

MEDICAL SPECIALISTS/FACILITIES (updated: October, 2015)

Physician care in Peru is near or at U.S. standards; however, hospital care can sometimes fall below typical U.S. standards. Nursing care is available, but the level of training is uneven. The number of available staff is small and the comforts of U.S. hospitals may be missing. That said, local hospitals are capable of dealing with most emergencies.

The following is a list of health care providers. Many of these specialists have had training in the US, are familiar with American medical care, and have a reasonable command of English.

The list does not represent a guarantee or an endorsement by the Department of State or the American Embassy. Lima has many qualified health care providers but space does not allow us to include all of them in this manual.

It is also important to understand that one is required to pay for the medical care received prior to leaving the hospital. A patient will not be discharged from the medical facility until he/she has paid all medical bills incurred during treatment.
