

**The U.S. Embassy in Caracas, Venezuela assumes no responsibility or liability for the professional ability or reputation of, or the quality of services provided by, the medical professionals, medical facilities or air ambulance services whose names appear on the following lists. Inclusion on this list is in no way an endorsement by the Department of State or the U.S. Embassy/Consulate. Names are listed alphabetically, and the order in which they appear has no other significance. The information in the list on professional credentials and areas of expertise are provided directly by the medical professional, medical facility or air ambulance service; the Embassy/Consulate is not in a position to vouch for such information. You may receive additional information about the individuals and facilities on the list by contacting local medical boards and associations (or its equivalent) or local licensing authorities.**

## **GENERAL INFORMATION**

### **Be Informed!**

It is advised that you get to know your family doctor and the location of the recommended health facilities in Caracas before you need them. This information will be helpful to you in the event of an emergency. A list of local physicians as well as recommended health facilities is included in this Handbook. Take the time to familiarize yourself with the services available!

### **Local Medical Facilities**

Caracas has many excellent hospitals, physicians, laboratories, and diagnostic testing capabilities in the private sector; however, the public sector has been in crisis for some time. Many public facilities lack basic supplies and equipment so it is not advisable to use the public hospitals for any of your health care needs. The term “hospital” is generally reserved for a public government-administered institution, which provides free or inexpensive care to low-income persons. The term “clínica” is used for a private facility which has both inpatient and outpatient services. All of the facilities recommended in this handbook are private clinics.

### **Hospitalization in Venezuela**

If overseas hospitalization should occur, it is reassuring to know that English-speaking physicians who have done graduate studies in the U.S., Canada, or Europe offer excellent medical care in Caracas, frequently. Hospitalization in Venezuela is very different from that obtained in the United States. Despite the availability of high quality medical care, nursing care is often inadequate and of poor quality. It is frequently expected that a family member will stay with the patient overnight to provide assistance as hospitals are poorly staffed at night. In private hospitals, each room has an extra couch/bed for just this purpose. Hospital staff will provide extra bedding for the family member (the “acompañante”), and you will be billed for this service.

### **Ambulance Services Health**

Rescarven and Ayuda 24 are the recommended private ambulance services. Medical personnel are on board of each ambulance. In order to use their ambulance services, each member of your family must be registered with Rescarven or Ayuda 24 in advance.

### **Local Pharmacies and Medications**

Pharmacies (Farmacias) are widely available throughout Caracas. Each sector of town has at least one pharmacy open 24 hours a day for emergencies. This is known as the farmacia de turno and is well recognized by a brightly lit neon turno sign. This notice is posted on the doors of other neighborhood pharmacies.

Many medications available in Venezuela have the same name as in the U.S, including Benadryl, Betadine, Caladryl, Chlortrimeton, Contac, Dramamine, Immodium, Kaopectate, Lomotil, Maalox, Mylanta, Motrin, Pedialyte, Pepto-Bismol, Tums, and Tagamet.

Many drugs, which are available only by prescription in the U.S. are available over the counter in Venezuela. Birth control pills can be purchased without a prescription. Antibiotics need a prescription.

### **CARACAS AREA HEALTH FACILITIES:**
