3. Information on New Vietnamese Immigration Law

Visitors to Vietnam should be aware of upcoming changes to Vietnamese immigration law. On **January 1, 2015**, the new law on Entry, Exit, Transit, and Residence of Foreigners in Vietnam will take effect. The new law may affect procedures for obtaining and using Vietnamese visas by foreign citizens. After January 1, individuals will only be able to use their Vietnamese visa for the purpose that it was granted (i.e., an individual may not enter Vietnam as a tourist and then seek to change their visa class to be able to work or study). Those intending to work in Vietnam must first obtain a work permit *before* applying for their work visa. For further information about these and other anticipated changes under the new law, please contact local immigration authorities or the Embassy of Vietnam in Washington DC.

6. Beware of Theft

Pick pocketing and bag snatches are a constant threat in Vietnam. When on the streets be mindful of your possessions. Keep them close, and don't let them out of your sight. The thieves are faster than you can imagine. An unattended bag can be gone in an instant. Do not carry unnecessary ID (such as your U.S. driver's license) nor all of your credit cards with you. If you need to carry a credit card, carry just one. Leave the others in your hotel safe, hotel safe-deposit box, or at home. It is also wise not to carry all of your cash with you.

Also, don't carry your passport unless you absolutely have to. Carry a copy of your passport and visa and leave the passport in your hotel safe or at home. [Back to top ↵](#)

7. Staying Healthy and Safe

Typhoon Season

We would like to pass along some severe weather preparation tips to U.S. citizens residing or traveling in Vietnam.

During the approach of a typhoon or severe storm U.S. citizens are encouraged to monitor the storm's path by listening to the radio, watching television, or monitoring the U.S. [Joint Typhoon Warning Center](#), the Vietnam [National Center for Hydro-Meteorological Forecasting](#), or [Tropical Storm Risk](#).

In the event of severe tropical depressions, please note the following recommendations to ensure minimal disruption or damage to yourself and your property: secure loose outdoor items around the home; fill vehicles and generator fuel tanks; check and charge all cell phones; check and assemble flashlights, tools, and first aid kits; procure batteries, candles, matches, potable water, canned or dry food, pet foods, medications, etc.

Dengue Fever

With the rainy season in full swing, Dengue Fever is a high risk throughout Vietnam.

Dengue virus is present in all tropical and many subtropical areas worldwide. The mosquitoes that carry dengue bite most often in the morning and evening and during hot, wet times of the year. However, they can bite and spread infection all year long and at any time of day. Apply insect repellent sparingly to exposed skin. An effective repellent will contain 20% to 30% DEET (N,N-diethyl-m-toluamide). DEET in high concentrations (>30%) may cause side effects, particularly in children. Therefore, avoid formulations containing >30% DEET. Use aerosols in an open space to avoid inhalation. Avoid applying repellent to the hands of children. Wear long-sleeved clothing and long pants if you are outdoors during the day and evening.

Ebola

Eat, drink, and be healthy

Thinking about sampling the native cuisine? Of course you are! Enjoying local delicacies is part of the wonderful experience of overseas travel, but eating the wrong things could make you very sick. Many countries don't have the same food handling and preparation standards found in the United States. Food that is not stored or cooked properly could make you sick. Do your research on which local foods and drinks to avoid.

Stay away from raw foods.

Choose your local restaurants carefully. If it looks dirty in the dining room, it could be worse in the kitchen.

Local water supplies could also be a breeding ground for bacteria. Always use bottled water (even to brush your teeth), and beware of fake bottled water – tap water sold as bottled. Be aware that ice may also be made from local tap water.

Practicing healthy habits, like washing your hands regularly, will help ensure that you stay healthy and enjoy your entire trip.

While you are keeping your eye on what you are drinking, make sure you keep an eye on who's pouring it as well. There have been cases in which certain drugs have been added to a person's drink without that individual's knowledge or consent. These drugs can make you sleepy, unaware, or even unconscious. Remain aware of your drinks and:

Don't drink anything you did not open yourself or that you didn't see being opened or poured by a bartender. Always watch your drink at parties and bars and get a new one if you leave it unattended for a while.
