

# Generator for sale

US Embassy Singapore has an excess generator that needs to be sold. It is made by Marathon Electric with Detroit Diesel engine. The generator is about 17 years old but has less than 360 hours of total run time. It comes with a matching automatic transfer switch. The generator was kept in an enclosed space away from outside elements and the required maintenance was performed by qualified technicians. It was functioning at the time of removal from the building, but it is being sold as it is, without any implied guarantees. Viewing of the generator and the transfer switch is possible by appointments.
