

Progress Report: Humanitarian Assistance Program

Marked progress is being made on ongoing construction projects. Pictured above, the three-building school project in Assoukondji, 1.5 hours north of Lomé, recently had roofs installed and the adjacent 4-cabin latrine unit has sprung up too. The health clinic in the Lomé suburb of Kanyikopé (below), is evolving quickly. In the near future many students and patients will be able to benefit from these two important projects.

Multiple 'Firsts': Checks and Assessments

The Development Office completed the process of handing over all first funding checks to FY2012 Self-Help (SSH) grantees. Training and guidance outlining reporting requirements and proper project management accompanied each handover session.

No rest for the weary! First assessments for potential FY2013 SSH projects have begun and many promising undertakings throughout the Maritime region have already been visited, pictured above and below.
