

Objective:

The purpose of this solicitation is to obtain a price quote for the installation of a fiber optical cable between the American Embassy and a private residence located in the Maxim Gorky district. The contractor will provide all personnel, supervision, equipment, tools, materials, supplies and services to perform the Installation.

Specific requirements:

The contractor will install a 4 strand fiber optical cable between the American Embassy building, 3, Moyqorghon, Yunusobod and a residual home located at 28/30 Salom St. Maxim Gorky district.

Contractor will ensure fiber optical cable to provide 5 megabytes per second data (or higher) transmission speed.

For the outdoor segment of the fiber optical cable installation, contractor will ensure the cable is properly insulated to protect from moisture, dirt or other debris, crushing and rodent penetration.

At the Maxim Gorky location, the fiber optical cable will be terminated in an office space located inside the residence. (To be determined by the customer). In this office space, the contractor will install a wall mounted SC fiber patch panel. The physical termination point for the cable will be this SC patch panel. The Contractor will provide all the necessary materials and equipment for building penetration, cable housing and interior conduits for the installed fiber optical cable.

At the Yunusobod location, the fiber optical cable will be terminated to an existing SC patch panel, located in a main transmission frame room. The contractor will provide all the necessary materials and components to interface with the existing fiber patch panel.

The contractor will obtain all the necessary permits from the government to initiate the project.

The contractor will provide statement of warranty based on the service rendered to guarantee the quality of work performed.

The contractor will be selected based on the source selection criteria determined by the Embassy- Experience in the industry, years in business, technical expertise and ability; Quality of past projects and performance, and competitive pricing.

The time of essence: The contractor will propose the timeline of the project. Not to exceed 60 days timeline.

The final price quote will include all labor, T&M (Time and Materials) to establish high speed fiber internet link between the two junctions mentioned above.
