INSTRUCTIONS FOR MEDICAL EXAMINATIONS

Each applicant, regardless of age, must have a general physical examination prior to the interview appointment. These examinations should be completed prior to your appointment at the Embassy. NOTE: Medical exams have a maximum validity of six months; applicants should wait to schedule their medical exam until their visa interview has been scheduled.

SCHEDULE THE EXAMINATION: Please call one of the doctors (also known as panel physicians) listed below to make an appointment for your exam. Since the full-body exam requires the patient to undress, you may wish to choose a male or female doctor accordingly.

Dra. Monica Caicedo
Centro Médico de la Sabana
Cra. 7 No. 119-14, Cons #506
Bogotá
Tel: 215-3949; 637-3219

Bogotá
Tel: 805-0091; 667-2727, ext 2420; 2423; or 2424,

COMPLETE LABORATORY TESTS: Applicants who are 15 years of age or older are required to have blood tests and a chest X-ray done BEFORE their general physical examination at the following address:

Instituto y Laboratorio Clínico
Calle 38 No. 8-28, Local No. 1
Bogotá
Tel. 232-7272

NOTES:

All applicants must present their passport and a photograph (see photograph instructions) at each laboratory or medical appointment.

Examinations from a laboratory or doctor not included on this list will not be accepted. All applicants must come to Bogota to complete the medical examinations; there are no authorized panel physicians or laboratories outside of Bogota.
FEES:

As of October 2013, the exams will have a MAXIMUM price of 285.000* (Colombian pesos) per adult. As noted below some children are required to get Tuberculin skin testing at an additional cost.

- 150.000 (Colombian pesos) for the general physical examination;
- 135.000 (Colombian pesos) for blood tests (Serology and X-rays);
- 38.000 (Colombian pesos) for Tuberculin skin testing for children between two and 14 years of age

*Prices are subject to change.
Please note that there may be additional costs required for vaccinations

Laboratory and medical examination fees must be paid in cash by the applicant. Any additional examinations ordered by the doctor must be paid for by the applicant. You may pick up the results of your exams at the doctor's office. On the day of your visa appointment, please bring the results of your medical examinations to the Embassy in a sealed envelope.

VACCINATIONS:

In order to assist the panel physician, and to avoid processing delays, all visa applicants should have their vaccination records available for the panel physician's review at the time of the medical examination. You should consult with your regular health care provider to obtain your original immunization record, if one is available. If you do not have a vaccination record, the panel physician will work with you to determine which vaccinations you may need to meet the requirement and direct you to the Embassy-approved vaccination clinic. Only the panel physician appointed by the U.S. Embassy can determine which of the listed vaccinations are medically appropriate for you, given your age, medical history and current medical condition. If you need a vaccine, the Embassy-appointed panel physician will determine which vaccinations you need, and will give you the vaccine(s) in his or her office. If you do not comply with the panel physician’s instructions on these vaccinations, the Embassy cannot issue your immigrant visa. Read the latest vaccination instructions online at: http://travel.state.gov/visa/immigrants/info/info_1331.html.

PLEASE NOTE

During your medical examination, you should provide all relevant information concerning your medical history to the examining physician:

- If you are taking any medications, you should know their names and composition.
- If you currently, or have previously suffered from an illness, major surgery or trauma, or physical or mental disease, please bring the medical history from the doctor or medical institution that treated you.
- If you are receiving treatment for any of the above, please bring a copy of your medical history, including treatment and medication.

Failure to provide this information during your medical examination will delay your visa process.

Tuberculosis (TB) Testing Requirements By The U.S. Center For Disease Control (CDC) For ALL Immigrant Visa Applicants

Due to increased rates of TB infection in the United States, the U.S. Government requires more stringent testing and treatment of all applicants before they can immigrate to the United States.

- All applicants two years and older must be tested for TB. Children between two and 14 years require Tuberculin skin testing (TST). Depending on the results of the TST, some children may also need chest X-rays. Families must plan to be available in Bogota for an extra 4 days to determine if the children also need chest X-rays.
- All applicants 15 years of age and older must undergo a chest X-ray before the medical examination can be completed. Pregnant women can elect to undergo the chest radiograph with double lead shielding over the belly or they can wait to complete the chest radiograph after the baby is born.
- If the tests are positive for TB, applicants may require treatment before the applicant can receive a visa.
