

Medical Providers in Timor-Leste

Information on some of the major facilities can be found below. Limited emergency medical care is available in Dili. Options for even routine medical care throughout the rest of the country are extremely limited. Serious medical problems can require hospitalization and/or medical evacuation to Australia or Singapore, the nearest points with acceptable medical care, and can cost thousands of dollars. Information on air ambulance service providers is below.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at <http://www.cdc.gov/travel/default.aspx>. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at <http://www.who.int/en>.

Medical Insurance

The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Travelers may wish to consider purchasing travel insurance with medical coverage if their current policy will not cover potential expenses in Timor-Leste. Please see our information on [medical insurance overseas](#).
