Learn more, Speak out, Stand up

HIV and AIDS Educational Symposium

World AIDS Day is held on December 1st each year and is an opportunity for people worldwide to unite in the fight against HIV, show their support for people living with HIV and to commemorate people who have died.

It is an opportunity to learn facts about HIV and put this knowledge into action. If it is understood how HIV is transmitted, how it can be prevented, and the reality of living with HIV today - this knowledge can be used to take care of one's own health and the health of others, and ensure that everyone living with HIV is treated fairly, with respect and understanding.
