

## Danya Fedorischev and Vlad Omelianenko: Bird Feeder ACCESS Luhansk

First, take one plastic bottle. Then take one or two plastic spoons. Then cut two opposite holes in the bottle and put a spoon inside (the handle of the spoon goes through the holes). Put some seeds or other bird food inside the bottle. When the bird sits on the spoon seeds go from the bottle on the handle of the spoon. When you try to reuse plastic bottles and plastic spoons you help the nature. And you feed the birds! So you help the nature twice!
