholarships and other forms of financial aid specifically set aside for international students

At the back of this pack there is a list of possible sources of funding. This list will help you get started, but you shouldn't see it as your only source of information.

Please note that you are not able to use New Zealand student loans at overseas universities.

## **Information about college-based aid**

Colleges themselves finance college-based aid. Many sources of college-based financial aid are reserved for citizens or legal permanent residents of the US. Be sure to ask about any restrictions when you apply for admission. Students with outstanding academic records stand a chance of securing full or partial funding simply by applying to very competitive schools and asking for financial aid on the basis of merit.

College-based aid is almost all awarded by the academic year, so it is difficult to receive aid to begin mid-year or in the Northern Hemisphere summer.

Some examples of college-based aid are:

- *grants and restricted grants*

Grants are outright money (that doesn't have to be repaid) with few or no strings attached. There are usually no work obligations. Most grants are merit-based, but some colleges offers a few grants solely on the basis of financial need.

Some institutions offer restricted grants. Eligibility for these grants depends on specific characteristics (ie, women interested in the Renaissance). Restricted grants may be difficult resources to locate. Some colleges publish a list of all available restricted grants. In other cases, students must do research to locate sources of these funds. You can ask about special fellowships at places such as the women's centre or ethnic associations.

Grants and restricted grants are also available from non-university-based sources (see the list enclosed with this pack).

- *internships and cooperative education programmes*

Internships and cooperative education programmes integrate classroom studies with on-the-job professional experience. Internships can be arranged either through a college or by the individual directly. However, it's necessary to check course credit and visa requirements with the foreign student adviser. It's also possible to obtain practical training during the programme, or for up to 12 months after completion of the programme.

- *scholarships (also known as prizes and awards)*

Colleges usually offer scholarships based on merit and on a competitive basis. The awards generally cover full or partial tuition costs. Some also include a stipend to cover living expenses. Scholarships are usually for a fixed amount, a specific purpose (i.e. tuition and books) and a set duration (i.e. one to four years). Generally, they don't need to be repaid. Colleges and other funding bodies can stop payment if a student fails to maintain the status for which they awarded the aid.

Scholarships are also available from non-university-based sources (see the list enclosed with this pack).

- *tuition and fee waivers*

Some colleges offer a small number of tuition and/or fee waivers to deserving students. Tuition and fee waivers generally cover tuition and fees for one academic year. Some universities may offer to defer payment of tuition until after the student graduates. This is essentially a low-interest loan.

- *work study*

In work study programmes, students work for non-profit organisations. This may include the university itself. In general, federal funds support work study programmes, although some are supported by state or institutional funds. Work study often consumes valuable hours for low wages. It's important to understand that you will not be able to pay your living expenses with what you will earn from a work study job.

This guide is based on information from the following organisations and publications:

- Institute for International Education
- Fulbright Commission, Prague, Czech Republic
- *The Advising Quarterly* (an AMIDEAST publication)
- *Practical Research and Planning* by Paul D Leedy
- *The American University: A World Guide* by Gregory A Barnes
- *The Directory of Athletic Scholarships* by Alan Green
- *The College Application Essay* by Sarah Myers McGinty

- Fulbright Advising Office, Tartu University Library, Estonia
- US-Israel Education Foundation
- Education USA website and adviser resources

## Appendix A

### Useful web sites for information about higher education in the US

The Internet is one of the best places to find current information about study in the US, whether it's information about specific universities, standardised testing, financial aid, or any other number of topics.

If you have access to the Web, use it! If you don't currently have access, you are most welcome to use the computer at Fulbright New Zealand. Or investigate other ways to get on line - through your university, your local public library, or a friend.

Following is a list of web sites to get you started. From these sites, you can in turn link to hundreds of other relevant sites. Happy surfing!

#### **General information on tertiary study in the US**

**<http://www.petersons.com>**

Home page for Peterson's, one of the largest publishers of education-related material, including the *Peterson's Guides to Graduate Programs* and the *Peterson's Guide to Four-Year Colleges*. Information about all levels of study in the US, careers and jobs, summer programmes, distance learning, financing your education, executive education and much more. Don't miss this site!

**<http://www.usnews.com>**

Home page for the Colleges and Careers Center run by *US News and World Report*. Contains information on college and graduate programme rankings, test preparation, career options, funding, best value schools, etc.

**<http://www.princetonreview.com>**

Home page for the Princeton Review, publisher of study guides for standardised admissions tests. Includes information on test schedules, business and law schools, other graduate programmes, undergraduate study, career advice, and information for international students.

**<http://www.kaplan.com>**

Home page of Kaplan, one of the largest test preparation companies in the US. Information about all levels of education, nursing, financial aid, information for international students, etc.

**<http://www.collegeboard.com>**

Home page for the College Board, the company that administers the SAT exam. Provides college and scholarship search facility, online registration for the SAT, test dates and a financial aid calculator. Aimed at undergraduates.

**<http://www.ets.org>**

Links to sites with information about the SAT, GRE, GMAT and TOEFL tests. Also has information about financial aid and about different colleges and universities.

**<http://www.ulinks.com>**

University Links page. Information on and links to college and university home pages, including a search facility.

**<http://www.mcli.dist.maricopa.edu/cc>**

Links to information about community colleges (two year post-secondary institutions that offer certificate programmes and Associate of Arts degrees) and related organisations. Searchable collection of links to over 555 community colleges.

**<http://www.collegenet.com>**

College search, scholarship search, academic resources, online application forms and much more. Aimed at undergraduates.

**<http://www.embark.com>**

This site offers a powerful college search tool, useful links, and advice and guidance from an expert college panel.

**<http://www.collegeview.com>**

A free online search service with profiles of over 3,500 colleges and universities, virtual tours, electronic applications, financial aid information and career planning tools.

**<http://www.studyusa.com>**

The home page for *Study in the USA*, an education guide for international students. Provides access to information about colleges and universities in the US, including request forms for contacting admissions offices. Also has information about obtaining a visa and applying for admission.

**<http://www.new2usa.com>**

This is a comprehensive site aimed at new arrivals in the United States. It has great articles on study in the US as well as on life in the US in general. You can find information on a wide variety of subjects at this site. It comes highly recommended.

## **College and university rankings**

**<http://www.princetonreview.com/college/research/rankings/rankings.asp>**

Student rankings of colleges grouped by academics, administration, quality of life, politics, demographics, social life, extracurricular, parties, and schools by type.

**<http://www.usnews.com/usnews/edu/home.htm>**

Take these rankings with a grain of salt as many college and university officials have criticised them for turning college comparisons into a popularity contest.

**<http://www.library.uiuc.edu/edx/rankings.htm>**

A comprehensive site about college rankings – including references to articles about their validity.

## **Information on athletic scholarships**

<http://www.ncaa.org>

The home page for the NCAA. Information for athletes looking into athletic scholarships at US colleges and universities.

<http://sports.espn.go.com/ncaa/index>

ESPN U home page. Useful for athletes trying to find out which schools are doing well in each sport.

## **Standardised testing**

<http://www.collegeboard.com>

Home page for the College Board, the company that administers the SAT exam. Provides college and scholarship search facility, online registration for the SAT, test dates and a financial aid calculator. Aimed at undergraduates.

<http://www.actstudent.org/regist/outside.html>

The ACT is a standardized test used by 4-year colleges and universities for admission and placement purposes. As with the SAT Reasoning Test (SAT I), the ACT is universally accepted by US institutions of higher education. Most colleges and universities leave it up to the student to decide which exam to take.

<http://www.ets.org>

Links to sites with information about the GRE, GMAT and TOEFL tests. Also has information about financial aid and about different colleges and universities.

<http://www.toefl.org>

Part of the ETS (Educational Testing Service) set of web pages. Contains information about the TOEFL exam, test dates, how to register, practice questions, etc.

## **Financial aid**

<http://www.educationusa.state.gov/finaid.htm>

Background about the cost of education at various types of institutions, tips on searching for financial aid and links to external sources of financial aid.

<http://www.finaid.org>

Excellent site about financial aid, including a special section for international students. Bear in mind that 99% of the site has been written for an American audience so some of the information won't be relevant to international students.

<http://www.fundingusstudy.org/>

A useful search engine for finding funding in the US.

**<http://nafsa.org/stufents/funding.html>**

NAFSA does not offer scholarships, grants to students, or other financial assistance, but this resource provides information about where to begin your search for financial aid.

**<http://www.internationalscholarships.com/>**

Premier database of scholarships.

**<http://www.edupass.org/finaid>**

Smart study Guide to studying in the United States. It covers all areas of interest and concerns.

**<http://www.nas.edu>**

The home page for the National Academy of Sciences, National Academy of Engineering, Institute of Medicine and the National Research Council. The site contains information on careers and research opportunities in the fields of science, medicine, agriculture, engineering, maths, etc. There is also information about graduate fellowships and postdoctoral opportunities.

**<http://www.nsf.gov>**

Home page of the National Science Foundation. Information about various science fields, as well as information about funding opportunities.

**<http://www.neh.fed.us>**

Home page for the National Endowment for the Humanities. Information about funding opportunities.

**<http://www.ed.gov>**

Home page for the US Department of Education. Information about the education system in the US and about financial aid.

**<http://www.studentloan.com>**

Low-interest student loans through Citibank. Requires a US citizen or permanent resident as co-signer.

**<http://www.iefc.com>**

International Education Finance Corporation website. Provides information about low-interest loans for international students in the United States. Requires a US citizen or permanent resident as co-signer.

**<http://www.iefc.org>**

International Education Financial Aid website. Information about loans and scholarships for international students.

## **Miscellaneous information on study in the US**

**<http://www.collegeclub.com>**

General site for college students and college bound students.

**<http://www.cybercampus.com>**

Billed as the “only Internet guide made for college students by college students,” this site takes you to areas with labels like “bizarre,” “explore,” or “road trip.”

**<http://www.international student.com>**

International student and study abroad online portal for those who are looking to further their education overseas.

**<http://www.cyberpaperboy.com/COLLEGE.html>**

Links to online college and university newspapers. This can be a great way to find out what is happening on certain campuses: what are the issues? what do students think about? what’s important to them? Campus newspapers provide insights into schools that you will never get from a catalogue.

**<http://www.utexas.edu/world/lecture/>**

World Lecture Hall site. This site contains links to pages created by faculty worldwide who are using the Web to deliver class materials. This could be a good place to find out exactly what is being taught in various classes at different universities.

**<http://www.ciee.org/>**

Council for International Educational Exchange home page. Information about worldwide educational exchange opportunities.

**<http://www.aipt.org/>**

Home page of the Association for International Practical Training, a non-profit organisation that promotes international understanding between the US and other countries through on-the-job practical training exchanges for students and professionals.

## **Appendix B**

### **Athlete's sample request for information from an undergraduate admissions office**

<your name in English>  
<your mailing address>  
<your city>  
<your COUNTRY>

<date>

Office of Undergraduate Admissions and Financial Aid  
<name of university>  
<university's mailing address> (exactly as printed in guidebook)

Dear Dr/Mr/Ms <contact name> (if you have one)

**or**

To whom it may concern: (if you don't have a contact name)

I am writing to request information on the undergraduate program at your <college/university>. I am especially interested in <intended field of study>. I graduated/will graduate from <name of your secondary school> in <month, year> and plan to start college in <month, year>. I am currently ranked in the top <%> amongst my secondary school peers.

Please send me a copy of your catalogue, the appropriate application materials and information about financial aid for international students (scholarships, grants, loans, etc.). Please also let me know if there are any special requirements for international students. I am a citizen of <country of citizenship>. I have also written to the <name of sport> coach to inquire about athletic scholarships.

I would appreciate it if you could send any materials **via airmail**. Thank you for your time. I look forward to hearing from you.

Yours sincerely

<your signature>

<your name>

## Appendix C

### Sample initial inquiry to a coach

<your name in English>  
<your mailing address>  
<your city>  
<your COUNTRY>

<date>

<name of coach> (if you know it)

**or**

<name of sport> Coach

<name of college>

<college's mailing address> (exactly as printed in guidebook)

Dear Dr/Mr/Ms <contact name> (if you have one)

**or**

Dear Coach (if you don't have a contact name)

I am in the process of investigating colleges and I am interested in <name of college>. I am particularly interested in exploring the possibility of an athletic scholarship, as I believe I can be an asset to your team.

I have enclosed a brief resume outlining my academic and sporting accomplishments. I would appreciate it if you would provide me with information about your <name of sport> programme and any scholarship opportunities. Please also let me know if there are any special requirements for international students. I am a <country of citizenship> citizen.

I would appreciate it if you could send any materials **via airmail**. Thank you for your time. I look forward to hearing from you.

Yours sincerely

<your signature>

<your name>

## **Appendix D**

### **Sample resume to send to coaches with your initial inquiry**

<your name in English>  
<your mailing address>  
<your city>  
<your COUNTRY>

#### **academic information**

<name of your secondary school>  
<address of your secondary school>  
expected date of graduation: <month, year>

SAT scores (if you have them): <number> verbal, <number> math  
examination marks: <examination marks and an indication of where this places you in relation to your peers>  
expected field of study: <field of study>  
high school activities: <list any non-sporting activities in which you have been involved during high school>

#### **personal statistics**

date of birth: <month day, year>  
height: <height in feet and inches>  
weight: <weight in pounds>  
50-metre time:  
100-metre time:  
mile time:

#### **athletic history**

<give a brief history of your athletic background, including sports and positions played, number of goals, tries, assists, captancies, sport camps attended, overall performance of team, any local, regional, national or international competitions you've won or placed in, etc>

#### **references (attached)**

<give names and positions of the three people who provided the references you will attach to this resume>

## Appendix E

### Sample request for information from a private funding source

<your name in English>  
<your mailing address>  
<your city>  
<your COUNTRY>

<date>

<name of contact person (if any)>  
<name of organisation>  
<organisation's mailing address> (exactly as printed in the guide book)

Dear Mr/Ms <contact name>

**OR**

To whom it may concern: (if you don't have a contact name)

I'm writing to request information on scholarships offered by your organisation. I <graduated/will graduate> from <name of your secondary school> on <month, year>. I am planning to attend college in the US and I am looking for financial support to enable me to accomplish this goal. I would like to apply for funding from your organisation because <up to 20 sentences about why you want to apply for funding from this organisation>.

If my interests make me eligible for your competition, could you please send me your current information materials and an application form **via airmail** at the above address.

Thank you for your help. I look forward to hearing from you.

Yours sincerely

<your signature>

<your name>

## Appendix F

# Sample successful essay

This is an actual essay written by Hugh Gallagher in his (successful) application to New York University. Depending on the type of programme you're applying to, you may not want to be quite as "clever" in your essay, but this is a good example of the sort of creativity for which you should be aiming. Remember: it's your job to make yourself interesting to the admissions committee!

### 3A. Essay

**In order for the admissions staff of our college to get to know you, the applicant, better, we ask that you answer the following question:**

*Are there any significant experiences you have had, or accomplishments you have realised, that have helped to define you as a person?*

I am a dynamic figure, often seen scaling walls and crushing ice. I have been known to remodel train stations on my lunch breaks, making them more efficient in the area of heat retention. I translate ethnic slurs for Cuban refugees, I write award-winning operas, I manage time efficiently. Occasionally, I tread water for three days in a row.

I woo women with my sensuous and godlike trombone playing, I can pilot bicycles up severe inclines with unflagging speed, and I cook Thirty-Minute Brownies in twenty minutes. I am an expert in stucco, a veteran in love, and an outlaw in Peru.

Using only a hoe and a large glass of water, I once single-handedly defended a small village in the Amazon Basin from a horde of ferocious army ants. I play bluegrass cello, I was scouted by the Mets, I am the subject of numerous documentaries. When I am bored, I build large suspension bridges in my yard. I enjoy urban hang gliding. On Wednesdays, after school, I repair electrical appliances free of charge.

I am an abstract artist, a concrete analyst, and a ruthless bookie. Critics worldwide swoon over my original line of corduroy evening wear. I don't perspire. I am a private citizen, yet I receive fan mail. I have been caller number nine and have won the weekend passes. Last summer I toured New Jersey with a travelling centrifugal-force demonstration. I bat .400. My deft floral arrangements have earned me fame in international botany circles. Children trust me.

I can hurl tennis rackets at small moving objects with deadly accuracy. I once read Paradise Lost, Moby Dick, and David Copperfield in one day and still had time to refurbish an entire dining room that evening. I know the exact location of every food item in the supermarket. I have performed several covert operations for the CIA. I sleep once a week; when I do sleep, I sleep in a chair. While on vacation in Canada, I successfully negotiated with a couple of terrorists who had seized a small bakery. The laws of physics do not apply to me.

I balance, I weave, I dodge, I frolic, and my bills are all paid. On weekends, to let off steam, I participate in full-contact origami. Years ago I discovered the meaning of life, but forgot to write it down. I have made extraordinary four course meals using only a

mouli and a toaster oven. I breed prizewinning clams. I have won bullfights in San Juan, cliff-diving competitions in Sri Lanka, and spelling bees at the Kremlin. I have played Hamlet, I have performed open-heart surgery, and I have spoken with Elvis. But I have not yet gone to college.

## **Appendix G**

### **Contact details for major sporting organisations in the US**

#### Archery

National Archery Association of the US  
1750 East Boulder Street  
Colorado Springs, CO 80909

# Funding for undergraduate study in the United States

Following are three lists of possible sources of funding:

- private sources available from within New Zealand
- private sources available from outside New Zealand
- colleges and universities in the US that have scholarships and other forms of financial aid specifically set aside for international students

For more details on any of these awards, please use the contact details given (note staff members often change so ask for the person that handles the scholarship in question if the person on this list of contacts is no longer available). Be sure to check all eligibility requirements with the funding providers. Many of the universities listed will have other aid that is available to both international and domestic students, so if you make an inquiry be sure to ask for information about all forms of aid for which you are eligible.

***These lists are by no means exhaustive.*** In the case of the private sources of funding available from outside New Zealand, there are other possible sources which you will need to spend time researching. You can do this through the Internet, through your nearest university library, or through the library at Fulbright New Zealand. If you are interested in attending a college or university that is not shown on the following list, don't assume that they don't have financial aid just because they aren't listed here. Please contact them directly to inquire about whether they have financial aid available for international students, or look up the college in *The College Handbook Foreign Student Supplement* (available at some university libraries and in the library at Fulbright New Zealand).

Unless otherwise specified, the grants, fellowships, scholarships, etc. listed below are available to students in any field of study. Most financial assistance is awarded on the basis of academic merit, regardless of demonstrated need. However, some awards take financial need into account as well, and this has been noted where appropriate.

It is sometimes the case that financial assistance is not available until after at least one semester of enrolment at a college or university. This means that finding financial aid for your first year of study can be more challenging than in subsequent years.

## Private sources in New Zealand

- *Alex Lindsay Memorial Award*  
general information: to provide financial aid to young students and performers of an orchestral instrument whose intention it is to take up a career in symphonic music.  
deadline: 31 October  
contact: The Secretary, NZ Symphony Orchestra, P O Box 6640, Te Aro, Wellington, phone (04) 385 1735

- *Dame Catherine Tizard Scholarships*
